Geographical scope:

Sweden

Principal investigator(s):

Prof.dr. Thorleif Pettersson University of Uppsala Faculty of Theology Sociology of Religion PO Box 1604 Uppsala 75146 Sweden P +46 (18) 18 21 71 F +46 (18) 71 01 70 E-mail: thorleif.pettersson@teol.uu.se

Data Collection Organization:

ARS - Research AB

Fieldwork Period:

15-11-1999 - 13-02-2000.

Universe:

National Population, Both sexes, 18 and more years

Sample size:

1015

Estimated Error:

3,1

Questionnaire:

The questionnaire was translated and/or adapted from the English Master Questionnaire (the Danish questionnaire was used to construct the Swedish version). This translation was carried out by a member of the research team. The questionnaire was then back-translated into English and pre-tested (pre-testing was done by the interview organiser (mainly to check time and discover 'bad' questions)). There have been a number of optional EVS questions and items included in the Swedish questionnaire. These are: q20a, q57a, q58_k and q58aq110a. Beside these, there were also country specific questions and items included that were neither compulsory nor optional EVS questions. These country-specifics included several items from the WVS-questionnaire. There were located in the combined EVS-WVS questionnaire. Concerning the order of questions, they were all ordered in the prescribed order. Not all core EVS (demographic) questions were included in the Swedish questionnaire. Items that were not included are: q26, q36, q45_a, q69, q82, q83, q97, q98, q99, q100, q101, q104, q107, q111: economic reasons.

Sample:

Two-stage sample: 1. Municipalities/regions, 2. Respondents.

Remarks about sampling:

The final number of clusters or sampling points is 51. The sampled unit from office sampling is the named individual. A known limitation of the realized sample is the slight geographical bias in the sample.

Survey procedure:

Personal Face to Face Interview

Fieldwork:

The interviewers were paid by hours worked. Concerning the rules that were governed how an interviewer approached an individual, address or household, calls had to be made at different times of the day and on different times of the week. There was a minimum number of 6 recalls before interviewers were allowed to stop trying to contact respondents. 20% of all interviews eventually was back-checked.

Response rate:

41% Concerning non-response the following reasons were given: the total number of starting names/addresses was 2500; there were 625 cases in which addresses couldn't be traced at all or where addresses were established as empty, demolished or containing no private dwellings; for 585 times it was the case that the selected respondent was too sick/incapacitated to participate, the selected respondent was away during the survey period, the selected respondent had an inadequate understanding of the language of survey, there was no contact at the selected address, there was no contact with the selected person, there was a refusal at the selected address, there was a proxy refusal (on behalf of the respondent), there was a personal refusal by the selected respondent, or there was another reason (which are not specified here); for 1015 cases there was a full productive interview.

Weighting:

Because of a geographical bias, a weightvariable is included.
