TITLE

IV Housing Census and IX Population Census of 1981 - IPUMS Subset

ABBREVIATION OR ACRONYM

PHC Guatemala 1981 (IPUMS Harmonized Subset)

COUNTRY

Name	Country code
Guatemala	GTM

STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

SERIES INFORMATION

DOI:10.18128/D020.V7.5

KIND OF DATA

Population and Housing Census [hh/popcen]

UNIT OF ANALYSIS

Persons, households, and dwellings

UNITS IDENTIFIED:

- Dwellings: yes
- Vacant Units: no
- Households: yes
- Individuals: yes
- Group quarters: yes

UNIT DESCRIPTIONS:

- Dwellings: A dwelling is any structurally separate and independent lodging which was (1) built, converted, or arranged for human habitation, as long as it is not being used partially or completely for any other purpose on the census date or (2) was not built for human habitation but was being used for that purpose on the census date.
- Households: A household is a single person, or several people together who may or may not be related by family ties but who live together to provide for their food and other basic needs.
- Group quarters: Collective dwellings include lodging which is structurally separate and independent and which is intended to lodge persons who do not live in households, such as hotels, boarding houses, hospitals, boarding schools, family housing with more than five boarders, campgrounds, etc.

Version

VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

VERSION DATE

2024-10-05

Scope

NOTES

Additional notes on a sample that is part of this study: Guatemala 1981

CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

(1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.

(2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.

(3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.

(4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

New samples for:

Bolivia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available here.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of

current residence. More information is available [here](#).

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A_HISCOSE, SE1890A_HISCRELSE, SE1890A_HISCSTATSE, SE1890A_OCCMULTISE, SE1900A_HISCOSE, SE1900A_HISCRELSE, SE1900A_HISCSTATSE, SE1900A_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BPLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1_EG2006 and GEO2_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1_5_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2_BR1970 in Brazil 1970 were corrected.

Questions and instructions

CATEGORIES

Value	Category
00	Vacant
10	Households
20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

description

DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

Group Quarters Variables -- HOUSEHOLD	IPUMS

HHWT: Household weight**Data file:** GTM1981_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

PERSONS: Number of person records in the household**Data file:** GTM1981_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

PERSONS is a 4-digit numeric variable.

RECTYPE: Record type

Data file: GTM1981_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 1 Range: - Format: character

Questions and instructions

CATEGORIES

Value	Category
H	Household
P	Person

description

DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

description

DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

SERIAL: Household serial number**Data file:** GTM1981_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 12 Range: - Format: Numeric

description

DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

description

DEFINITION

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

AREAMOLLWGEO1: Area of GEOLEV1 unit in square kilometers

Data file: GTM1981_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 10 Range: - Format: Numeric

description

DEFINITION

AREAMOLLWGEO1 indicates the area in square kilometers of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

description

DEFINITION

GEO1_GT identifies the household's department within Guatemala in all sample years. Departments are the first level administrative units of the country. GEO1_GT is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1_GT can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Guatemala can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

description

DEFINITION

GEO2_GT identifies the household's municipality within Guatemala in all sample years. Municipalities are the second level administrative units of the country, after departments. GEO2_GT is spatially harmonized accounting for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO2_GT can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Guatemala can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

description

DEFINITION

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

2	2 families

3	3 families
4	4 families
5	5 families
6	6 families
7	7 families
8	8 families
9	9 or more families

description

DEFINITION

NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

LITERAL QUESTION

II. Characteristics of the place of habitation

1. Dwelling type

1 Regular house (formal) 2 Apartment 3 Room in a tenement (palomar) 4 Shack or other rustic housing (rancho) 5 Improvised house (covacha, barraca) 6 Other type 7 Collective: (Specify: hotel, house with more than 5 guests, hospital, barracks, prison, etc.) ____
Name of the establishment ____

CATEGORIES

Value	Category
1	Formal house
2	Apartment
3	Room
4	Poor rural dwelling
5	Improvised dwelling
6	Other type
9	Collective dwelling

INTERVIEWER INSTRUCTIONS

II. Dwelling characteristics

As mentioned previously, questions 1 through 9 of this section should be investigated for each one of the "dwellings". The specific instructions that follow will allow the enumerator to complete the work more efficiently.

Question 1: type

1. How to investigate this question

The following definitions should be considered in investigating this theme:

a) **Regular house (formal):** This is defined as a room or group of rooms that because of the

way in which was constructed, reconstructed, adapted, or arranged, is meant to be the shelter for a household. This is the case only if it is not completely used for other purposes at the time of the census. A house is characterized by the fact that its construction is surrounded by dividing walls, partitions, fences, gardens, or land that separates one house from another (Figure 1). This also corresponds to those dwellings with a roof for only one or two contiguous houses, with water service, lighting, and toilet facilities for the exclusive use of that dwelling (Figure 2).

Note: Even though this type of dwelling is generally meant to be the place of abode for one household, two or more households may be residing therein at the time of the census. If this is the case, one census form is used for each household.

b) **Apartment:** This is defined as a room or group of rooms that because of the way in which was constructed, adapted, or arranged, is meant to be the shelter for a household. This is the case only if it is not completely used for other purposes at the time of the census. It is characterized by the fact that it is part of a building with one or more floors or levels and is separated from the other apartments by walls that extend from the floor to the upper level or to the roof of the dwelling.

[Figures 1 and 2 are omitted]

[p. 29]

An apartment is generally equipped with indispensable services such as water, lighting, and toilet facilities for exclusive use. As in the previous case, an apartment is generally a site built to house one household; however, it may be occupied by two or more households at the time of enumeration. If this is the case, one census form should be used for each household.

[Figures 3 is omitted]

[p. 30]

c) **Room in a tenement:** This is defined as a space situated in a dwelling; constructed, adapted, or arranged to provide shelter for as many households as there are rooms in the building. Each room is characterized by a direct entrance from a hallway, corridor, or patio, etc. These dwellings generally are not equipped with exclusive water service, toilet facilities, or bathrooms.

A household can occupy one or more of these rooms, in which case these rooms are considered to be one dwelling.

It can also be the case that two or more households occupy one room, in which case it is necessary to use two census forms for the same dwelling.

[Figures 4 is omitted]

[p. 31]

d) **Rustic cabin or hut:** This is defined as a dwelling with one or more rooms that has been constructed of natural or local materials. The walls are made of cane and mud (*bajareque*), mud, straw, *lepa*, sticks, or cane. The roof is made of straw, palm, or of similar materials. It is meant to be the place of abode for one household. This is the case only if it is not completely used for other purposes at the time of the census. It is also possible that two or more households live in a "rancho". If this is the case, one census form should be used for each household.

[Figures 5 is omitted]

[p. 32]

e) **Improvised dwelling:** This is defined as an independent, provisional, structure constructed with waste materials without a preconceived plan to function as a place of abode for a household. Two or more households can also occupy this type of unit. If this is the case, one census form should be used for each household.

[Figures 6 is omitted]

[p. 33]

f) **Other type**: This category includes the following dwellings: i) mobile units; that is, those places of abode constructed to be transported (e.g. tents, boats, ships, etc.); ii) Permanent structures not meant for human habitation such as granaries, garages, stalls, warehouses, etc.; iii) Other buildings not meant for human habitation, such as natural refuges, caves, etc.

These types are considered to be dwellings only if they are inhabited at the time of enumeration. As in previous cases, the same number of forms as the number of households in each dwelling is used.

2. How to record the data

Once the dwelling has been classified into one of the previous categories according to the respective definitions, the number of the corresponding category is circled.

If dealing with collective dwellings, according to the definition given in the attached instructions for this type of dwelling, the type is specified (e.g. hotel, hospital, barracks, etc.) and the name of the establishment is recorded. The enumerator will then skip directly to section VII, "persons in the household", to proceed to enumerate each person living in the collective dwelling.

(See Example on the following page)

INTERVIEWER INSTRUCTIONS

II. Dwelling characteristics

As mentioned previously, questions 1 through 9 of this section should be investigated for each one of the "dwellings". The specific instructions that follow will allow the enumerator to complete the work more efficiently.

Question 4: predominant material in the floor
 1. How to investigate this question
 The informant is asked what the predominant material in the floor of the dwelling is.
 2. How to record the data
 Once the type of material used in the construction of the dwelling's floor has been identified, the number of the category is circled.
 [p. 37]

INTERVIEWER INSTRUCTIONS

III. Living situation of household number

The questions included in this part of the form should be investigated for each of the households that are residing in the dwelling at the time of the Census.

The following specific instructions will allow the enumerator to carry out the work more efficiently.

Question 4: number of rooms

1. How to formulate the question
To investigate this question, the definition of "room" (see page 40) and "bedroom" should be taken into account. A "bedroom" is a room usually used for sleeping. Therefore, before asking the pertinent questions, the following should be taken into account: When one census household lives in a dwelling, the number of rooms should be the same as declared in section II, question 8; with this in mind, the enumerator will ask:
A. What is the total number of rooms available to this household?, and;
B. How many of these rooms are used as bedrooms?
2. How to record the data
If only one household lives in the dwelling, the same number of rooms as declared in section II, question 8 is recorded. If two or more households live in the dwelling, the number of rooms and bedrooms available to the household in question is recorded, independently for each household.
Might be cases where two or more households live in one-room dwellings. In these cases, it will be recorded in the form that each household has one room and one bedroom available. This situation will be documented in the space meant for observations in the census form.
[p. 46]
3. Example:

8	Unknown
9	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

II. Dwelling characteristics

As mentioned previously, questions 1 through 9 of this section should be investigated for each one of the "dwellings". The specific instructions that follow will allow the enumerator to complete the work more efficiently.

Question 6: year of construction
 1. How to investigate this question
 The enumerator will ask the year of construction of the dwelling. In the cases in which this information is not known, other persons (members of other households living in the same dwelling, neighbors, etc.) are asked until someone qualified to answer the question is found.
 2. How to record the data
 Once the year of the dwelling's construction has been identified, the number of the category is circled.
 3. Example:
 [These instructions refer to a graphic of question 6 of the census form]

Question 7: facilities

Question 8: number of rooms

1. How to investigate this question

The following definition will help the enumerator in correctly investigating this question:

For the purposes of the census, a room is defined as the space, situated in a dwelling, which is enclosed by walls that extend from the floor to the roof, or at least to a height of 2 meters from the floor. This space has sufficient space for an adult bed; or at least 2 square meters. Therefore, bedrooms, dining rooms, living rooms, and cells for human habitation are all included as rooms. Corridors, open galleries, hallways, kitchens, and bathrooms are not considered to be rooms. Rooms used exclusively for commercial purposes, such as workshops, services, etc. should not be included in the count.

Taking into account this definition, the total number of rooms available in the dwelling is investigated.

2. How to record the data

The number of rooms in the dwelling is written down in the space provided.

III. Living situation of household number</p>

<p>The questions included in this part of the form should be investigated for each of the households that are residing in the dwelling at the time of the Census.</p>

<p>The following specific instructions will allow the enumerator to carry out the work more efficiently.</p>

<p><sva a="all" v="GT81A050">Question 2: toilet facilities

1. How to formulate the question

What type of toilet facilities doe the household have access to?

The following definitions are taken under consideration:

The enumerator should be aware of the difference between: a) a "toilet connected to a sewer"; b) "toilet connected to a septic tank"; c) "washable toilet"; and d) "outhouse or latrine". Type "a" refers to the installation for the elimination of human waste connected to a sewer that receives water through pressurized pipes.

[p. 43]

Type "b" refers to an installation for the elimination of human waste that receives pressurized water and is connected directly to a septic tank.

Type "c" refers to an installation for the elimination of human waste without a pressurized water connection; rather the waste is washed with water transported in a recipient or in another form (water current). Type "d" is similar to the previous type except it does not have a current of water.

In the cases in which the dwelling has a toilet (either connected to a sewer or septic tank), the enumerator will find out, before recording the data, if it is used by only one household (exclusive service) or by two or more households (service for multiple households).

2. How to record the data

The enumerator will circle the number corresponding to the answer given.

III. Living situation of household number

The questions included in this part of the form should be investigated for each of the households that are residing in the dwelling at the time of the Census.

The following specific instructions will allow the enumerator to carry out the work more efficiently.

Question 1: water supply

1. How to formulate the question
 What type of water service does this household have access to?
 The following definitions are taken into account: "1. Exclusive use running water" is the water service inside the dwelling used by only one household.
 When the household has running water that is shared between two or more households, the enumerator will circle the number "2. running water for multiple households". The service "3. public running water (outside of the dwelling)", should be circled when the household has access to running water that comes from a public source, installed for the community's use. If the household stores water from a well, river, lake, or spring; the numbers 4 or 5 are circled according to the case. The number "6. other" is circled for households that store water in another form, other the 5 cases explained above; e.g. rain water, water purchased from another household, water purchased from a tanker truck, etc.
 2. How to record the data
 The number corresponding to the answer given is circled.

III. Living situation of household number

The questions included in this part of the form should be investigated for each of the households that are residing in the dwelling at the time of the Census.

The following specific instructions will allow the enumerator to carry out the work more efficiently.

Question 7: tenure

1. How to formulate the question
Under what tenancy condition does the household occupy the dwelling?

[p. 48]

The following definitions will allow the enumerator to correctly investigate this question:

Completely paid for: The dwelling occupied by the household in which one of the members has acquired the right to the real estate property via purchase, with cash, credit, or through inheritance etc. This is the case only if it has been completely paid for by the time of the census.

Paying in installments: The dwelling occupied by the household in which one of the members has acquired the right to the real estate property through a credit purchase. A mortgage is still held at the time of the Census.

Rented: The dwelling occupied by the household that pays the owner or subtenant an amount of money or its equivalent in-kind or in services.

Loaned: The dwelling occupied by the household, with the express permission of the owner, for which no rent is paid.

Other: Any other form of tenure that cannot be classified into the above categories.

How to record the data
Once the type of tenure has been identified, the enumerator will circle the number corresponding to the answer given.
When the dwelling is being paid for or is being rented, the amount of the monthly mortgage (in payment) or rent (rented) payment in Quetzales [Guatemalan currency] is requested and recorded.

Question 8: household appliances
 1. How to formulate the question
 Does the household have any of the following artifacts?
 The question is asked and the list of artifacts on the form is read immediately thereafter.
 2. How to record the data
 If one or more of the artifacts listed on the form are available to the household, the enumerator will proceed to circle each of the respective numbers.
 Example:

INTERVIEWER INSTRUCTIONS

III. Living situation of household number

The questions included in this part of the form should be investigated for each of the households that are residing in the dwelling at the time of the Census.

The following specific instructions will allow the enumerator to carry out the work more efficiently.

Question 7: tenure
 1. How to formulate the question
 Under what tenancy condition does the household occupy the dwelling?
[p. 48]
 The following definitions will allow the enumerator to correctly investigate this question:
Completely paid for: The dwelling occupied by the household in which one of the members has acquired the right to the real estate property via purchase, with cash, credit, or through

inheritance etc. This is the case only if it has been completely paid for by the time of the census.

Paying in installments: The dwelling occupied by the household in which one of the members has acquired the right to the real estate property through a credit purchase. A mortgage is still held at the time of the Census.

Rented: The dwelling occupied by the household that pays the owner or subtenant an amount of money or its equivalent in-kind or in services.

Loaned: The dwelling occupied by the household, with the express permission of the owner, for which no rent is paid.

Other: Any other form of tenure that cannot be classified into the above categories.

How to record the data
Once the type of tenure has been identified, the enumerator will circle the number corresponding to the answer given.
When the dwelling is being paid for or is being rented, the amount of the monthly mortgage (in payment) or rent (rented) payment in Quetzales [Guatemalan currency] is requested and recorded.
3. Example:
[These instructions refer to a graphic of question 7 of the census form]

INTERVIEWER INSTRUCTIONS

V. Family or home-based industry

It is desired to quantify all of the households that produce articles, in the dwelling, to sell. This excludes agricultural products. It is also desired to identify the principal articles produced and the number of persons usually working in the production of these articles.

If one or more members of the household produce articles purely for entertainment, this is not counted.

If one or more household members receive materials from a workshop or factory in order to produce one or more articles (home workers) and receive payment for this work, they are not included.

It is necessary to take into account that (visible) workshops open to the public are not counted here, even if they take up part of the dwelling.

1. How to formulate the question

C. How many persons usually work in the production of this article?

2. How to record the data

The enumerator will record the number of persons declared by the informant.

3. Example:

[These instructions refer to a graphic of the census form]

INTERVIEWER INSTRUCTIONS

VI. Resident and present population in the household</p>

<p>Present Population</p>

1. How to formulate the question

A. How many persons slept in the dwelling the night of Sunday, March 22, 1981?

2. How to record the data

The number of males and females who slept in the dwelling under investigation the night of Sunday, March 22, 1981, is recorded. They are counted even if they are not residents of the dwelling.

The total is also recorded; that is the sum of the males and females.

3. Example:

[These instructions refer to a graphic of the census form]

description

DEFINITION

This variable indicates the number of males who slept in the household on March 22, 1981.

MOMLOC: Mother's location in household**Data file:** GTM1981_PHC-P-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of MOMLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships. To restrict MOMLOC to biological mothers, such as for own children fertility estimation, MOMLOC should be reset to zero when STEPMOM is greater than zero.

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

MOMLOC is a 3-digit numeric variable.

Codes0 = No mother of this person present in the household.

1 or higher = The person number of this person's mother

41	Other Relatives, within empirical child cap
42	Other Relatives, within constructed child cap
51	Non-Relatives, within empirical child cap
52	Non-Relatives, within constructed child cap

description

DEFINITION

PARRULE describes the criteria by which the IPUMS International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Constructed Family Interrelationship Variables -- PERSON	IPUMS

PERNUM: Person number

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

PERNUM is a 4-digit numeric variable.

PERWT: Person weight

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

POLYMAL: Man with more than one wife linked

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	No more than one wife linked via SPLOC
1	More than one wife linked via SPLOC

description

DEFINITION

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

POPLOC: Father's location in household

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of POPLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPPOP is designed to identify some of these social relationships. To restrict POPLOC to biological mothers, such as for own children fertility estimation, POPLOC should be reset to zero when STEPPPOP is greater than zero.

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

POPLOC is a 3-digit numeric variable.

Codes0 = No father of this person present in the household.
1 or higher = The person number of this person's father

SPLOC: Spouse's location in household

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly. For more details on the construction of SPLOC, see the Comparability section of SPRULE and this paper on IPUMSI family linking methodology.

Codes0 = No spouse of this person present in the household.

1 or higher = The person number of this person's spouse

SPRULE: Rule for linking spouse

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 2 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
00	No spouse present
01	Rule 1: strong relationship pairing, couple adjacent
02	Rule 2: strong relationship pairing, couple not adjacent
03	Rule 3: weak relationship pairing, couple adjacent
04	Rule 4: weak relationship pairing, couple not adjacent
05	Rule 5: weak consensual union pairings
06	Rule 6: sample-specific rules (usually child-to-child)

description

DEFINITION

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

STEPMOM: Probable stepmother

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Biological mother or no mother present
1	Mother has no children born or surviving
2	Child reports mother is deceased
3	Explicitly identified step relationship
4	Mother reports no children in the home
5	Age difference implausible
6	Child exceeds known fertility of mother

description

DEFINITION

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children born or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

In cases where more than one criterion for a likely stepmother is met, STEPMOM will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

STEPPOP: Probable stepfather

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Biological father or no father present
1	Child reports father is deceased
2	Explicitly identified step relationship
3	Age difference implausible
4	Spouse of mother
5	Identified as adopted
6	Surname difference -- male child or never-married female

description

DEFINITION

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

In cases where more than one criterion for a likely stepfather is met, STEPPPOP will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

description

DEFINITION

ELDCH gives the age of the person's oldest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

ELDCH is top-coded at age 50 or older.

description

DEFINITION

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

FAMUNIT: Family unit membership

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

FAMUNIT is a 4-digit numeric variable.

CodesIf there is only one group of related individuals within the household, all of them will be coded "1;" if there is a second, separate such group listed on the form, all of them will be coded "2," and so on.

NCHILD: Number of own children in household

POLY2ND: Woman is second or higher order wife

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Person is not the 2nd or higher order wife linked via SPLOC
1	Person is the 2nd or higher order wife linked via SPLOC

description

DEFINITION

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable

SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

description

DEFINITION

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

DEFINITION

YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

description

DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of

explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

EMPSTAT: Activity status (employment status) [general version]

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Employed
2	Unemployed
3	Inactive
9	Unknown/missing

description

DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified

period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

998	Response suppressed
999	Unknown

description

DEFINITION

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

LABFORCE: Labor force participation**Data file:** GTM1981_PHC-P-H.dat**Overview**

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
1	No, not in the labor force
2	Yes, in the labor force
8	Unknown
9	NIU (not in universe)

description

DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

Migration: Global Variables -- PERSON	IPUMS

OCC: Occupation, unrecoded

Data file: GTM1981_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

concept

CONCEPT

var_concept.title	Vocabulary
Work Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

OCC is a 4-digit numeric variable.

Some samples use fewer than 4 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

description

DEFINITION

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

description

DEFINITION

GEOMIG1_5 indicates the major administrative unit in which the person resided five years prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of residence five years ago, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1_5 match the geographic codes in GEOLEV1 (current place of residence). For similar information for different time intervals since migration, see variables GEOMIG1_P, GEOMIG1_1, and GEOMIG1_10. More on migration and geography can be found [here](#).

description

DEFINITION

GEOMIG1_P indicates the major administrative unit in which the person previously resided prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of previous residence, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1_1 match the geographic codes in GEOLEV1 (current place of residence).

For similar information for different time intervals since migration, see variables GEOMIG1_1, GEOMIG1_5, and GEOMIG1_10. More on migration and geography can be found [here](#).

description

DEFINITION

MIG1_5_GT indicates the person's department of residence five years ago (for the 1973 and 1981 samples), four years ago (for the 1994 sample), or six years ago (for the 2002 sample) within Guatemala.

Click on the Source Variables tab for information on place of residence for each sample year. Source variables may contain

more geographic unit detail but are not suitable for cross-temporal comparison.

description

DEFINITION

MIG2_5_GT indicates the person's municipality of residence, five years ago (for the 1973 and 1981 samples), four years ago (for the 1994 sample), or six years ago (for the 2002 sample) within Guatemala. Migration municipality codes for MIG2_5_GT are compatible with codes for GEO2_GT.

Click on the Source Variables tab for information on place of residence for each sample year. Source variables may contain more geographic unit detail but are not suitable for cross-temporal comparison.

description

DEFINITION

MIG2_P_GT indicates the person's municipality of previous residence within Guatemala. Migration municipality codes for MIG2_P_GT are compatible with codes for GEO2_GT.

Click on the Source Variables tab for information on place of residence for each sample year. Source variables may contain more geographic unit detail but are not suitable for cross-temporal comparison.

This part of the census form is designed to study the composition of the population according to the following characteristics: relationship to the head of household, sex, age, marital status, maternal orphanhood, ethnicity, and disabilities.

Questions 1-8 are presented to all enumerated persons, without exception, following the specific instructions presented below:
</sva r></p>

<p><sva r a="all" v="GT81A404">Question 4: age

1. How to formulate the question

What is your age, in years completed?

The information that should be obtained from each person is the number of years completed at the last birthday, not the age about to be completed by the enumerator.

Taking into account the importance of this information, all of the effort necessary to obtain the age in years completed should be made. If this is not possible, the enumerator should insist in obtaining, at least, approximate information, this way there will always exist information about "age".

2. How to record the data

The enumerator will write, in the space provided:

a) The number of years completed.

b) "00" for those younger than one year of age, including newborns.

3. Example:

[These instructions refer to a graphic of question 4 of the census form]

Questions 1-8 are presented to all enumerated persons, without exception, following the specific instructions presented below:
</sva></p>

<p><sva a="all" v="GT81A405">Question 5: current marital status

1. How to formulate the question

Are you married, living in a consensual union, unmarried, widowed, divorced, or separated?

The following definitions will help the enumerator to correctly classify each person according to their marital status at the date of the census:

[p. 67]

a) Married: Those who have entered into a legal marriage and live with their spouse; that is, they are not widowed, divorced, or separated.

b) In union (consensual union): Those who are not legally married but who live in a consensual or de facto union with another person.

c) Single: Those who have never entered into a legal marriage and do not live in a consensual union.

</p>

d) Divorced or separated from a marriage or consensual union: Those whose marriage has been legally dissolved or those who are separated from their spouse and who have not remarried or entered into another consensual union.
It is not necessary to ask this question to those under 13 years of age; in these cases, "3. single" is marked.
2. How to record the data
The different categories are mutually exclusive, therefore, only the number corresponding to the marital status of the enumerated person is marked.
3. Example:
[These instructions refer to a graphic of question 5 of the census form]

description

INTERVIEWER INSTRUCTIONS

A. First block: personal characteristics (for all persons)
This part of the census form is designed to study the composition of the population according to the following

characteristics: relationship to the head of household, sex, age, marital status, maternal orphanhood, ethnicity, and disabilities. Questions 1-8 are presented to all enumerated persons, without exception, following the specific instructions presented below:

Question 6: maternal orphanhood
1. How to formulate the question
[p. 68] Is your mother alive?
2. How to record the data
If the enumerated person's mother is alive at the time of enumeration, only the number "1. yes" is circled. On the other hand, if the mother has passed away, "2. no" is circled. If the enumerated person's mother is alive and living in the same dwelling being enumerated, the mother's order number in the form is recorded in the space provided.
The category "9. unknown" has been provided to record those cases in which the informant does not know if the mother of the enumerated person is alive or not.

The questions relating to geographical characteristics are designed to study internal and international migration of the population.

It is desired to find out the total number of migrants and the patterns of these movements as well as the principal characteristics of this population.
</svr></p>

<p><svr a="all" v="GT81A416 GT81A417 GT81A418 GT81A450">Question 9: place of birth

1. How to formulate the question

In which municipality and department were you born?

[p. 70]

(If born abroad, the name of the country is recorded and the person is asked: In which year did you come to live permanently in this country?)

2. How to record the data

When the place of birth is the same as the place of usual residence at the time of the Census, the number "1. here" is circled. The spaces for the municipality and department are then left blank.

a. If the enumerated person was born in another municipality, different from the place of usual residence, the enumerator will ask the name of the municipality of birth and the corresponding name of the department, recording the information in the spaces provided.

b. If the enumerated person was born in another country, the enumerator will record the name of the country and the year of arrival in the spaces provided.

3. Example:

INTERVIEWER INSTRUCTIONS

A. First block: personal characteristics (for all persons)
This part of the census form is designed to study the composition of the population according to the following characteristics: relationship to the head of household, sex, age, marital status, maternal orphanhood, ethnicity, and disabilities. Questions 1-8 are presented to all enumerated persons, without exception, following the specific instructions presented below:

Question 8: disability
1. How to formulate the question
Do you have any physical or mental impediment, congenital or by another cause?
The following definition will help the enumerator investigate the question:
Disabled person: The person whose physical or mental well-being is temporarily or permanently disturbed, either from birth or during life because of illness or any type of accident.
2. How to record the data
One or more of the numbers corresponding to categories in the census form are circled.
If the enumerated person does not have a physical or mental disability, number "1. no disability" is circled.
3. Example:

<p><sva r a="all" v="GT81A408">Question 7: ethnic group

1. How to formulate the question

The enumerator should take into account, as a benchmark, the social assessment of the person in the place in which the enumeration is conducted to determine if the enumerated person is indigenous or not.

When enumerating a servant, the informant will be asked if the servant is indigenous or not. If there is doubt or the enumerated person is not a servant, the enumerator will fall back on the last option that will be to ask the person if he or she is ladino or indigenous. The answer given by the person is recorded.

2. How to record the data

If the person is indigenous, number "1" is circled, on the other hand, the number "2" is circled. If the informant cannot establish the ethnic group of the person, the category "9. unknown" is circled.

INTERVIEWER INSTRUCTIONS

<sva r v="GT81A424 GT81A425 GT81A426 GT81A427">C. Third block: educational characteristics (for those 7 years of age and older).

Questions 13 to 15 refer to the enumerated person's literacy and education completed or education being carried out. For this reason, only those persons 7 years of age and older are asked these questions.

The purpose of these questions is to discover the educational level of the population in relation to demographic, economic, and social characteristics.
</sva r></p>

<p><sva r a="all" v="GT81A425">Question 14: educational level

1. How to formulate the question
What was the last grade or year of study that you completed in either primary [elementary], middle, or superior school?

Two pieces of information are required:

a) The highest level of education; and,
b) The last year completed in that level.

The Republic of Guatemala's regular educational system is made up of the following levels of education:
<div class="i1">a) Primary
b) Middle
c) Tertiary</div>

The following definitions will help the enumerator in correctly classifying the population in this characteristic.

Primary education: The educational system providing the first elements of instruction (1st to 6th grades).

Middle education (secondary): A general, specialized, or both, system of education. The minimum prerequisite to enter into secondary education is the completion of elementary education. This level is currently divided into basic and vocational.

[p. 74]

Tertiary education: Education provided by universities and non-university technical schools. The minimum prerequisite to enter tertiary education is the completion of secondary education.

2. How to record the data

If the person has not completed any grade, the number "00. none" is circled.

The spaces that appear before the different levels of education, "1. Primary", "2.

Middle," and "3. tertiary", are provided so that the last grade or year completed can be recorded. Finally, number "99. unknown" is provided in case the informant cannot supply the information about the person in question. Example: [These instructions refer to a graphic of question 14 of the census form]

description

DEFINITION

INTERVIEWER INSTRUCTIONS

C. Third block: educational characteristics (for those 7 years of age and older).
Questions 13 to 15 refer to the enumerated person's literacy and education completed or education being carried out. For this reason, only those persons 7 years of age and older are asked these questions.
The purpose of these questions is to discover the educational level of the population in relation

to demographic, economic, and social characteristics.

Question 13: literacy
1. How to formulate the question
Do you know how to read and write?
The following definitions will help the enumerator to investigate this question.
Literate: The person who knows how to read and write a simple paragraph in Spanish or in another language.
[p. 73]
Illiterate: The person who does not know how to either read or write, or who only knows how to read or can only write his or her name (signature).
2. How to record the data
According to the answer, the number "1. yes" or "2. no" is circled. If an informant does not know if the literacy condition of the person in question, the category "9. Unknown" is circled.
3. Example:

INTERVIEWER INSTRUCTIONS

<svr v="GT81A416 GT81A417 GT81A418 GT81A419 GT81A420 GT81A421 GT81A422 GT81A423 GT81A450 GT81A451

GT81A452">B. Second block: geographical characteristics (for all persons)

The questions relating to geographical characteristics are designed to study internal and international migration of the population.

It is desired to find out the total number of migrants and the patterns of these movements as well as the principal characteristics of this population.
</svar></p>

<p><svar a="all" v="GT81A420 GT81A421 GT81A451">Question 11: place of usual residence in February, 1976

1. How to formulate the question

In which municipality and department or country did you reside at the time of the earthquake of February 1976? (Only for those 5 years of age and older).

2. How to record the data

If the place of usual residence at the time of the earthquake of February, 1976 was the same as the place of usual residence at the time of the Census, the enumerator will circle "1. here", leaving the spaces for municipality and department or country blank.

a. If the enumerated person resided in another municipality, different from the current place of usual residence, the name of the municipality of birth and the corresponding name of the department is requested and recorded in the spaces provided.

b. If the enumerated person was born in another country, the name of the country and the year of arrival are recorded in the spaces provided.

3. Example:

[These instructions refer to a graphic of question 11 of the census form]
</svar>

description

DEFINITION

This variable indicates the person' municipality or country of habitual residence in February of 1976 (earthquake).

INTERVIEWER INSTRUCTIONS

D. Fourth block: economic characteristics (for those 10 years of age and older).
Questions 16 through 20 are only presented to those 10 years of age and older.

Question 16: type of activity
1. How to formulate the question
What were you doing during the week prior to the Census; that is March 16-22, 1981?
Immediately the different alternatives are read, one by one, so that the informant can exactly determine which of the answers translates to the situation of the enumerated person during the week prior to the Census.
The following definitions will allow the enumerator to carry out the work and mark the corresponding alternative.
1. Did you work? A person is considered to work if he or she carried out a remunerated job, for the time equivalent to one day of work, during the week of March 16-22.
For the purposes of the census, work is considered to be:
a. Work for another person as an employee or laborer (salaried), that includes:
i) Daily or regular wage work.
ii) Work for in-kind payment (food, shelter, or supplies received in place of cash payment).
iii) Work paid by the piece, commissions, or tips.
iv) Active service in the Armed Forces.
b. Work in [the person's] own business, professional practice, or as an independent worker (on own account).
c. Unpaid work, in a business or farm run by a relative (e.g. a son who works, unpaid, in his father's store), for more than 15 hours per week.
d. Part-time job carried out during the week for compensation in money.
This includes sewing jobs and other jobs

carried out in the home for other persons or companies for which monetary or in-kind payment is received. This also includes the preparation of food, candy, etc. for sale. Thousands of housewives, students, and elderly persons, who apparently are not working, carry out activities that provided them with monetary income; this should be considered to be "work".

For the purposes of the census, the following is not considered to be work:

- Tasks carried out in the home, such as household duties (except for servants with or without pay), odd jobs for other family members that is not compensated monetarily, and jobs carried out in the person's own home (cutting the grass, painting walls, etc.).
- Unpaid volunteer work for the Church, the Red Cross, or other welfare organizations.
- Work carried out by those who are imprisoned in institutions of involuntary confinement (prisons, sanatoriums, asylums, penal farms).
- Did not work, but employed? This refers to those who did not work during the week of March 16-22 but who have employment or a business and were absent or did not carry out the work because of illness, inclement weather, vacation, etc.
- Looked for work but previously employed? This refers to those who did not have a job during the week of March 16-22, having left or been fired from a job; they are waiting for the previous employer to call again or they are looking for a new job.
- Looked for work for the first time? This refers to those who have never been employed and who were making an effort to find work or employment during the week of March 16-22.
- Lived from rents or retirement? This refers to those who did not carry out any remunerated activity during the week of March 16-22, but who received a retirement payment, pension payment, or pension for their previous service or for the previous service of a relative. Included in this category are those who, without carrying out any remunerated activity, receive income from rents or from another source.
- Studied? This refers to those who were attending school, high school, or university during week of March 16-22. They are only counted in this category if they did not carry out any work during this same period of time.
- Domestic duties? This refers to those who did not carry out any remunerated activity during the most part of the week of March 16-22 because they were exclusively dedicated to domestic duties.
- Other? This refers to those who cannot be classified in the previous categories; such as those imprisoned in institutions of involuntary confinement (presidios, hospitals, etc.).
- Unknown: This refers to those for whom the activity is unknown.

2. How to record the data

The problem of this question is the adequate selection of the type of activity carried out by each person 10 years old or older.

The following recommendations will allow the enumerator to carry out the work more efficiently:

- An answer should not be recorded unless the enumerator is absolutely sure that the person has correctly understood the question and that the answer is coherent with the pertinent definitions.
- A person cannot be classified in more than one category, even if the informant gives double information (worked and studied, worked and received income from rents or retirement, takes care of the house and works, takes care of the house and studies, etc.). The primary criteria for selecting the type of activity is to give preference to the participation in a remunerated economic activity and, secondly, to the activity of studying over that of domestic duties.
- Once the answer is selected, the corresponding number is circled.
- Category "9. unknown" is used only for those cases where the informant cannot answer the questions because he or she does not know what the enumerated person's activity is. This is reserved for those household members who cannot be classified in any of the previous categories.

3. Example:

</sva r></p>

<p><sva r a="all" v="GT81A429">Question 17: principal occupation

This question is only presented to those who were classified in alternatives 1, 2, or 3 in question 16.

1. How to formulate the question

What principal occupation, type of work, or trade did you carry out during the reference week (March 16-22) or in the last job that you had?

Principal occupation is understood to be the occupation that provides the highest income or that which takes most of the enumerated person's time.

2. How to record the data

The principal occupation is written down in the space provided.

A word or phrase that exactly describes the type of work that the enumerated person carries, or carried out should be used. Generic terms that do not give a clear idea of the type of work (e.g. worker, employee, office worker, or other similar descriptions) should be avoided.

To illustrate this further, the following examples are provided:
[The original document includes a table below.]

[Column headings:]
(A) Incorrect answer for principal occupation
(B) Correct answer for principal occupation

Incorrect answer for principal occupation: agricultural worker
Correct answer for principal occupation: cowboy; milker; coffee picker.

[p. 80]

Incorrect answer for principal occupation: mechanic
Correct answer for principal occupation: auto mechanic; technician who makes dental parts; airplane mechanic.

Incorrect answer for principal occupation: office worker
Correct answer for principal occupation: typist, secretary; bookkeeper; file clerk.
Incorrect answer for principal occupation: construction worker
Correct answer for principal occupation: mason; plumber; carpenter; house painter.

Incorrect answer for principal occupation: engineer
Correct answer for principal occupation: civil engineer, sanitary engineer, mechanical engineer, chemist engineer.

Incorrect answer for principal occupation: specialist
Correct answer for principal occupation: agronomist, accountant, specialist in marketing, industrial expert, specialist in agriculture.

[p. 81]

Incorrect answer for principal occupation: technician
Correct answer for principal occupation: agricultural technician, biological and agronomical technician, technician in construction costs, technician in electronics.

Incorrect answer for principal occupation: draftsman
Correct answer for principal occupation: general draftsman, draftsman in civil engineering, drawer of publications, illustrator.

Incorrect answer for principal occupation: teacher
Correct answer for principal occupation: primary school teacher; rural teacher.

Incorrect answer for principal occupation: director
Correct answer for principal occupation: primary school director, secondary-school director, director of institutes.

Incorrect answer for principal occupation: professor
Correct answer for principal occupation: college professor, physical education instructor, language teacher, home education teacher, teacher for blind persons, professor of Neurological Units Institutes.

[p. 82]

Incorrect answer for principal occupation: professional
Correct answer for principal occupation: geologist, sociologist, anthropologist, economist, statistician, doctor and surgeon, accountant and public auditor.

Incorrect answer for principal occupation: analyst
Correct answer for principal occupation: analyst in marketing, systems analyst, professions analyst.

Incorrect answer for principal occupation: public employee
Correct answer for principal occupation: president of organizations (executive, legislative, and judicial), vice president of organizations (executive, legislative and judicial), minister of State, vice minister, comptroller of accounts, municipal secretary, executive director, diplomatic, ambassador, customs worker, official.

[p. 83]

Incorrect answer for principal occupation: manager
Correct answer for principal occupation: wholesale trade manager and administrator; manager and administrator of retail trade of food products; retail trade manager and administrator; manager and administrator of retail trade of clothing and footwear; manager and administrator of retail trade of vehicles, engines, and accessories; manager of manufacturing enterprise; manager of construction enterprise; financial manager; sales manager; administrative manager.

Incorrect answer for principal occupation: administrator
Correct answer for principal occupation: manufacturing company administrator, construction company administrator, Montepío administrator, hotel manager, mining administrator.

Incorrect answer for principal occupation: operator
Correct answer for principal occupation: operator of accountant machines, operator of ribbons and cards drills, radio operator.

[p. 84]

Incorrect answer for principal occupation: agent
Correct answer for principal occupation: air traffic agent, shipping company agent, station agent, tourism agent, broker, insurance agent, advertising sales agent.

Incorrect answer for principal occupation: laborer
Correct answer for principal occupation: agricultural laborer, agricultural laborer of vegetables, agricultural laborer of cotton, milker,

agricultural laborer of sugarcane. Incorrect answer for principal occupation: weaver Correct answer for principal occupation: loom operator; hat maker; hammock maker. Finally, it is necessary to point out that, for professionals, the occupation usually corresponds to the profession. However, some professionals could have carried out occupations outside of their specialty, in which case the occupation carried out is recorded and not the profession. For example, if a medical surgeon acted as the director of a hospital, the principal occupation is recorded: hospital director; if a lawyer worked as the manager of a textile company, the enumerator will write down: textile company manager. If a person carries out various occupations that cannot be limited to one, the principal occupation should be determined according to the instructions given previously. [p. 85]

<p><svr a="all" v="GT81A429">Question 17: principal occupation

This question is only presented to those who were classified in alternatives 1, 2, or 3 in question 16.

1. How to formulate the question

What principal occupation, type of work, or trade did you carry out during the reference week (March 16-22) or in the last job that you had?

Principal occupation is understood to be the occupation that provides the highest income or that which takes most of the enumerated person's time.

2. How to record the data

The principal occupation is written down in the space provided.

A word or phrase that exactly describes the type of work that the enumerated person carries, or carried out should be used. Generic terms that do not give a clear idea of the type of work (e.g. worker, employee, office worker, or other similar descriptions) should be avoided.

To illustrate this further, the following examples are provided:
[The original document includes a table below.]

[Column headings:]
(A) Incorrect answer for principal occupation:
(B) Correct answer for principal occupation:
Incorrect answer for principal occupation: agricultural worker
Correct answer for principal occupation: cowboy; milker; coffee picker.

[p. 80]

Incorrect answer for principal occupation: mechanic
Correct answer for principal occupation: auto mechanic; technician who makes dental parts; airplane mechanic.

Incorrect answer for principal occupation: office worker
Correct answer for principal occupation: typist, secretary; bookkeeper; file clerk.
Incorrect answer for principal occupation: construction worker
Correct answer for principal occupation: mason; plumber; carpenter; house painter.

Incorrect answer for principal occupation: engineer
Correct answer for principal occupation: civil engineer, sanitary engineer, mechanical engineer, chemist engineer.

Incorrect answer for principal occupation: specialist
Correct answer for principal occupation: agronomist, accountant, specialist in marketing, industrial expert, specialist in agriculture.

[p. 81]

Incorrect answer for principal occupation: technician
Correct answer for principal occupation: agricultural technician, biological and agronomical technician, technician in construction costs, technician in electronics.

Incorrect answer for principal occupation: draftsman
Correct answer for principal occupation: general draftsman, draftsman in civil engineering, drawer of publications, illustrator.

Incorrect answer for principal occupation: teacher
Correct answer for principal occupation: primary school teacher; rural teacher.

Incorrect answer for principal occupation: director
Correct answer for principal occupation: primary school director, secondary-school director, director of institutes.

Incorrect answer for principal occupation: professor
Correct answer for principal occupation: college professor, physical education instructor, language teacher, home education teacher, teacher for blind persons, professor of Neurological Units Institutes.

[p. 82]

Incorrect answer for principal occupation: professional
Correct answer for principal occupation: geologist, sociologist, anthropologist, economist, statistician, doctor and surgeon, accountant and public auditor.

Incorrect answer for principal occupation: analyst
Correct answer for principal occupation: analyst in marketing, systems analyst, professions analyst.

Incorrect answer for principal occupation: public employee
Correct answer for principal occupation: president of organizations (executive, legislative, and judicial), vice president of organizations (executive, legislative and judicial), minister of State, vice minister, comptroller of accounts, municipal secretary, executive director, diplomatic, ambassador, customs worker, official.

[p. 83]

Incorrect answer for principal occupation: manager
Correct answer for principal occupation: wholesale trade manager and administrator; manager and administrator of retail trade of food products; retail trade manager and administrator; manager and administrator of retail trade of clothing and footwear; manager and administrator of retail trade of vehicles, engines, and accessories;

manager of manufacturing enterprise; manager of construction enterprise; financial manager; sales manager; administrative manager.
 Incorrect answer for principal occupation: administrator
 Correct answer for principal occupation: manufacturing company administrator, construction company administrator, Montepío administrator, hotel manager, mining administrator.
 Incorrect answer for principal occupation: operator
 Correct answer for principal occupation: operator of accountant machines, operator of ribbons and cards drills, radio operator.
 [p. 84]
 Incorrect answer for principal occupation: agent
 Correct answer for principal occupation: air traffic agent, shipping company agent, station agent, tourism agent, broker, insurance agent, advertising sales agent.
 Incorrect answer for principal occupation: laborer
 Correct answer for principal occupation: agricultural laborer, agricultural laborer of vegetables, agricultural laborer of cotton, milker, agricultural laborer of sugarcane.
 Incorrect answer for principal occupation: weaver
 Correct answer for principal occupation: loom operator; hat maker; hammock maker.
 Finally, it is necessary to point out that, for professionals, the occupation usually corresponds to the profession.
 However, some professionals could have carried out occupations outside of their specialty, in which case the occupation carried out is recorded and not the profession. For example, if a medical surgeon acted as the director of a hospital, the principal occupation is recorded: hospital director; if a lawyer worked as the manager of a textile company, the enumerator will write down: textile company manager.
 If a person carries out various occupations that cannot be limited to one, the principal occupation should be determined according to the instructions given previously.

Questions 16 through 20 are only presented to those 10 years of age and older.
</sva r></p>

<p><sva r v="GT81A429 GT81A430 GT81A431 GT81A432 GT81A433">Note: questions 17-20 are only presented to those who answered 1, 2, or 3 for question 16. For those answering 4-9, an "X" is marked in all of the spaces for questions 17-20.
</sva r></p>

<p><sva r a="all" v="GT81A429">Question 17: principal occupation

This question is only presented to those who were classified in alternatives 1, 2, or 3 in question 16.

1. How to formulate the question

What principal occupation, type of work, or trade did you carry out during the reference week (March 16-22) or in the last job that you had?

Principal occupation is understood to be the occupation that provides the highest income or that which takes most of the enumerated person's time.

2. How to record the data

The principal occupation is written down in the space provided.

A word or phrase that exactly describes the type of work that the enumerated person carries, or carried out should be used. Generic terms that do not give a clear idea of the type of work (e.g. worker, employee, office worker, or other similar descriptions) should be avoided.

To illustrate this further, the following examples are provided:
[The original document includes a table below.]

[Column headings:]
(A) Incorrect answer for principal occupation
(B) Correct answer for principal occupation

Incorrect answer for principal occupation: agricultural worker
Correct answer for principal occupation: cowboy; milker; coffee picker.

[p. 80]

Incorrect answer for principal occupation: mechanic
Correct answer for principal occupation: auto mechanic; technician who makes dental parts; airplane mechanic.

Incorrect answer for principal occupation: office worker
Correct answer for principal occupation: typist, secretary; bookkeeper; file clerk.
Incorrect answer for principal occupation: construction worker
Correct answer for principal occupation: mason; plumber; carpenter; house painter.

Incorrect answer for principal occupation: engineer
Correct answer for principal occupation: civil engineer, sanitary engineer, mechanical engineer, chemist engineer.

Incorrect answer for principal occupation: specialist
Correct answer for principal occupation: agronomist, accountant, specialist in marketing, industrial expert, specialist in agriculture.

[p. 81]

Incorrect answer for principal occupation: technician
Correct answer for principal occupation: agricultural technician, biological and agronomical technician, technician in construction costs, technician in electronics.

Incorrect answer for principal occupation: draftsman
Correct answer for principal occupation: general draftsman, draftsman in civil engineering, drawer of publications, illustrator.

Incorrect answer for principal occupation: teacher
Correct answer for principal

occupation: primary school teacher; rural teacher.

Incorrect answer for principal occupation: director
Correct answer for principal occupation: primary school director, secondary-school director, director of institutes.

Incorrect answer for principal occupation: professor
Correct answer for principal occupation: college professor, physical education instructor, language teacher, home education teacher, teacher for blind persons, professor of Neurological Units Institutes.

[p. 82]

Incorrect answer for principal occupation: professional
Correct answer for principal occupation: geologist, sociologist, anthropologist, economist, statistician, doctor and surgeon, accountant and public auditor.

Incorrect answer for principal occupation: analyst
Correct answer for principal occupation: analyst in marketing, systems analyst, professions analyst.

Incorrect answer for principal occupation: public employee
Correct answer for principal occupation: president of organizations (executive, legislative, and judicial), vice president of organizations (executive, legislative and judicial), minister of State, vice minister, comptroller of accounts, municipal secretary, executive director, diplomatic, ambassador, customs worker, official.

[p. 83]

Incorrect answer for principal occupation: manager
Correct answer for principal occupation: wholesale trade manager and administrator; manager and administrator of retail trade of food products; retail trade manager and administrator; manager and administrator of retail trade of clothing and footwear; manager and administrator of retail trade of vehicles, engines, and accessories; manager of manufacturing enterprise; manager of construction enterprise; financial manager; sales manager; administrative manager.

Incorrect answer for principal occupation: administrator
Correct answer for principal occupation: manufacturing company administrator, construction company administrator, Montepío administrator, hotel manager, mining administrator.

Incorrect answer for principal occupation: operator
Correct answer for principal occupation: operator of accountant machines, operator of ribbons and cards drills, radio operator.

[p. 84]

Incorrect answer for principal occupation: agent
Correct answer for principal occupation: air traffic agent, shipping company agent, station agent, tourism agent, broker, insurance agent, advertising sales agent.

Incorrect answer for principal occupation: laborer
Correct answer for principal occupation: agricultural laborer, agricultural laborer of vegetables, agricultural laborer of cotton, milker, agricultural laborer of sugarcane.

Incorrect answer for principal occupation: weaver
Correct answer for principal occupation: loom operator; hat maker; hammock maker.

Finally, it is necessary to point out that, for professionals, the occupation usually corresponds to the profession.

However, some professionals could have carried out occupations outside of their specialty, in which case the occupation carried out is recorded and not the profession. For example, if a medical surgeon acted as the director of a hospital, the principal occupation is recorded: hospital director; if a lawyer worked as the manager of a textile company, the enumerator will write down: textile company manager.

If a person carries out various occupations that cannot be limited to one, the principal occupation should be determined according to the instructions given previously.

[p. 85]

INTERVIEWER INSTRUCTIONS

C. Third block: educational characteristics (for those 7 years of age and older).
Questions 13 to 15 refer to the enumerated person's literacy and education completed or education being carried out. For this reason, only those persons 7 years of age and older are asked these questions.
The purpose of these questions is to discover the educational level of the population in relation to demographic, economic, and social characteristics.

Question 15: school attendance
1. How to formulate the question
Do you currently attend an educational establishment; primary, middle, or tertiary?
2. How to record the data
If the informant declares that attends a primary, middle, or superior educational establishment, the number "1. yes" is marked.
On the other hand, number "2. no" is circled.
If the informant does not know if the enumerated person attends a regular educational establishment, number "9. unknown" is marked.
If the enumerated person, between the ages of 7 and 14, does not attend a regular educational establishment, the reasons for not attending are requested and recorded in the spaces provided.

3. Example: [These instructions refer to a graphic of question 15 of the census form]

This question is presented to all women 15 years of age and older, irrespective of their marital status.

1. How to formulate the question

How many children born alive have you had in total?

The following definition should be taken into account:

Child born alive: The child who, after birth, breathes, cries, or moves; whether or not the umbilical cord has been cut, whether or not the child is connected to the placenta.

If any of these vital signs are present, the child is considered to be born alive, even if passing away immediately thereafter.

2. How to record the data

Before recording the information, pertinent questions should be asked until it is certain that no child born alive has been omitted and those children born alive who died shortly after birth or in the first months of life are included. Those children who do not live with the mother and reside in another place as well as newborns should also be included.

[p. 89]

The number of children born alive, by sex, is recorded after the corresponding word: "total", "males," "females." If the enumerated woman has not had any children born alive, the word "00. none" is marked.

When the informant does not know if the enumerated person has had children born alive, the category "99. unknown" is marked.

</sva></p>

<p><sva a="all" v="GT81A433">Question 20: occupational category

1. How to formulate the question

What was your employment status in the principal occupation indicated in question

17?

The list of different alternative answers is slowly read, one by one, until the enumerated person is classified into one of them.

The following definitions will help orient the enumerated person.

a. Employer: This refers to those who have one or more salaried persons in their charge carrying out an economic activity; that is, workers who receive monetary or in-kind remuneration. One who has no employees is not an employer.

[p. 87]

b. Own account: This refers to those who work independently, who do not have remunerated employees and are not employees of anyone else. An own-account worker can count on the help of family workers and can work alone or as an associate.

c. Public sector employee: This refers to employees who receive a salary or wage from any state agency, either from the central government or from semi-autonomous or a decentralized entity (municipality, Institute of Social Security, Universidad de San Carlos, ministries, etc.).

d. Private sector paid employee: This refers to employees who receive a wage or salary from a company whose capital is private (Factories, Stores, Private Farms, etc.).

e. Unpaid family worker: This refers to those who carry out an unpaid occupation in an establishment operated by a relative, working at least 15 hours per week. Excluded from this category are those who carry out domestic duties or occasional tasks in the establishment.

</2. How to record the data

The number corresponding to the answer is circled. "9. Not known" is circled only when the informant does not know the employment status of the household member.

3. Example:

[These instructions refer to a graphic of question 20 of the census form]
</svar>

description

DEFINITION

This variable indicates the status of an economically active person concerning his or her employment.

INTERVIEWER INSTRUCTIONS

<sva r v="GT81A434 GT81A435 GT81A436 GT81A437 GT81A438 GT81A439 GT81A440 GT81A441 GT81A442 GT81A443">E. Fifth block: fertility and mortality characteristics (for all women 15 years of age and older)

Questions 21-24 are designed to obtain information to allow estimations of levels and trends in fertility, mortality, and population growth.

The adequate investigation of this question requires that the enumerator be delicate and extremely diligent in the request for information. Questions 21-24 should be presented to all women 15 years of age and older, irrespective of their marital status. If possible, these questions should be presented directly to each woman. Women sometimes forget to declare children born alive who have passed away, children who are alive but living in another place of residence, and also newborns. This should be kept in mind to avoid omissions.

It has been verified that certain enumerators suppose that unmarried women do not have children and therefore do not present the pertinent questions to them. This is inadequate and leads to the collection of poor quality data.
</sva r></p>

<p><sva r a="all" v="GT81A440 GT81A441 GT81A442">Question 23: date of birth of last child

This question is presented to all women 15 years of age and older, irrespective of their marital status.

1. How to formulate the question

On what date was your last child born, even if passed away thereafter?

2. How to record the data

The day, month, and year of birth of the last child born alive is recorded in the spaces provided.

If the informant does not know the date of birth of the last child born alive, the enumerator should do everything possible to find out at least the month and year of birth or, as a last resort, the year of birth. When the date of birth is unknown, the category "99. unknown" is marked.

If the enumerated woman has not had any children born alive, the number "0. has not had children" is marked.

Questions and instructions

LITERAL QUESTION

II. Characteristics of the place of habitation

1. Dwelling type

1 Regular house (formal) 2 Apartment 3 Room in a tenement (palomar) 4 Shack or other rustic housing (rancho) 5 Improvised house (covacha, barraca) 6 Other type 7 Collective: (Specify: hotel, house with more than 5 guests, hospital, barracks, prison, etc.) _____ Name of the establishment _____

CATEGORIES

Value	Category
1	Formal house
2	Apartment
3	Room
4	Poor rural dwelling
5	Improvised dwelling
6	Other type
7	Collective

INTERVIEWER INSTRUCTIONS

II. Dwelling characteristics

As mentioned previously, questions 1 through 9 of this section should be investigated for each one of the "dwellings". The specific instructions that follow will allow the enumerator to complete the work more efficiently.

Question 1: type

1. How to investigate this question

The following definitions should be considered in investigating this theme:

a) Regular house (formal): This is defined as a room or group of rooms that because of the way in which was constructed, reconstructed, adapted, or arranged, is meant to be the shelter for a household. This is the case only if it is not completely used for other purposes at the time of the census. A house is characterized by the fact that its construction is surrounded by dividing walls, partitions, fences, gardens, or land that separates one house from another (Figure 1). This also corresponds to those dwellings with a roof for only one or two contiguous houses, with water service, lighting, and toilet facilities for the exclusive use of that dwelling (Figure 2).

Note: Even though this type of dwelling is generally meant to be the place of abode for one household, two or more

households may be residing therein at the time of the census. If this is the case, one census form is used for each household.

b) **Apartment:** This is defined as a room or group of rooms that because of the way in which was constructed, adapted, or arranged, is meant to be the shelter for a household. This is the case only if it is not completely used for other purposes at the time of the census. It is characterized by the fact that it is part of a building with one or more floors or levels and is separated from the other apartments by walls that extend from the floor to the upper level or to the roof of the dwelling.

[Figures 1 and 2 are omitted]

[p. 29]

An apartment is generally equipped with indispensable services such as water, lighting, and toilet facilities for exclusive use. As in the previous case, an apartment is generally a site built to house one household; however, it may be occupied by two or more households at the time of enumeration. If this is the case, one census form should be used for each household.

[Figures 3 is omitted]

[p. 30]

c) **Room in a tenement:** This is defined as a space situated in a dwelling; constructed, adapted, or arranged to provide shelter for as many households as there are rooms in the building. Each room is characterized by a direct entrance from a hallway, corridor, or patio, etc. These dwellings generally are not equipped with exclusive water service, toilet facilities, or bathrooms.

A household can occupy one or more of these rooms, in which case these rooms are considered to be one dwelling.

It can also be the case that two or more households occupy one room, in which case it is necessary to use two census forms for the same dwelling.

[Figures 4 is omitted]

[p. 31]

d) **Rustic cabin or hut:** This is defined as a dwelling with one or more rooms that has been constructed of natural or local materials. The walls are made of cane and mud (*bajareque*), mud, straw, *lepa*, sticks, or cane. The roof is made of straw, palm, or of similar materials. It is meant to be the place of abode for one household. This is the case only if it is not completely used for other purposes at the time of the census. It is also possible that two or more households live in a "rancho". If this is the case, one census form should be used for each household.

[Figures 5 is omitted]

[p. 32]

e) **Improvised dwelling:** This is defined as an independent, provisional, structure constructed with waste materials without a preconceived plan to function as a place of abode for a household. Two or more households can also occupy this type of unit. If this is the case, one census form should be used for each household.

[Figures 6 is omitted]

[p. 33]

f) **Other type:** This category includes the following dwellings: i) mobile units; that is, those places of abode constructed to be transported (e.g. tents, boats, ships, etc.); ii) Permanent structures not meant for human habitation such as granaries, garages, stalls, warehouses, etc.; iii) Other buildings not meant for human habitation, such as natural refuges, caves, etc.

These types are considered to be dwellings only if they are inhabited at the time of enumeration. As in previous cases, the same number of forms as the number of households in each dwelling is used.

2. How to record the data

Once the dwelling has been classified into one of the previous categories according to the respective definitions, the number of the corresponding category is circled.

If dealing with collective dwellings, according to the definition given in the attached instructions for this type of dwelling, the type is specified (e.g. hotel, hospital, barracks, etc.) and the name of the establishment is recorded. The enumerator will then skip directly to section VII, "persons in the household", to proceed to enumerate each person living in the collective dwelling.

(See Example on the following page)

description

DEFINITION

This variable indicates the type of dwelling.

<sva r v="GT81A434 GT81A435 GT81A436 GT81A437 GT81A438 GT81A439 GT81A440 GT81A441 GT81A442 GT81A443">E. Fifth block: fertility and mortality characteristics (for all women 15 years of age and older)

Questions 21-24 are designed to obtain information to allow estimations of levels and trends in fertility, mortality, and population growth.

The adequate investigation of this question requires that the enumerator be delicate and extremely diligent in the request for information. Questions 21-24 should be presented to all women 15 years of age and older, irrespective of their marital status. If possible, these questions should be presented directly to each woman. Women sometimes forget to declare children born alive who have passed away, children who are alive but living in another place of residence, and also newborns. This should be kept in mind to avoid omissions.

It has been verified that certain enumerators suppose that unmarried women do not have children and therefore do not present the pertinent questions to them. This is inadequate and leads to the collection of poor quality data.
</sva r></p>

<p><sva r a="all" v="GT81A443">Question 24: survival of last child

1. How to formulate the question

Is your last child born alive still alive?

2. How to record the data

If the last child born alive is still alive, the number "1. yes" is marked.

If the last child born alive has passed away, the number "2. no" is marked. If the informant does not know if the last child born alive of the enumerated woman is still alive, the number "9. unknown" is marked. If the enumerated woman has not had any children born alive, the number "0. has not had children" is marked.

The enumerator should then proceed to request the information of the next resident of the investigated household.

3. Example:

[These instructions refer to a graphic of question 24 of the census form]

F. Sixth block: question of the last column of the census form: seasonal agricultural employment.

The question appearing in the last column of the census form, after the ninth person, is presented to the informant after recording all of the information of each of the household members.

1. How to formulate the question

Did anyone in this household go to another municipality to carry out agricultural work as a daily or seasonal laborer during any time of the agricultural year - May 1980 to April 1981?

[p. 92]

2. How to record the data

If the answer is affirmative, the number "1. yes" is marked and then the form FC-03 "seasonal agricultural employment" is filled out according to the instructions given in the following chapter.

If the answer is negative, the number "2. no" is marked and the enumerator will skip to the next household.

3. Example:

INTERVIEWER INSTRUCTIONS

C. Third block: educational characteristics (for those 7 years of age and older).
Questions 13 to 15 refer to the enumerated person's literacy and education completed or education being carried out. For this reason, only those persons 7 years of age and older are asked these questions.
The purpose of these questions is to discover the educational level of the population in relation to demographic, economic, and social characteristics.

Question 14: educational level
1. How to

formulate the question
 What was the last grade or year of study that you completed in either primary [elementary], middle, or superior school?
 Two pieces of information are required:
 a) The highest level of education; and,
 b) The last year completed in that level.
 The Republic of Guatemala's regular educational system is made up of the following levels of education:
 a) Primary
 b) Middle
 c) Tertiary
 The following definitions will help the enumerator in correctly classifying the population in this characteristic.
 Primary education: The educational system providing the first elements of instruction (1st to 6th grades).
 Middle education (secondary): A general, specialized, or both, system of education. The minimum prerequisite to enter into secondary education is the completion of elementary education. This level is currently divided into basic and vocational.
 Tertiary education: Education provided by universities and non-university technical schools. The minimum prerequisite to enter tertiary education is the completion of secondary education.
 2. How to record the data
 If the person has not completed any grade, the number "00. none" is circled.
 The spaces that appear before the different levels of education, "1. Primary", "2. Middle," and "3. tertiary", are provided so that the last grade or year completed can be recorded.
 Finally, number "99. unknown" is provided in case the informant cannot supply the information about the person in question.
 3. Example:
 [These instructions refer to a graphic of question 14 of the census form]
