Questionnaire:

The questionnaire was translated by a specialist translator. It wasn't back translated to english but was pre-tested. The pre-test cases were selected to reflect as far as possible the profile of the population. One pre-test involving 39 cases. The following WVS questions were excluded: V12, V37-38, V137-140, V147-162, V163, V168-173, V177-181-190, V200-203, V220-222, V243 Reason(s) not included: Not applicable to the Singapore context. Some questions are politically sensitive. Moreover, the questionnaire was rather long, so most non-core questions were omitted, where possible.

Sample:

Stratified, random sample of Singapore citizens Lower age cutoff was set at 15. No clusters were used. Substitution was used when the person no longer lives in the address stated or when the case is not contactable after 3 tries. Sample was stratified by ethnicity at the sample design., and stratified by age after completion of fieldwork.

Remarks about sampling:

1. The majority group was undersampled, and minority ethnic groups oversampled, 2. The questionnaire was slightly modified; however, item numbering remains similar to the WVS master

questionnaire.

Survey procedure:
Personal Face to Face Interview

Fieldwork:
Interviewers were paid according to performance. Calls were made at different times of day to approach address/household. Calls were made on different days of the week. Minimum number of recalls: 3 Interviews werent' supervised, but 305 of the interviews were back-checked.

Response rate:
%response is 79%, and %non-response is 21%. Total number of starting names/addresses: 2610 - Addresses which could not be traced at all: 183 -Addresses established as empty, demolished or containing no private dwellings: 26 - no contact with selected person: 341 - refusal at selected address: 379 - personal refusal by selected respondent: 379 - full productive interview: 1512 - partial productive interview: 21

Weighting:
For ethnicity, the weight factor was determined at the sample design stage; while that for age was determined after the fieldwork stage.
