Standardized Expanded Nutrition Survey 2024

ABBREVIATION OR ACRONYM  
SENS 2024

COUNTRY

Name	Country code
Ethiopia	ETH

STUDY TYPE  
Sample Frame, Households [sf/hh]

ABSTRACT

The 2024 Standardized Expanded Nutrition Survey (SENS) was conducted in Mirqaan Refugee Camp, located in Bokh Woreda, Doolo Zone, Somali Region, Ethiopia. Established in April 2023, the camp hosts over 52,000 refugees and asylum seekers, primarily displaced by the conflict in Lascanood. The survey aimed to assess the nutritional and public health status of the camp population and inform targeted interventions. Using the SENS Version 3 guidelines and SMART methodology, data were collected through a simple random sample of households between January 25–27, 2024. Modules included anthropometry, child health, infant and young child feeding (IYCF), food security (administered to a 50% household sub-sample), demography, and mortality. Results indicate a critical nutrition situation, with a Global Acute Malnutrition (GAM) rate of 24.2% and Severe Acute Malnutrition (SAM) prevalence of 3.8%, both exceeding emergency thresholds. The survey also highlights suboptimal IYCF practices, limited vaccination coverage, and gaps in preventive nutrition programming. Findings underscore the urgent need for multisectoral support to restore and strengthen nutrition and health services in Mirqaan camp.

KIND OF DATA  
Sample survey data [ssd]

UNIT OF ANALYSIS  
Household

## Version

---

VERSION DESCRIPTION  
Version 2.1: Edited, cleaned, and anonymised data.

VERSION DATE  
2025-06-03

## Scope

---

NOTES

The scope includes:

- Demographic profile
- Mortality
- Anthropometric and child health indicators
- Anaemia among children and women
- IYCF practices
- Food consumption and coping strategies
- In-kind food assistance

- Ownership and use of mosquito nets
- Access to WASH services and hygiene products

## TOPICS

Topic
Health and Nutrition
Water Sanitation Hygiene
Malaria Prevention and Control

## KEYWORDS

Keyword
SENS
Ethiopia

## Coverage

## GEOGRAPHIC COVERAGE

Mirqaan Refugee Camp, Bokh Woreda, Doolo Zone, Somali Region, Ethiopia.

## UNIVERSE

Refugees and asylum seekers residing in Mirqaan Refugee Camp as of January 2024.

## Producers and sponsors

## PRIMARY INVESTIGATORS

Name	Affiliation
UN Refugee Agency	UN

## PRODUCERS

Name
World Food Programme (WFP)
United Nations Children's Fund (UNICEF)
RRS
OWDA
DDS
Bokh Woreda Health Bureau

## Sampling

## SAMPLING PROCEDURE

Simple random sampling was used in Mirqaan Refugee Camp. The sample size was calculated using ENA for SMART. A 10% non-response rate was assumed. Finite population correction was applied due to a small under-5 population. Household verification and labelling were conducted by OWDA prior to the survey.

## WEIGHTING

Design weights were calculated using the total refugee population in Mirqaan (52,136) and the sample size for each module. For modules with sub-sampling, such as Food Security (administered to 50% of households), separate weights should be

applied based on the selection probability.

## Data collection

### DATES OF DATA COLLECTION

Start	End
2024-01-25	2024-01-27

### DATA COLLECTION MODE

Face-to-face [f2f]

### DATA COLLECTION NOTES

Data were collected via face-to-face interviews using mobile phones (KoBo Collect, version 2023.2.4). Five survey teams were trained and deployed, each consisting of a team leader, interviewer, translator, and anthropometric assistant. Centralized training included standardization and pilot testing. All eligible children aged 0–59 months in selected households were assessed. Food Security data were collected from a 50% subsample of households.
