

1990 Population and Housing Census - IPUMS Subset

Central Statistical Office, IPUMS

report_generated_on: September 3, 2025

visit_data_catalog_at: <http://catalog.ihsn.org/>

Identification

SURVEY ID NUMBER

TTO_1990_PHC_v01_M_v7.5_A_IPUMS

TITLE

1990 Population and Housing Census - IPUMS Subset

ABBREVIATION OR ACRONYM

PHC Trinidad and Tobago 1990 (IPUMS Harmonized Subset)

COUNTRY

Name	Country code
Trinidad and Tobago	TTO

STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

SERIES INFORMATION

DOI:10.18128/D020.V7.5

KIND OF DATA

Population and Housing Census [hh/popcen]

UNIT OF ANALYSIS

Persons, households, and dwellings

UNITS IDENTIFIED:

- Dwellings: yes
- Vacant Units: no
- Households: yes
- Individuals: yes
- Group quarters: yes

UNIT DESCRIPTIONS:

- Dwellings: Any building or separate and independent part of a building in which a person or group of persons are living at the time of the census enumeration.
- Households: Consists of one or more persons living together and sharing at least one of the main daily meals. Members are not necessarily related.
- Group quarters: An institution is defined as living quarters in which the occupants live collectively for disciplinary, health, educational, religious, military, work, or other reasons.

Version

VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

VERSION DATE

2024-10-05

Scope

NOTES

Additional notes on a sample that is part of this study: Trinidad and Tobago 1990

TOPICS

Topic	Vocabulary
Demographic Variables -- PERSON	IPUMS
Dwelling Characteristics Variables -- HOUSEHOLD	IPUMS
Geography: Global Variables -- HOUSEHOLD	IPUMS
Nativity and Birthplace Variables -- PERSON	IPUMS
Work Variables -- PERSON	IPUMS
Technical Household Variables -- HOUSEHOLD	IPUMS
Disability Variables -- PERSON	IPUMS

Work: Industry Variables -- PERSON	IPUMS

Coverage

GEOGRAPHIC UNIT

Region

UNIVERSE

The total population is to be enumerated at the place where found at the time of the census including persons living in private households, persons living in non-private dwellings, vagrants, persons on ships in port at the time of the census,

foreign military, naval and diplomatic personnel and their families located in the country at the time of the census.

Sampling

SAMPLING PROCEDURE

MICRODATA SOURCE: Central Statistical Office

SAMPLE SIZE (person records): 113104.

SAMPLE DESIGN: Systematic sample of every tenth private dwelling drawn by the Minnesota Population Center from 100% microdata

WEIGHTING

Self-weighting (expansion factor=10)

Data collection

DATES OF DATA COLLECTION

Start
1980-04-17

TIME PERIODS

Start date	End date
1990-05-15	1990-05-15

DATA COLLECTION MODE

Face-to-face [f2f]

DATA COLLECTION NOTES

de facto, CENSUS DAY: May 15, 1990

questionnaires

QUESTIONNAIRES

Single questionnaire that contains 49 questions in 10 sections

Access policy

CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration

variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.
 --Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)
 --Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

New samples for:

Bolivia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available [here](#).

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available [here](#).

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A_HISCOSE, SE1890A_HISCRELSE, SE1890A_HISCSTATSE,

SE1890A_OCCMULTISE, SE1900A_HISCOSE, SE1900A_HISCRELSE, SE1900A_HISCSTATSE, SE1900A_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1_EG2006 and GEO2_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of

residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1_5_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2_BR1970 in Brazil 1970 were corrected.

Value	Category
00	Vacant
10	Households
20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

description

DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

Group Quarters Variables -- HOUSEHOLD	IPUMS

HHWT: Household weight**Data file:** TTO1990_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

PERSONS: Number of person records in the household**Data file:** TTO1990_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

PERSONS is a 4-digit numeric variable.

RECTYPE: Record type

Data file: TTO1990_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 1 Range: - Format: character

Questions and instructions

CATEGORIES

Value	Category
H	Household
P	Person

description

DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

description

DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

SERIAL: Household serial number**Data file:** TTO1990_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 12 Range: - Format: Numeric

description

DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

STRATA: Strata identifier**Data file:** TTO1990_PHC-H-H.dat**Overview**

description

DEFINITION

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

AREAMOLLWGE01: Area of GEOLEV1 unit in square kilometers

Data file: TTO1990_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 10 Range: - Format: Numeric

description

DEFINITION

AREAMOLLWGE01 indicates the area in square kilometers of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

780094	St. Paul, St. Mary, St. David, St. George, St. Patrick, St. Andrew, St. John, Tobago

description

DEFINITION

GEO1_TT identifies the household's regions (that includes boroughs, parish and cities), within Trinidad and Tobago in all sample years. Regions are the first level administrative units of the country. GEO1_TT is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1_TT can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Trinidad and Tobago can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

Data file: TTO1990_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 6 Range: - Format: Numeric

description

DEFINITION

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

concept

description

DEFINITION

This variable indicates whether the land on which the dwelling was located was owned, either in full or in part, by one of the dwelling's residents.

Conceivably, a resident might own land but not the dwelling on which it resides. Such a case would be classified as NIU (not in universe): only dwellings indicating that a resident owned the dwelling were asked about land ownership.

INTERVIEWER INSTRUCTIONS

Section 10 - Housing

Question 34 - Type of building

You are required to tick the particular type of building that is being enumerated. The function or purpose to which the building is put must be recorded and not the architectural style. There are six categories:-
[1] Mainly residential
[2] Residential and commercial
[3] Commercial
[4] Industrial
[5] Community service-private/government
[6] Other
Community service building refers to a building used primarily in the interest of the public and provides a service [e.g. hospital, community center, government building, sports club]. Your supervisor can assist you with any concepts not clear with respect to the above categories.

INTERVIEWER INSTRUCTIONS

Section 10 - Housing

Question 36 - Year when building was built

This question seeks to determine the year when the structure was originally built. In some cases, the owner/occupant of the dwelling may not be able to tell you the year when the structure was built. Diligent enquiries from persons who have been living for a long time in the area may assist you in arriving at an accurate estimate. It is to be noted that the pre-coded time periods permit an approximation. You may also find it useful to enquire from the occupier or owner how long he/she has been living at that address. In the case of buildings which have been re-conditioned or have undergone major structural changes, record the year when the major structural changes were completed. There may be instances where a structure, though not completed, is occupied by a household. In such cases you must record the period or year in which the incomplete structure was occupied for the first time. In these cases, for the purpose of the census, occupancy and not structural completion characterizes a finished building.

7	Other
9	Unknown

INTERVIEWER INSTRUCTIONS

Characteristics of the dwelling unit

Question 37 - Tenancy

Tenure refers to the legal and financial arrangements under which a household is occupying its living quarters and the land on which it stands. The pre-coded categories are as follows: -
 [1] Owned This category applies when the head or any other member of the household owns the dwelling/land, or is in the process of buying the dwelling land.
 [2] Rented-private Included in this concept is the situation where the head of the household or any other member rents the dwelling/land from an individual or a company. Rental, although it may be covered by a contract, conveys the idea of payments being made monthly.
 [3] Rented-government This applies if the head of the household or any other member rents the dwelling/land from government or government agency.
 [4] Leased A lease differs from a rental by an agreed contract which stipulates, in advance, the total rental sum for the dwelling/land during a fixed duration of the contract. This total sum may be paid in advance or by installments.
 [5] Rent-free When the head of the household does not pay a rent for the occupancy of the dwelling/land by the household, a tick should be scored in this box.
 [6] Squatted This applies when households are found occupying a building or dwelling unit/land without permission of the owner or any legal rights to property.
 [7] Other This description refers to situations where the head or members of the household are occupying the dwelling/land under conditions different from those specified above.

INTERVIEWER INSTRUCTIONS

Section 10 - Housing

Question 35 - Material of outer walls

The information sought in this question is to identify the type of material of which the outer walls of the building is made. The types of material specified are:-
 -Brick This applies to buildings where the walls are made of hollow clay blocks or concrete bricks whether plastered or unplastered.
 -Concrete, including concrete blocks This includes walls made of both concrete and concrete blocks with steel reinforcements as well as reinforced concrete structures.
 -Wood and concrete This applies when the walls are made of both types of material.
 -Wood and brick This includes walls made of both wood and concrete or hollow clay blocks.
 -Wood Tick this if the walls are made solely of wood.
 -Wattle/adobe/tapia This applies where the walls are some kind of wattle structure i.e. pure wattle walls or wattle dabbed with mud. Walls made of tapia must also be included under this type.
 -Other Tick this box for other types of material of construction of outer walls not previously described.

INTERVIEWER INSTRUCTIONS

Characteristics of the dwelling unit

Question 42[a] - Number of bedrooms

Bedrooms are rooms used exclusively for sleeping. There must be some permanency about the walls enclosing the bedroom. A dwelling unit which uses a room for other activities by day and sleeping by night has "no bedrooms". Makeshift arrangements, blinds etc. do not count as rooms.

Question 42 [b] - Bedrooms available for use or occupied by household

This question seeks to obtain a more accurate measurement of persons per bedroom by relating the actual number of bedrooms occupied or available for use by the major household in cases where the dwelling unit is shared with one or more households. For example, there may be three [3] bedrooms in a dwelling unit to be shared by two households consisting of ten [10] persons altogether. There will be errors in the analysis if each household separately is considered as having three [3] bedrooms available. Hence, question 42[b] is introduced and must be asked where there is double, triple, etc. household occupancy as the case may be. Do not ask question 42[b] if the dwelling unit is occupied by only one [1] household.

description

INTERVIEWER INSTRUCTIONS

Characteristics of the dwelling unit

Question 38 - Type of dwelling

The information to be recorded in this question must relate to the building or part of the building used for residential accommodation by private households. There is also a pictorial chart which will further assist you in classifying dwelling units. The pre-coded categories are as follows:-

[01] Separate house
Defines a dwelling unit which takes up the complete building; it may be inhabited by one or more households.

[02] Flats/apartments
Flats are self-contained private dwellings in a single or multi-storied building. Apartments should be ticked where the household occupied part of the building but has separate and direct access to and from the street or from a public or communal staircase, passage, or gallery, etc.

[03] Town house/wafda
A block of self-contained units with separate legal title to ownership. Sometimes common facilities such as security and grounds may be shared.

[04] Double house/duplex
A dwelling joined to only one other dwelling, separated from it by a wall extending from ground to roof, i.e. one or two dwellings attached side by side, having no other dwellings either above or below and separated by open space from all other structures.

[05] Part of commercial/industrial building
This type of dwelling would be ticked when the household occupies part of the building for living purposes while other parts of the building are used as business places, lodges, garages, etc.

[06] Barracks
A room or division of a long building containing several independent or dependent private dwellings, with or without shared facilities.

[07] Outroom
A room or rooms separated from the main building and occupied by a separate household i.e. servant's quarters, etc.

[08] Other private dwelling
Mobile homes, derelict vehicles, etc. In short, a dwelling in conditions different from those specified above.

[09] Group dwellings
These have already been defined and refer to certain types of institutions i.e. boarding houses, hotels, hostels.

[10] Other
A category which describes a type of accommodation not defined from [01] to [09].

INTERVIEWER INSTRUCTIONS

Characteristics of the dwelling unit

Question 37 - Tenancy

Tenure refers to the legal and financial arrangements under which a household is occupying its living quarters and the land on which it stands. The pre-coded categories are as follows: [1] Owned This category applies when the head or any other member of the household owns the dwelling/land, or is in the process of buying the dwelling land. [2] Rented-private Included in this concept is the situation where the head of the household or any other member rents the dwelling/land from an individual or a company. Rental, although it may be covered by a contract, conveys the idea of payments being made monthly. [3] Rented-government This applies if the head of the household or any other member rents the dwelling/land from government or government agency. [4] Leased A lease differs from a rental by an agreed contract which stipulates, in advance, the total rental sum for the dwelling/land during a fixed duration of the contract. This total sum may be paid in advance or by installments. [5] Rent-free When the head of the household does not pay a rent for the occupancy of the dwelling/land by the household, a tick should be scored in this box. [6] Squatted This applies when households are found occupying a building or dwelling unit/land without permission of the owner or any legal rights to property. [7] Other This description refers to situations where the head or members of the household are occupying the dwelling/land under conditions different from those specified above.

Characteristics of the dwelling unit

Question 43 - Number of rooms

A room is defined as an area permanently separated, by means of walls, from other parts of the building; but excludes galleries, bathrooms, toilets, pantries, corridors, kitchens. You are required to tick the pre-coded number of rooms occupied or available for use by the household for living purposes. Include as rooms, living rooms, bedrooms, dining rooms, sewing rooms, libraries, servant rooms [attached or detached] from the main building. If you find a room with a portion curtained off with a temporary partition, the whole area must be counted as one room. If, however, there is a permanent partition dividing the floor area, you must count this as two rooms. Curtains or blinds do not separate rooms, walls and permanent partitions do. Tick the appropriate pre-coded box on the questionnaire.

INTERVIEWER INSTRUCTIONS

Characteristics of the dwelling unit

Question 40 - Water supply

The information recorded here should indicate how the household obtains its water supply, whether it is piped water within the dwelling unit, piped water outside the dwelling unit or any other specific source. You should note that the primary source of supply is not being sought in this question. [1] Public piped into dwelling Describes a condition where running water from a public source is piped directly into the dwelling unit. It is to be noted that in cases where both truck-borne supplies and intermittent supplies from a public reservoir are used, public piped takes precedence over truck-borne. [2] Public piped into yard Applies in situations where the household receives running water from a public source through a pipe in the yard or compound on which the dwelling stands. [3] Private piped into dwelling Refers to the water supply received by a household from a private source and piped into the dwelling. Such situations will occur, for example, where the household pumps water from a river or pond through pipes directly to the dwelling. [4] Private catchment not piped Obtains where the water supply to the household is from a private source and not piped into the dwelling. [5] Public stand pipe Obtains when water is available to the household from a stand pipe in the street or elsewhere. [6] Truck-borne [and not piped into dwelling] This applies in a limited sense to a truck-borne water supply where the sole source of water to the household is truck borne. The water supply by truck must be from a public source. For example, the household stores its water in drums or barrels which are filled by a truck borne supply. It is to be noted, again, that in cases of intermittent supplies from a public source, public piped takes precedence over truck-borne, especially where pipes are already laid from the mains to the house. [7] Spring/river This applies when the main water supply available to the dwelling is from a spring or river. [8] Other Obtains when the dwelling receives its water supply from a source not specified e.g. well, pond, etc. and there is no pipe borne supply.

INTERVIEWER INSTRUCTIONS

Part III Some basic concepts and definitions

Private dwelling

Private type dwellings are those in which private households reside. Examples are single houses, flats, apartments, outrooms, part of commercial buildings, boarding houses catering for less than six persons etc.

Vacant dwelling unit

If the house is habitable, but no one lives there during your preliminary enumeration, you must also visit the house on the day after census day, so that you can enumerate anyone who may have moved in subsequent to your previous visit.

description

DEFINITION

This variable indicates whether the record is a private household or an institution.

LITERAL QUESTION

Section 10. a. International migration

In this section we wish to know how many persons have left the country to live abroad since the last Census.

[Questions 46 - 49 were asked of the households that had members who left to live abroad during the last ten years, per question 45]

49. How many of those leaving have since returned to live here permanently? ____

INTERVIEWER INSTRUCTIONS

Part IV How to complete the visitation record

As the name implies the visitation record, is designed to monitor your field visits during preliminary enumeration. The visitation record is also used primarily to construct a register [frame] of all households, business places and institutions in Trinidad and Tobago. This register is used extensively for the conduct of household, business and agriculture surveys during the intercensal years. It is therefore vital for this document to be completed accurately.

On the cover page of your visitation record you are required to fill out the identifying number, country, ward and enumeration district number as well as your own name and address before the start of enumeration. The rest of the information on the cover page is to be filled out on completion of enumeration. For example, the number of buildings, dwelling units, households, population etc. must be entered.

The visitation record consists of eighteen [18] numbered columns, each of which is intended to serve a specific purpose.

Column 10 - Number of persons - Female

The number of female members must be recorded in this column. In every instance, once this column is completed correctly, the addition of columns 9 and 10 must equal the total shown in column 8.

Note that female inmates of institutions are to be treated similarly to the male members. Any inmate of less than six months should be recorded as a member of the household. If blank put a dash [-].

INTERVIEWER INSTRUCTIONS

Part IV How to complete the visitation record

As the name implies the visitation record, is designed to monitor your field visits during preliminary enumeration. The visitation record is also used primarily to construct a register [frame] of all households, business places and institutions in Trinidad and Tobago. This register is used extensively for the conduct of household, business and agriculture surveys during the intercensal years. It is therefore vital for this document to be completed accurately.

On the cover page of your visitation record you are required to fill out the identifying number, country, ward and enumeration district number as well as your own name and address before the start of enumeration. The rest of the information on the cover page is to be filled out on completion of enumeration. For example, the number of buildings, dwelling units, households, population etc. must be entered.

The visitation record consists of eighteen [18] numbered columns, each of which is intended to serve a specific purpose.

Column 9 - Number of persons - Male

Enter the male members of the household, including male visitors who are expected to stay for at least one month and persons temporarily away, or in institutions but who are likely to return on or before census night. In brief, you will wish to record all persons, visitors included, who are likely to be members of the household on census night, i.e. midnight of 15th May, 1990.

Persons who are currently inmates of institutions, such as hospitals, nursing homes, prisons, etc. are recorded as members of the household if by census night, they would have been inmates for less than six months. If blank put a dash [-].

PERNUM: Person number

Data file: TTO1990_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

concept

CONCEPT

Imputation and derivation

DERIVATION

PERNUM is a 4-digit numeric variable.

PERWT: Person weight

Data file: TTO1990_PHC-P-H.dat

Overview

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

EDATTAIN: Educational attainment, international recode [general version]

Data file: TTO1990_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Less than primary completed
2	Primary completed
3	Secondary completed
4	University completed
9	Unknown

description

DEFINITION

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

EMPSTAT: Activity status (employment status) [general version]

Data file: TTO1990_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Employed
2	Unemployed
3	Inactive
9	Unknown/missing

description

DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

description

DEFINITION

YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

CLASSWK: Status in employment (class of worker) [general version]**Data file:** TTO1990_PHC-P-H.dat**Overview**

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Self-employed
2	Wage/salary worker
3	Unpaid worker
4	Other
9	Unknown/missing

description

DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

Imputation and derivation

DERIVATION

IND is a 5-digit numeric variable.

Some samples use fewer than 5 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

description

DEFINITION

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

Questions and instructions

CATEGORIES

Value	Category
1	No, not in the labor force
2	Yes, in the labor force
8	Unknown
9	NIU (not in universe)

description

DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

Work Variables -- PERSON	IPUMS

OCC: Occupation, unrecoded**Data file:** TTO1990_PHC-P-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

Work Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

OCC is a 4-digit numeric variable.

Some samples use fewer than 4 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

description

DEFINITION

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

description

DEFINITION

GEOMIG1_1 indicates the major administrative unit in which the person resided one year prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of residence one year ago, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1_1 match the geographic codes in GEOLEV1 (current place of residence).

For similar information for different time intervals since migration, see variables GEOMIG1_P, GEOMIG1_5, and GEOMIG1_10. More on migration and geography can be found [here](#).

description

DEFINITION

GEOMIG1_10 indicates the major administrative unit in which the person resided ten years prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of residence ten year ago, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1_10 match the geographic codes in GEOLEV1 (current place of residence). For similar information for different time intervals since migration, see variables GEOMIG1_P, GEOMIG1_1, and GEOMIG1_5. More on migration and geography can be found [here](#).

description

DEFINITION

GEOMIG1_5 indicates the major administrative unit in which the person resided five years prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of residence five years ago, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1_5 match the geographic codes in GEOLEV1 (current place of residence). For similar information for different time intervals since migration, see variables GEOMIG1_P, GEOMIG1_1, and GEOMIG1_10. More on migration and geography can be found here.

INTERVIEWER INSTRUCTIONS

Section 1 Characteristics

Question 4 - Date of birth/age

You are required to write in the date of birth i.e. the day, month and year of birth for each person in the household. If the date of birth cannot be given, it is necessary to have, at least, a current estimate of the age of the person in completed years since the last birthday or as at 15th May 1990. During the preliminary enumeration it must be ascertained by you whether any member of the household has a birthday between the day you are enumerating the household and census day. You will find it necessary to circle the "person number" e.g. 01, of all persons who will be aged fifteen years between the start of enumeration on 17th April, 1990 and census day 15th May, 1990; i.e. date of birth between the 17th April and 15th May 1975. Young persons of the female sex born between 17th April and 15th May 1976 should be also identified. Such identification will assist you with sections 4, economic activity; 5, highest level of training and 8, income which apply to all persons fifteen years old and over; while section 7, fertility applies to females fourteen years old and over not attending primary or secondary school full time. For persons 99 years old and over, record age and date of birth. Every effort should be made to obtain the date of birth. There may be instances, especially in the case of old people, where respondents do not remember their correct ages. Perhaps reference to some outstanding events, such as World Wars I, 1914-1918 and II, 1939-1945, fires, floods, or hurricanes, may be helpful. By referring to such events and by considering other information available about the individual make every effort to estimate his/her age. Do not leave the question blank. Obtain some estimate from the respondent.

INTERVIEWER INSTRUCTIONS

Section 1 Characteristics

Question 5 - Ethnic group

Since you will be interviewing in general one member of any household, the ethnic group ticked must be the ethnic group to which the respondent says he and other members of the household belong. It is reasonable to classify all children of parents belonging to different ethnic groups as mixed. For example, if a man of African descent is married or living common law with an East Indian woman, their children should be classified as mixed. Accept the respondent's classification. If you think you are being misled make a note in an appropriate part of the questionnaire and inform your supervisor.

INTERVIEWER INSTRUCTIONS

Section 2 Migration

Question 8[a] - Usual residence-all persons

The response positions for this question are laid out in four fields [1] This address [2] Elsewhere in Trinidad and Tobago [3] Abroad [9] Not stated Please note the skip instructions. If the response is 1 i.e. This address, skip to question 9. If 2 i.e. Elsewhere in Trinidad and Tobago, go to question 8[b], as directed on the questionnaire. For persons whose usual residence is abroad, you are to skip to question 9. Use the "Not stated" box to refer to persons who refuse to state their usual residence, before skipping to question 9. Although most persons will have no difficulty in stating their place of usual residence, some confusion is bound to arise in a number of special cases where persons may appear to have more than one [1] usual residence. These cases might include persons who maintain two or more residences, students living in school away from their parental home, members of the armed forces living at a military barracks but still maintaining private living quarters away from the installation and persons who sleep away from their homes during the working week but return home for a few days at the end of the week. To avoid such problems take the place where the individual sleeps most nights of the week as his/her usual residence.

LITERAL QUESTION

Section 4. Economic activity - For all persons 15 years old and over

This section deals with the economic activity of all who are 15 years old and over. It relates to the past week as well as the past 12 months. Questions 16 to 18 apply to those answering from 10 to 30 in Question 15.

Interviewer: Job seekers and persons wanting work must have responses to Questions 16-18

[Questions 16-18 apply to those who had a job during the past week or were looking for job, per question 15]

16. What type of worker status applies to [the respondent]?

Interviewer: For persons who are ticked 20 in question 15, tick 7. For persons who ticking 21 and 30, classify by last status held.

8	Unknown
9	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

Section 4 - Economic activity-questions [15] to [21]
 The main purpose of this section is to determine which individuals have been engaged in economic activity, that is the production of goods and services for sale during the week preceding enumeration and at any time during the past twelve [12] months and, those who were not so engaged. It is essential that the enumerator understands the concept of the term work as given in question [15] and makes use of it in his interviews. Generally, work done outside Trinidad and Tobago is not relevant to the census, but work done under contract on Canadian farms by residents is to be included, as also is work by resident crew on ships and aircraft operating outside of the country. It should be noted that priority is given to work over all other activities. Also, economic activity holds precedence over non-economic.
 Question 16 - Type of worker status

The purpose of this question is to distinguish between persons who worked for others as employees [e.g. Government, Public service and Public enterprise; Non-government workers; Unpaid workers and learners]: those who had their own business or farm and employed others [paid or unpaid]. Obtain the correct information and tick the appropriate box. You are to check your list of the names of Government public enterprises if in doubt, to assist respondents who work for Government but are unsure whether it is the Public service or Public enterprise. For job seekers and similar unemployed persons, you are to record information on job last held. Record persons seeking first job as never worked.
 The type of worker status [in employment] can be defined as follows:

Worked for others, i.e. employee
 An employee is defined as a person who works for a public or private employer and receives remuneration in wages, salary, commission, tips, piece rates or pay in kind. Two [2] types of

employees are identified:

[a] Government-Central and local including statutory boards, Quasi government. -Public enterprises and/or state-owned enterprises, i.e. an enterprise where government holds the controlling interest-51% or more of shares.

[b] Non-government-Private employment

[ii] Employer [has own business/farm with paid help] A person who operates his or her own economic enterprise or engages independently in a profession or trade, and hires one or more paid employees.

[iii] Own account worker [has own business/farm without paid help] A person who operates his or her own economic enterprise or engages independently in a profession or trade, and hires no employees.

[iv] Unpaid worker A person who works in a business or farm which is run for profits, belonging to a relative or persons and who receives no payment in cash, but who benefits from the operation of the business or farm because he is a member of the proprietor's household.

[v] Learner A person who is being taught a trade or a profession without receipt of any remuneration but contributes to the production of economic good and/or services.

INTERVIEWER INSTRUCTIONS

Section 3 - Education

These questions are to be answered for every individual. Whereas it is pointless to put all of these questions in respect of infants and very young and very young children, a response position must still be ticked in question 12[a] for every individual. Please note skip instructions in questions 12[a] and 14[a].

Question 14 [c]-highest examination ever passed

The types of examination referred to here are public examinations administered under the aegis of the Government as distinct from examinations organized within particular schools. Examinations such as Common Entrance [C. E.] and Fourteen plus [14+] are to be excluded. Since it is possible that the individual may have passed more than one of the examinations specified, ensure that you ascertain which examination the individual considers as the highest he/she has passed and tick the appropriate box.

description**DEFINITION**

This variable indicates the highest exam ever passed by the person.

INTERVIEWER INSTRUCTIONS

Section 4 - Economic activity-questions [15] to [21]
 The main purpose of this section is to determine which individuals have been engaged in economic activity, that is the production of goods and services for sale during the week preceding enumeration and at any time during the past twelve [12] months and, those who were not so engaged. It is essential that the enumerator understands the concept of the term work as given in question [15] and makes use of it in his interviews. Generally, work done outside Trinidad and Tobago is not relevant to the census, but work done under contract on Canadian farms by residents is to be included, as also is work by resident crew on ships and aircraft operating outside of the country. It should be noted that priority is given to work over all other activities. Also, economic activity holds precedence over non-economic.

Question [15] - Economic activity during the past week

This question aims at classifying persons according to their economic activity during the week preceding enumeration. It is also intended to distinguish between persons who worked [i.e. were economically active] and those who did not work. The possible responses and definitions are given hereunder.

[10] Had a job, worked

An individual is classified as having worked if he/she was engaged in the production of goods and services for sale, whether the job was temporary or even less than a week. Priority is given to worked/with a job over any other activity. For example, if during the week prior to enumeration the individual worked for two days and looked for work for three days, he is to be classified as worked. Usually working/with a job entails the person receiving a wage, salary or other form of recompense, but trainees and apprentices, whether paid or not, as well as unpaid helpers and family workers on commercial farms and other enterprises are also to be listed as worked. Priority is given to economic activity in the reference week of enumeration beginning with worked/had a job, not working and seeking work over such activities as home duties etc. It is worth repeating for emphasis that temporary employment during the past week, regardless of the nature of the job, for example, LID employee, or ten-day stints, porter, car wash attendant, laborer, street vendor, etc. must be recorded as having a job. Probe eligible respondents for evidence of temporary and ad hoc nature of

employment.</div><p>[11] Had a job, did not work </p>

<div class="i1">This category includes persons who had a job during the past week but did not work because of illness, injury or because of vacation leave or some other form of leave. Also included are persons on temporary lay-off or industrial dispute.</div><p>[20] Persons seeking first job </p>

<div class="i1">Persons seeking first job include those who never worked, but were actively seeking work during the past week. Note, however, you must ensure that the person does not hold a temporary or part-time job since "working" holds priority over "not working".</div><p>[21] Others seeking work </p>

<div class="i1">Include persons previously employed and not currently employed but actively seeking work during the past week.</div><p>[30] Wanted work and available past three [3] months

 </p>

<div class="i1">Persons wanting work and available but not actively seeking work during the past week, but have actively looked for work during the past three-months. These persons must have worked in the past.
Note: Questions [16] to [18] apply to job seekers and persons wanting work as well as persons with jobs. For those on the LID roll [Labor intensive development] and waiting for a call to work classify as wanting work.</div><p>[40]-[45] </p>

<div class="i1">Categories of persons who are not economically active cover persons engaged in home duties, full-time students and those retired or disabled. Persons who fall under categories [40] to [99] i.e. from "student" to "not stated", skip to question [21].
Note: "Did not want to work" refers only to those persons who are eligible for work and definitely state that they did not want work. At no time must this category refer to retired persons, old age pensioners and the disabled. Be sure to double check instances of "home duties" for males so as to ascertain that the right code has been ticked.</div>

INTERVIEWER INSTRUCTIONS

Section 4 - Economic activity-questions [15] to [21] The main purpose of this section is to determine which individuals have been engaged in economic activity, that is the production of goods and services for sale during the week preceding enumeration and at any time during the past twelve [12] months and, those who were not so engaged. It is essential that the enumerator understands the concept of the term work as given in question [15] and makes use of it in his interviews. Generally, work done outside Trinidad and Tobago is not relevant to the census, but work done under contract on Canadian farms by residents is to be included, as also is work by resident crew on ships and aircraft operating outside of the country. It should be noted that priority is given to work over all other activities. Also, economic activity holds precedence over non-economic.

Question 21 - Main activity during the past twelve months

This question aims at classifying persons aged fifteen years and over according to their main activity, that is, what they did most during the twelve-month period preceding enumeration. It is also intended to distinguish between persons who worked [i.e. were economically active] and those who did not work [those who were not economically active]. Categories of persons who were not economically active in this context include persons who had never worked but who were seeking their first job, people engaged in home duties, full-time students and those retired or disabled. The term "did not want work" refers to those persons who were neither students, retired, pensioned, home duties, etc. but clearly did not wish to engage in economic activity. Discrete prompting should be used to elicit a reply. It is to be noted that the term "most" need not be continuous.

INTERVIEWER INSTRUCTIONS

Section 4 - Economic activity-questions [15] to [21]

The main purpose of this section is to determine which individuals have been engaged in economic activity, that is the production of goods and services for sale during the week preceding enumeration and at any time during the past twelve [12] months and, those who were not so engaged. It is essential that the enumerator understands the concept of the term work as given in question [15] and makes use of it in his interviews. Generally, work done outside Trinidad and Tobago is not relevant to the census, but work done under contract on Canadian farms by residents is to be included, as also is work by resident crew on ships and aircraft operating outside of the country. It should be noted that priority is given to work over all other activities. Also, economic activity holds precedence over non-economic.

Question 18 - Industry or type of business

The industry or type of business describes the nature of the kind of economic activity or the establishment in which the economically active person worked during the past week or if unemployed, last worked or applied for work. Obtain the name of the firm. In the case of persons employed by the local or central government, write the office or department in which they worked or were employed, whilst for self-employed persons with no fixed place of work or no business name write 'self' for name of establishment. For domestic servants or other personal service workers who worked as paid employees in private homes write in the space reserved for industry-private home. As in the preceding question, avoid vague descriptions of the type of business. For example, do not merely record the type of business as sugar, but indicate whether it is cane-growing, sugar manufacturing [factory], etc. Similarly, show oil refinery separately from bulk oil distribution. Do not merely record oil.

INTERVIEWER INSTRUCTIONS

Section 4 - Economic activity-questions [15] to [21] The main purpose of this section is to determine which individuals have been engaged in economic activity, that is the production of goods and services for sale during the week preceding enumeration and at any time during the past twelve [12] months and, those who were not so engaged. It is essential that the enumerator understands the concept of the term work as given in question [15] and makes use of it in his interviews. Generally, work done outside Trinidad and Tobago is not relevant to the census, but work done under contract on Canadian farms by residents is to be included, as also is work by resident crew on ships and aircraft operating outside of the country. It should be noted that priority is given to work over all other activities. Also, economic activity holds precedence over non-economic.

Question 17 - Main type of occupation/work

You are required to write the kind of work the person has done during the past week. Where the person has done more than one job during the reference period the question relates to the principal job, this in general, will be the one at which he spent most time. Probe for a description of the main duties performed. Examples of kind of work done are "preparing pay sheets", "filling correspondence", "teaching in primary school", "selling life insurance", etc. Be as specific as possible. The job title refers to the official name given by the employer or appearing in the union agreement to classify the actual work done and is used to determine the person's rate of pay or pay-scale. The job title should be written in as much detail as possible and vague terms must be avoided. Descriptions such as agent, apprentice, attendant, clerk, proprietor, sales man are insufficient-they must be qualified. The following are examples of acceptable designations: House real estate agent, Life insurance agent, Chartered accountant, Departmental store sales clerk, Electrical engineer I, Bus driver, Police sergeant, Secondary school teacher or Teacher II, Maxi taxi driver, Sales manager etc.

INTERVIEWER INSTRUCTIONS

Section 5- Highest level of training

Questions 22[a] to 26 apply to all persons fifteen [15] years old and over

Question 22[a] - Training attainment

You are required to obtain from the respondent whether or not that person has completed, attempted or is now receiving any special training to fit him/her for employment. If the response is "Yes" then go to question 22[b], otherwise skip to question 27. It is important that you be alert to probe situations where a person is recorded as a teacher II in question 17 but fails to recognize that his/her university degree in science or arts is a form of training for purposes of this section. This is considered training despite the fact that the person may not have been trained with a diploma in education. Similar situations may occur in fields such as Economics, Chemistry, Physics, etc. You should be alert to link question 17 and probe.

Note: An individual may need some help in being clear about "training". For the census, "training" is any form of learning how to perform a job, practical or theoretical, whether it is computer programming or laying of blocks, as long as the method of instruction is organized and systematic. There must be some type of formal instruction. There is no time limit to the exposure of students to training. "Training" may consist of a number of stages in a sequence of instructions e.g. "learning to lay bricks", "plastering", etc. eventually leading up to full certification as a qualified mason when all the "stages [modules] in the sequence have been completed". What is meant is that training need not be total or comprehensive. A "modular or step-by-step method" is also being considered here.

Question 22[b] - Highest level of training status

Obtain from the respondent whether or not he/she has completed, is undergoing or has attempted but did not complete any special training.

INTERVIEWER INSTRUCTIONS

Section 5- Highest level of training

Questions 22[a] to 26 apply to all persons fifteen [15] years old and over

Introduction

This section applies to all persons fifteen years old and over. The main purpose is to distinguish between persons who have received, attempted or are now receiving special training to fit them for employment, as opposed to those who have not received any training at all. Students in primary and secondary schools, youth camps, etc. pursuing specialized technical/craft courses as part of their general education should be probed to respond. You should probe especially for the government secondary schools where it is now a regular part of the student's education to obtain training in some craft or trade such as masonry, carpentry, motor mechanics, welding etc. Note: "Training can be practical or theoretical under an instructor to acquire a skill or capability to perform a task to some specified standard."

Question 22[a] - Training attainment

You are required to obtain from the respondent whether or not that person has completed, attempted or is now receiving any special training to fit him/her for employment. If the response is "Yes" then go to question 22[b], otherwise skip to question 27. It is important that you be alert to probe situations where a person is recorded as a teacher II in question 17 but fails to recognize that his/her university degree in science or arts is a form of training for purposes of this section. This is considered training despite the fact that the person may not have been trained with a diploma in education. Similar situations may occur in fields such as Economics, Chemistry, Physics, etc. You should be alert to link question 17 and probe.

Note: An individual may need some help in being clear about "training". 9	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

Section 4 - Economic activity-questions [15] to [21] <div class="i1">The main purpose of this section is to determine which individuals have been engaged in economic activity, that is the production of goods and services for sale during the week preceding enumeration and at any time during the past twelve [12] months and, those who were not so engaged. It is essential that the enumerator understands the concept of the term work as given in question [15] and makes use of it in his interviews. Generally, work done outside Trinidad and Tobago is not relevant to the census, but work done under contract on Canadian farms by residents is to be included, as also is work by resident crew on ships and

aircraft operating outside of the country.
It should be noted that priority is given to work over all other activities. Also, economic activity holds precedence over non-economic.</div><p>Question 20 - Hours worked during the past week for person[s] with jobs coded [10] on question 15 </p>

<div class="i1">You are required to record in this question the actual number of hours worked, including overtime whether paid for or not, during the week preceding enumeration. The term work refers to actual work done and does not as in some previous questions, include paid vacation, or sick leave. For persons working, record the number of hours actually worked, including overtime. Persons operating their own business either as self-employed or employers record the time they actually worked. Note that for persons who are paid by the "day" but work "task", the enumerator should record the hours for which they were paid. Time taken to and from work is not counted unless payment is made for such hours. Finally, as a guide in difficult cases, some estimate should be made for "hours" normally worked per week in the pre-coded categories.</div>

description

DEFINITION

This variable indicates the range of working hours during past week.

UNIVERSE

Trinidad and Tobago 1990: Persons age 15+ who had a job and worked in the past week [discrepancies: none]
