

About Houselist Tables

These tables on houses, household amenities and assets are based on the data collected through the Houselist Schedule. For the generation of these tables the data of each census house have been processed on computer. As the houseless population was not covered during the Houselisting Operations, tables in H-Series exclude the houseless population.

In view of the numerous improvements and expansion of the scope of enquiry in the Houselist Schedule at the 2001 Census, the number of tabulations has gone up substantially. Besides, there have been fundamental changes in the style and the level of presentation of data. As such the data presented in different tables may or may not totally correspond to the tables of the preceding census as indicated in the fly leaf placed immediately before the tables.

In all, the data are presented in 13 core tables which have been ascribed a particular theme. The themes on which the data are presented in these core tables are: uses of census houses; condition of census houses; predominant material of roof / wall / floor of census houses; type of structure of census houses; household size and number of dwelling rooms; ownership status of census houses; households by number of married couples, dwelling rooms and married couples having independent sleeping room; source of drinking water and its location; source of lighting; availability of bathroom and type of latrine within the house and type of drainage; availability of separate kitchen and type of fuel used for cooking; households by source of drinking water and availability of electricity and latrine; households availing banking services and the households having specified assets.

Table H-3 is divided into three parts and gives data separately on material of roof, wall and floor of census houses. Similarly, tables 6 and 7 have extensions table 6A and table 7A respectively and table H-12 has its extensions H-12 A and H-12 B. These extensions of tables provide data differently on the same theme as in the core tables. Similar data for Scheduled Caste and Scheduled Tribe households in these extended tables have been given separately. In view of voluminous data in tables 6A, 7A, 12A and 12B and corresponding tables for Scheduled Caste and Scheduled Tribe households, the data are presented only in electronic formats. There are 12 tables, the data for which will be available only in electronic format. For easy identification of these tables, the identifier 'E' is added in parenthesis to the right of the table number.

Fifteen Appendices, give similar data on total households or Scheduled Caste households or Scheduled Tribe households as presented for houses or houses occupied by the Scheduled Caste or Scheduled Tribe households in the table to which the Appendix belong.

In case of core table or its part or appendix, where the word SC or ST is suffixed to the table number, it gives data similar to the core table or its part or appendix for Scheduled Caste or Scheduled Tribe households. For instance table H-3A ST Appendix will provide data for Scheduled Tribes similar to that in H-3A Appendix for total population. There are in all 36 such tables, 18 each on Scheduled Castes and Scheduled Tribes. In case if there are no notified Scheduled Castes or Scheduled Tribes in a particular State or Union territory, the related tables for Scheduled Caste or for Scheduled Tribe households are not presented.

The data will be published for India and States / Union territories separately. For volumes brought at India and States or Union territories level, the level of presentation of data is indicated as under:

India: India and States / Union territories

State / Union territory: State / Union territory and Districts

The city / tahsil / town level data, wherever indicated in the tables, will be available only in electronic format. In the case of concerned State or Union territory volume, where tahsil is not an administrative unit, the data are presented for its equivalent administrative unit viz., taluk, police station, development block, circle, mandal, etc.
