

INTRODUCTION

INTERVIEWER NOTE: *Read introduction below*

Now I am going to ask you a series of questions about how you feel about yourself as well as an in depth interview to find out about any further education or training, your employment in the past 3 years, your home and your behaviour (that is, your relationships with others, any involvement or experience with violence and any use of alcohol and drugs). If you have a child, I am also going to ask some questions about your involvement with your child and your confidence as a parent. In between the questions we will take a break. **Please remember that there are no right or wrong answers and all information that you provide will be treated as confidential.** Any questions? OK let's begin.....
