STUDY TYPE

Agricultural Survey [ag/oth]

ABSTRACT

FAO has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). The Food and Agriculture Organization of the United Nations (FAO) launched a household survey in Pakistan through the Data in Emergencies Monitoring (DIEM-Monitoring) System to monitor agricultural livelihoods and food security.

This fourth-round survey reached 10 541 households through face-to-face interviews conducted from 12 February to 15 March 2023. Households were surveyed in 43 vulnerable and flood affected districts across Balochistan, Khyber Pakhtunkhwa and Sindh provinces.

For more information, please go to <https://data-in-emergencies.fao.org/pages/monitoring>

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Households

Scope

NOTES

[The survey collected information on the following areas:

- Household: household information
- Income sources, shocks: income changes, shocks experienced by households
- Crop production: crops planted, area planted, area harvested, crop production difficulties
- Crop marketing: crop sale difficulties, crop sale price
- Livestock production: types of livestock present on holding, number of livestock, livestock production difficulties
- Livestock marketing: livestock sale, livestock sale difficulties, livestock sale price
- Fisheries production: fish activity, comparison of fish production
- Fisheries marketing: fish sale, fish sale difficulties, fish sale price
- Food security and consumption: food consumption, food utilization, coping strategies
- Needs assistance: open questions on the needs for assistance

Sampling

SAMPLING PROCEDURE

This fourth-round survey reached 10 541 households through face-to-face interviews conducted from 12 February to 15 March 2023. Households were surveyed in 43 vulnerable and flood affected districts across Balochistan, Khyber Pakhtunkhwa and Sindh provinces.

Data collection took place during the rabi cropping period. The survey was representative at administrative 2 level. The sample design considered a margin of error of 10 percent and data were weighted by demographics. Former rounds have been drawn from to make comparisons throughout this brief. The second-round survey was conducted in July 2021 and the third-round survey was conducted in April 2022. Out of the 28 districts covered in the third-round survey, only 16 were covered this round. The different surveyed areas and context, particularly in the third and fourth rounds, should be taken into consideration while reading this brief.

WEIGHTING

The sample design considered a margin of error of 10 percent and data were weighted by demographics.

data_processing

DATA EDITING

The datasets have been edited and processed for analysis by the Needs Assessment team at the Office of Emergencies and Resilience, FAO, with some dashboards and visualizations produced. For more information, see <https://data-in-emergencies.fao.org/pages/countries>.

METHODOLOGY NOTES

The dataset was anonymized using Statistical Disclosure methods by the Data in Emergencies Hub team and reviewed by the Statistics Division of FAO. All direct identifiers have been removed prior to data submission.

CONFIDENTIALITY

The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO.

ACCESS CONDITIONS

Micro datasets disseminated by FAO shall only be allowed for research and statistical purposes. Any user which requests access working for a commercial company will not be granted access to any micro dataset regardless of their specified purpose. Users requesting access to any datasets must agree to the following minimal conditions:

- The micro dataset will only be used for statistical and/or research purposes;
- Any results derived from the micro dataset will be used solely for reporting aggregated information, and not for any specific individual entities or data subjects;
- The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO;
- The micro dataset cannot be re-disseminated by users or shared with anyone other than the individuals that are granted access to the micro dataset by FAO.
