TITLE

1995 National Census. Seventh Census of Population, Third Census of Dwellings. - IPUMS Subset

ABBREVIATION OR ACRONYM

PHC Nicaragua 1995 (IPUMS Harmonized Subset)

COUNTRY

Name	Country code
Nicaragua	NIC

STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

SERIES INFORMATION

DOI:10.18128/D020.V7.5

KIND OF DATA

Population and Housing Census [hh/popcen]

UNIT OF ANALYSIS

Persons, households, and dwellings

UNITS IDENTIFIED:

- Dwellings: yes
- Vacant Units: Yes
- Households: yes
- Individuals: yes
- Group quarters: yes

UNIT DESCRIPTIONS:

- Dwellings: Any independent premises within the total installation that has been equipped to lodge persons and permits them to reside there for many reasons (they are watchpersons or guards of an industry for example).
- Households: Separate and independent premises that are meant to lodge a single person (INDIVIDUAL DWELLING) or a group of persons (one or many HOMES) that can have family ties or not, but that are distinguished because they live together and because they prepare and consume their own food. A dwelling is not considered individual when the home established here has six or more persons considered as "Others non family" (Pensioned, etc.) agreeing with question 1 of the Population Census form.
- Group quarters: Those places, buildings and houses in which the sick, police, prisoners for various crimes, young or children delinquents, workers, students, religious persons, the elderly or other groups that carry out or live together under the same roof. These places, buildings or houses in which groups of persons live without family ties between them, or that is, who being NON FAMILY groups, have been designated by the government, by a private company or other institution, to resolve problems or social necessities like health, discipline, security, social adaptation, work in places far from the family dwelling, old age, being orphaned, poverty, study or religious life, etc.

Version

VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

VERSION DATE

2024-10-05

Scope

NOTES

Additional notes on a sample that is part of this study: Nicaragua 1995

TOPICS

National Institute of Statistics and Censuses

CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

CITATION REQUIREMENTS

DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

New samples for:

Bolivia, Cambodia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available here.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available here.

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and

Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A_HISCOSE, SE1890A_HISCRELSE, SE1890A_HISCSTATSE, SE1890A_OCCMULTISE, SE1900A_HISCOSE, SE1900A_HISCRELSE, SE1900A_HISCSTATSE, SE1900A_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BPLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1_EG2006 and GEO2_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1_5_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2_BR1970 in Brazil 1970 were corrected.

20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

description

DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

998	Unknown
999	NIU (not in universe)

description

DEFINITION

QTYPE identifies the type of group quarters -- collective dwellings -- which are broadly classified into institutional and non-institutional types.

Institutions are a place of residence where people are subject to a common authority or bound by a common objective or personal interest. The definition encompasses correctional facilities, health institutions, retirement homes, orphanages,

shelters (social welfare institutions), military or police establishments, boarding schools, and religious group dwellings.

Non-institutional group quarters comprise refugee and workers' camps (temporary accommodation), hotels, pensions, and all types of boarding or lodging houses. The "floating population" is included as a category within the non-institutional group quarters, when identified by the corresponding sample. This group refers to outdoor sleepers, homeless persons, travelers, and persons in ships, boats, or other mobile dwellings.

A more general classification of households between private and group quarters is available in GQ.

HHWT: Household weight

Data file: NIC1995_PHC-H-H.dat

Overview

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

PERSONS: Number of person records in the household

Data file: NIC1995_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

PERSONS is a 4-digit numeric variable.

RECTYPE: Record type

Data file: NIC1995_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 1 Range: - Format: character

Questions and instructions

CATEGORIES

Value	Category
H	Household
P	Person

description

DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

description

DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

SERIAL: Household serial number

Data file: NIC1995_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 12 Range: - Format: Numeric

description

DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

description

DEFINITION

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a

representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

AREAMOLLWGE01: Area of GEOLEV1 unit in square kilometers

Data file: NIC1995_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 10 Range: - Format: Numeric

description

DEFINITION

AREAMOLLWGE01 indicates the area in square kilometers of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

AREAMOLLWGE02: Area of GEOLEV2 unit in square kilometers

Data file: NIC1995_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 10 Range: - Format: Numeric

description

DEFINITION

AREAMOLLWGE02 indicates the area in square kilometers of the second major administrative unit in which the household was enumerated. The second major administrative unit of the household is identified by the GEOLEV2 variable.

The area of units in GEOLEV2 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

description

DEFINITION

GEO1_NI identifies the household's state within Nicaragua in all sample years. States are the first level administrative units of the country. GEO1_NI is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1_NI can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Nicaragua can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

description

DEFINITION

GEO1_NI1995 identifies the household's department within Nicaragua in 1995. Departments are the first level administrative units of the country. A GIS map (in shapefile format), corresponding to GEO1_NI1995 can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Nicaragua can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level, refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

Geography: F-N Variables -- HOUSEHOLD	IPUMS

GEOLEV1: 1st subnational geographic level, world [consistent boundaries over time]**Data file:** NIC1995_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 6 Range: - Format: Numeric

description

DEFINITION

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

concept

CONCEPT

var_concept.title	Vocabulary
Geography: Global Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

GEOLEV1 is a 6-digit numeric variable.

GEOLEV1 codes and labels can be found here.

Codes, labels, frequencies, and information about boundary changes for each country can be found in the country specific harmonized variable e.g. GEO1_BR.

GEOLEV2: 2nd subnational geographic level, world [consistent boundaries over time]**Data file:** NIC1995_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 9 Range: - Format: Numeric

description

DEFINITION

GEOLEV2 indicates the second major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. Second administrative units in GEOLEV2 have been spatio-temporally harmonized to provide spatially consistent boundaries across samples in each country.

concept

CONCEPT

var_concept.title	Vocabulary
Geography: Global Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

GEOLEV2 is a 9-digit numeric variable.

GEOLEV2 codes and labels can be found here.

Codes, labels, frequencies, and information about boundary changes for each country can be found in the country specific harmonized variable e.g. GEO2_BR.

POPDENSGEO1: Population density of GEOLEV1 unit, in persons per square kilometer

Data file: NIC1995_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 8 Range: - Format: Numeric

description

DEFINITION

POPDENSGEO1 indicates the population density in persons per square kilometer of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

description

DEFINITION

GEO2_NI identifies the household's municipality within Nicaragua in all sample years. Municipalities are the second level administrative units of the country, after departments. GEO2_NG is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO2_NI can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Nicaragua can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

10	Other relative or non-relative household
11	Group quarters
99	Unclassifiable

description

DEFINITION

HHTYPE is a constructed variable that describes the composition of households.

HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

5	5 families
6	6 families
7	7 families
8	8 families
9	9 or more families

description

DEFINITION

NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

INTERVIEWER INSTRUCTIONS

Question 6: Number of rooms
Room: This is a space within the dwelling that is delimited by fixed divisions of any material. You should count as rooms: the living room, the dining room, the bedrooms, the combined living room/dining room, but you should not include in the count: the bathroom, hallway, kitchen, garages, storage room, workshop, etc.
Note the total number of rooms that the dwelling has, and of this total, note the number that are used for sleeping as long as the room does not have another use during the day.

INTERVIEWER INSTRUCTIONS

Concept of dwelling: This is all places delimited by walls and roof where one or more persons habitually reside, which means that they sleep, prepare food, and are protected from the elements. It also means that the persons can enter or leave the dwelling without passing through another dwelling, using direct access from the street or through a corridor. You should be aware that there are dwellings with one front but in the interior there can be other dwellings, which you will have to enumerate separately.

Type of dwelling: You will understand type of dwelling as the form in which each of them is occupied. For the purpose of the census, they are divided into two large groups: private or collective.

Question 1 Private dwelling: This is every dwelling that is occupied by one or more groups of persons or one person, linked or not by family ties. This type of dwelling should be structurally separate and independent. Private dwellings are also classified into the following types:

01. House This is a habitation unit that has a solid construction, made to be inhabited permanently.

02. Country house (quinta) This is a habitation unit that has a solid construction, made to inhabit permanently, and generally built in the outside of the city or in a rural area.

03. Room in a tenement This is a habitation unit in a rooming house that constitutes an independent dwelling. The rooms are located along a common corridor and generally have some common services.

04. Hut or shack This is any habitation built with rustic materials, generally tending to have a roof of palm, straw, etc. of limited durability. These are very common in the rural zones.

05. Improvised dwelling This is a habitation unit built with discarded materials, such as cardboard, pieces of metal, plastic, scraps of all types, etc. This will include dwellings that are semi-destroyed by the earthquake, the war, and those in spontaneous settlements that have these characteristics and are occupied on the date of the census. Also this includes mobile homes such as boats, motor homes, etc.

06. Apartment or flat in a house or building This is a habitation unit located in a building of permanent construction that has an independent entrance through a corridor or stairway with direct access from the street, that permits the inhabitants to enter and leave without passing through spaces occupied by other persons, and that generally have independent services.

07. Premise used as dwelling: (warehouse, garages, etc.) This is a commercial space or construction that was not originally destined to be inhabited by persons, but that is occupied for this purpose on the date of the census. This could be a warehouse, workshop, store, abandoned railroad cars or buses, etc.

Collective dwelling: This is a habitation or building where a group of persons reside without family ties among them and who share the habitation for reasons of housing, health, studies, religion, old age, orphans, etc.

Among the collective dwellings we include:

08. Hotels, hostels and guest houses

09. Jails and juvenile detention centers

10. Hospitals and sanitariums

11. Asylums and orphanages

12. Convents and boarding schools

13. Other type of collective dwelling

Observations:

a) The dwellings that house five or fewer guests or renters as habitual residents, for the purpose of the census, should be considered private dwellings.

b) The enumerators will enumerate all of the collective dwellings except the military institutions and the prisons, which will be enumerated by members of the Ministry of State and Defense.

c) In every collective dwelling you should investigate if within them, there is a dwelling for the caretaker, supervisor or administrator, or of any other person who does not share the common life of the rest of the residents and has a dwelling with his/her own family. In this case, these persons will be considered as residents of a private dwelling, and therefore you will complete a separate form.

d) The collective dwellings will be enumerated as if

they were private dwellings, which means that you will fill in all of the form, with the exception of "Characteristics of the dwelling" and the question regarding family relationships.

INTERVIEWER INSTRUCTIONS

<sva v="NI95A027 NI95A028">Concept of dwelling:
This is all places delimited by walls and roof where one or more persons habitually reside, which means that they sleep, prepare food, and are protected from the elements. It also means that the persons can enter or leave the dwelling without passing through another dwelling, using direct access from the street or through a corridor. You should be aware that there are dwellings with one front but in the interior there can be other dwellings, which you will have to enumerate separately.
</sva></p>

<p><sva a="all" v="NI95A028">Question 2: Condition of occupancy
1. Occupied with inhabitants present
This is a house or dwelling in which one or more persons reside in habitual form for the time defined by the census.

2. Occupied, with inhabitants absent
This is a house or dwelling in which one or more persons habitually reside, but at the moment that you pass on your route, the person or persons are not present or you only encounter persons who cannot give the information requested on the Census Form.

In this case, you should note on your route form that you did not enumerate the dwelling because you did not encounter the occupants and you will leave a notice for them. On the notice, you will indicate the date and time at which you will return to do the interview, saving the form for this purpose.

If when you return to the dwelling you encounter the occupants and complete the interview, make a diagonal line over the date and time that you have previously marked to make the return visit and note all of the information that are indicated starting with column 11.

If, on the contrary, when you return to the dwelling the occupants are still absent, you will leave a Citation so that these persons go to be enumerated in the respective office of Census.

3 [to 6]. Unoccupied dwelling
If the dwelling is unoccupied for whatever reason (for rent or sale, seasonal use, under construction or repair, or any other reason) you will note on your Route Form

that you did not enumerate the dwelling because it was unoccupied and you will mark the corresponding box, considering the interview concluded. If at the moment that you do the enumeration it is inhabited, you should mark it as unoccupied only if the occupants are vacationers.

9	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

Question 4: Predominant material of the roof
 The roof refers to the material that protects the majority of the dwelling (does not refer to ceiling in the interior). You should mark only one of the alternative answers. If there is more than one type of material in the roof, you will mark the predominant one.
 1. Zinc
 Generally, this is corrugated metal sheeting.
 2. Clay or cement tiles
 This is commonly made with baked clay.
 3. Plycem or Nicalit panel
 This can be smooth, waved, channeled, or another decorative format.
 4. Straw, palm leaves and similar materials
 Materials that are used to build rustic shacks in rural areas.
 5. Rubble or discarded materials
 Materials used in marginal dwellings such as pieces of wood, plastic, cans, etc.
 6. Other
 Materials not included in the above categories.

<sva a="all" v="NI95A032 NI95A033">Question 6: Number of rooms
Room: This is a space within the dwelling that is delimited by fixed divisions of any material. You should count as rooms: the living room, the dining room, the bedrooms, the combined living room/dining room, but you should not include in the count: the bathroom, hallway, kitchen, garages, storage room, workshop, etc.

Note the total number of rooms that the dwelling has, and of this total, note the number that are used for sleeping as long as the room does not have another use during the day.
</sva>

Questions and instructions

LITERAL QUESTION

Characteristics of the dwelling

Material of the external walls

3. What is the predominant material of the exterior walls?

01 Clay brick or blocks

02 Cement blocks or concrete

03 Adobe or taquezal [wooden columns and beams provide structural support for the adobe]

04 Quarried stone

05 Barul, cane, or palm leaves

06 Wood

07 Wood/concrete (mini-skirting)

08 Plywood or corrugated sheeting (Plycem or Nicalit panel)

09 Rubble or discarded materials

10 Other

CATEGORIES

Value	Category
01	Clay brick or block
02	Cement blocks or concrete
03	Adobe/ taquezal
04	Quarried stone
05	Barul, cane, or palm leaves
06	Wood
07	Wood/concrete (mini-skirting)
08	Plywood or corrugated sheeting (plycem or nicalit panel)
09	Rubble or discarded materials
10	Other type
98	Unknown
99	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

Question 3: Predominant material of the walls

You should consider only the exterior walls of the dwelling. What is important is the base material of the construction and not the covering. In this question you should mark only one of the boxes. If in the dwelling there is more than one material, you should mark the predominant material.

1. Clay brick or blocks

The wall of clay brick or blocks is constructed with sand and cement in a metal framework. This can be covered or not covered.

2. Cement blocks or concrete

This is a dwelling built of concrete blocks, sand, and cement, sustained by columns and beams of concrete.

3. Adobe or taquezal

This wall is made of a base of dirt mixed with grass, sustained primarily with a framework made of wood.

4. Quarried stone

This is a wall that is primarily built with stones extracted from quarried mines.

5. Barul, cane or palm leaves

This type of material is used to build rustic shacks that are primarily located in rural areas.

6. Wood

Generally, these are built with boards that are sustained with a beamed framework.

7. Wood/concrete (mini-skirting)

These are built over a base of concrete that generally makes up to half of the construction, with the upper portion made of wood.

8. Plycem or Nicalit panel

Built primarily with asbestos sheeting, cement panels, or concrete sheeting [Plycem is a specific type of sheeting, roughly translated as concrete plywood]

9. Rubble or discarded materials

This type of material is found primarily in squatted or marginal

dwellings and refers to pieces of wood, plastics, cardboard, tin, etc. 10. Other Any material that is not included in the previous categories, such as metallic sheeting, tarps, etc.

description

DEFINITION

9	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

Question 9: Toilet facilities
 This is the installation to eliminate fecal materials. It can be an outhouse or latrine, it can be a toilet connected to a sewage network, connected to a septic field or septic well or it can discharge to a river or ditch.
 Read the question and each one of the alternative answers and mark the one that is indicated by the informant. If in any dwelling you are told that there is a toilet and an outhouse, you should mark only one of the answers. In this case, you will mark the box for toilet.
 1. Outhouse or latrine
 This is a sanitary service used for elimination of fecal material that is not connected to a sewage system and does not have any drainage. It is built of materials like wood or concrete and its base is mounted over a hole in the ground.
 2 [to 4]. Toilet
 This is a sanitary service that through a pressurized water system permits the removal of human residue which is drawn through pipes in the public drainage network or another system.
 5. None
 When the dwelling does not have any type of sanitary service available and the fecal material is deposited out in the open.

9	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

Question 8: Water service
 We are interested in knowing in what manner the occupants of the dwelling obtain water. The enumerator should read the question and mark one of the answer alternatives.
 1. Piped inside the dwelling
 This is a dwelling that has at least one water pipe or faucet inside of the dwelling, which can be in the kitchen, in the bathroom, or in any room of the dwelling.
 2. Piped outside the dwelling but inside the property
 This is when a pipe or faucet is installed on the patio or other place that is outside of the dwelling, with the goal of supplying water to one or various dwellings, as commonly occurs with rooming houses.
 3. River, spring or stream
 This is a dwelling that obtains water from a river, a spring, or a stream.
 4. Public standpipe
 This is a faucet or pipe that is situated outside of the property and is available to all of the dwellings of a community or village.
 5. Public or private well
 This is when water is supplied through holes made in the ground to capture subterranean waters.
 Public well: This well is for the common use of various dwellings.
 Private well: This well is for the use of only one dwelling.
 6. Other form
 This is any other manner of obtaining water supplies not included in the above categories, which can be rain water, from a lake, from a truck, etc.

MOMLOC: Mother's location in household**Data file:** NIC1995_PHC-P-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of MOMLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships. To restrict MOMLOC to biological mothers, such as for own children fertility estimation, MOMLOC should be reset to zero when STEPMOM is greater than zero.

concept

41	Other Relatives, within empirical child cap
42	Other Relatives, within constructed child cap
51	Non-Relatives, within empirical child cap
52	Non-Relatives, within constructed child cap

description

DEFINITION

PARRULE describes the criteria by which the IPUMS International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Constructed Family Interrelationship Variables -- PERSON	IPUMS

PERNUM: Person number

Data file: NIC1995_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

PERNUM is a 4-digit numeric variable.

PERWT: Person weight

Data file: NIC1995_PHC-P-H.dat

Overview

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

POLYMAL: Man with more than one wife linked

Data file: NIC1995_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	No more than one wife linked via SPLOC
1	More than one wife linked via SPLOC

description

DEFINITION

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

POPLOC: Father's location in household

Data file: NIC1995_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of POPLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPOP is designed to identify some of these social relationships. To restrict POPLOC to biological mothers, such as for own children fertility estimation, POPLOC should be reset to zero when STEPPOP is greater than zero.

concept

SPRULE: Rule for linking spouse

Data file: NIC1995_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 2 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
00	No spouse present
01	Rule 1: strong relationship pairing, couple adjacent
02	Rule 2: strong relationship pairing, couple not adjacent
03	Rule 3: weak relationship pairing, couple adjacent
04	Rule 4: weak relationship pairing, couple not adjacent
05	Rule 5: weak consensual union pairings
06	Rule 6: sample-specific rules (usually child-to-child)

description

DEFINITION

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

STEPMOM: Probable stepmother

Data file: NIC1995_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Biological mother or no mother present
1	Mother has no children born or surviving
2	Child reports mother is deceased
3	Explicitly identified step relationship
4	Mother reports no children in the home
5	Age difference implausible
6	Child exceeds known fertility of mother

description

DEFINITION

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children born or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

In cases where more than one criterion for a likely stepmother is met, STEPMOM will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

1	Child reports father is deceased
2	Explicitly identified step relationship
3	Age difference implausible
4	Spouse of mother
5	Identified as adopted
6	Surname difference -- male child or never-married female

description

DEFINITION

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

In cases where more than one criterion for a likely stepfather is met, STEPPOP will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPOP will always under-represent their actual number in the population.

description

DEFINITION

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Constructed Family Interrelationship Variables -- PERSON	IPUMS

FAMUNIT: Family unit membership

Data file: NIC1995_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

FAMUNIT is a 4-digit numeric variable.

CodesIf there is only one group of related individuals within the household, all of them will be coded "1;" if there is a second, separate such group listed on the form, all of them will be coded "2," and so on.

POLY2ND: Woman is second or higher order wife

Data file: NIC1995_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Person is not the 2nd or higher order wife linked via SPLOC
1	Person is the 2nd or higher order wife linked via SPLOC

description

DEFINITION

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable

SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

description

DEFINITION

CHBORN reports the number of children ever born to each woman of whom the question was asked. In most samples, women were to report all live births by all fathers, whether or not the child was still living.

var_concept.title	Vocabulary
Demographic Variables -- PERSON	IPUMS

MARST: Marital status [general version]**Data file:** NIC1995_PHC-P-H.dat**Overview**

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Single/never married
2	Married/in union
3	Separated/divorced/spouse absent
4	Widowed
9	Unknown/missing

description

DEFINITION

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

EDATTAIN: Educational attainment, international recode [general version]

Data file: NIC1995_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Less than primary completed
2	Primary completed
3	Secondary completed
4	University completed
9	Unknown

description

DEFINITION

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

description

DEFINITION

YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Self-employed
2	Wage/salary worker
3	Unpaid worker
4	Other
9	Unknown/missing

description

DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

EMPSTAT: Activity status (employment status) [general version]

Data file: NIC1995_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Employed
2	Unemployed
3	Inactive
9	Unknown/missing

description

DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

Imputation and derivation

DERIVATION

IND is a 5-digit numeric variable.

Some samples use fewer than 5 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

description

DEFINITION

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

NIU (not in universe)

description

DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

Work Variables -- PERSON	IPUMS

OCC: Occupation, unrecoded

Data file: NIC1995_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

Work Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

OCC is a 4-digit numeric variable.

Some samples use fewer than 4 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

description

DEFINITION

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

description

DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general,

the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

description

DEFINITION

GEOMIG1_5 indicates the major administrative unit in which the person resided five years prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of residence five years ago, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1_5 match the geographic codes in GEOLEV1 (current place of residence). For similar information for different time intervals since migration, see variables GEOMIG1_P, GEOMIG1_1, and GEOMIG1_10. More on migration and geography can be found [here](#).

<sva r a="all" v="NI95A408 NI95A409 NI95A410 NI95A411 NI95A412 NI95A448">Question 4: Place of birth
For the purpose of the census, we consider the place of birth of the person as the municipality of the habitual residence of the person's mother at the time of birth, even if the delivery occurred in another municipality distinct from the one of the mother's habitual residence, because of medical care or other accidental reasons. If for the census you do not indicate the birth of the child in the place of the mother's residence, then we will have a false result for migrations. Therefore, you should be very careful with this question.

You will ask, "In which municipality of the country were you born?" But explaining that you want to know in which municipality the person started to grow up.

If the person was born in the same municipality where you are conducting the interview, you will mark the box that corresponds to Category 1 (Here, in this municipality) with an "X" and you will leave the rest blank.

If the person was born in another municipality, you will write the name of the municipality. For those who were born in another country, you should be careful to write the complete name of the country of origin clearly and at the same time, write the year of arrival in Nicaragua when the person intended to stay here. Leave the boxes to the right blank; they are for office use.

INTERVIEWER INSTRUCTIONS

<sva r a="all" v="NI95A401">Question 1: Relationship
We want to know the person's relationship to the head of household and not the relationship between each of the members. Option 3, "Son/daughter", also includes adopted children and step-children. If the informant declares that any of the persons is a brother/sister, grandparent, cousin, nephew, or uncle of the head of household, then you will mark option 7, "Other relative". Remember that the head of household or the qualified informant should also answer Section VI about agricultural information. This Section VI should be completed on the first form in the case that you complete two or more and there is only one producer.

2	Female

INTERVIEWER INSTRUCTIONS

<sva a="all" v="NI95A402">Question 2: Sex
The question, "Is the person male or female?" will not be asked of the persons who are present, you will just write the answer by simple observation. In the case the informant responds for other members of the family, be sure that the information is correct, since there are names that are used for both males and females. For example: Guadalupe, Isabel, Carmen, Socorro, Concepcion, Jesus, Dolores, Maria, etc.

The goals of these questions are to know the current marital status of the persons and the principal economic characteristics of the population that participated in the production of goods and services, as well as those who are dedicated to non-economic activities, such as: household chores, studying, etc.

If the person is younger than 10, continue with the next person.
</sva r></p>

<p><sva r a="all" v="NI95A431">Question 16: Status in Occupation
With this question we want to know what status the person had in the principal job that he/she did during the week previous to the census. This means, we want to know if the person was an employee or worker, a laborer or day laborer, self-employed, employer or business owner, unpaid worker, member of a cooperative, or other.
<div class="i1">1. Employee/manual worker:
This is a person who works for a boss, the state, an establishment or private business in exchange for a salary.

2. Day laborer:
This is a person who did manual or non-manual labor in exchange for a salary or commission or other form of payment in money or goods.

3. Self-employed:
This is a person who works in his/her own business, company, farm, etc. and all of those who practiced a profession or occupation on their own account. Also, they do not have employees or workers on payment or salary even if they might use a family member as an unpaid assistant.

4. Boss or entrepreneur:
This is a person who exploits his/her own business or company or who practices a profession or occupation on their own account, having one or more employees, workers, day laborers, etc. for payment or

salary.

5. Unpaid worker:
This is a person who works in a business, company, farm, or agricultural enterprise that is administered or owned by any member of his/her family and does not receive any salary in exchange for his/her labor.

6. Member of production cooperatives:
This is a person who works and who is a member of one or more production cooperatives for which he/she receives payment in exchange for contributions to these cooperatives. If the person is only a paid worker in the cooperative, he/she will be classified as an employee, worker, or day laborer.</div>

<sva r v="NI95A426 NI95A427 NI95A428 NI95A429 NI95A430 NI95A431 NI95A432 NI95A433 NI95A434">Questions only for persons who are age 10 or older
The goals of these questions are to know the current marital status of the persons and the principal economic characteristics of the population that participated in the production of goods and services, as well as those who are dedicated to non-economic activities, such as: household chores, studying, etc.

If the person is younger than 10, continue with the next person.
</sva r></p>

<p><sva r a="all" v="NI95A427">Question 13: Working status
Last week this person:

With this question we want to know who had work the week previous to the census and who was unemployed.

Before asking this question, be aware of the following definitions:

For the purpose of the census, the following are considered "Work":
<div class="i1">a) When the person carried out any economic activity, which means, he/she worked for income, earnings, salary or other type of payment in money or in kind.

b) When the person worked in a business or farm administered by a family member, with the goal of obtaining products for his/her own consumption and that of his/her family (example: a son works without pay in his parents' store, helps with agricultural labor, etc.)

c) When he/she works for his/her own business, professional practice or as an independent worker (self-employed).

d) Any other labor that is carried out during the reference period for which payment is received in money or goods. This includes the work of a seamstress or others carried out in the person's own house for other persons or businesses, as well as food preparation, candy making, etc., which will be sold.</div>

From this question 13, the alternatives "01" to "04" will indicate the number of persons who worked in the week before the census. From the answers "05" to "07" we will obtain the information about those persons who , being part of the economically active population, are unemployed. From the answers of the alternatives "08" to "13" we will obtain the information about the persons considered economically inactive.

For the purpose of the census, the following will not be considered work:

a) The tasks carried out in the household, such as household chores (except the domestic employees who are paid) and activities that persons carry out in their own homes.

b) The tasks of unpaid volunteers in churches, as firemen, or other charitable organizations; also included are the tasks of persons who are involuntarily confined in institutions (prison, sanatoriums, asylums, penal ranches, etc.).

Taking into account the definition of "work", ask the person being enumerated, "What did you do during the majority of the time last week?"
<div class="i1">01. Worked:
We consider a person as such who carried out labor, paid or not, during the reference week equivalent to at least one hour of work.

02. Did not work because he/she was on vacation/leave:
You should mark this box if the person during the week before the census, although he/she has a job, did not work because he/she was on vacation or leave.

03. Did not work because he/she was sick/receiving subsidy:
You should mark this box if the person, during the week before the census, although having work, did not work because he/she was receiving a subsidy or was sick.

04. Did not work because he/she was waiting to continue agricultural work:
These are the persons who did not have work during the reference week because they were waiting for the harvesting season, cane cutting season, etc.

05. Was waiting for replies from an employer:
In the reference period these persons did not actively look for work because they had done so and were waiting for an answer.

06. Was waiting to start a new job:
These are the persons who were waiting to soon start a new job because they already had a positive answer from a previous application.

07. Looked for work having worked before:
We consider a person as such who did not have work during the reference week because he/she left his/her job because of being fired or another cause, and during the week he/she actively looked for work. For example: visiting factories, farms, completing applications, looking in newspapers, asking friends or relatives, etc.

08. Looked for work for the first time:
We consider a person as such who has never had a job before and during the reference week actively looked for work or employment for the first time.

09. Lives from a pension, is retired or has private means:
This refers to persons who have retired having completed the period of service in a job and having reached the age established by law, or, who for reasons of illness, accident or other cause, receives a pension. "Has private means" are those who live off of the interest of money in savings accounts, long-term deposits or by renting out dwellings. These persons do not carry out any paid activity.

10. Does housework:
These are the persons who do not carry out any paid activity during the reference week, being exclusively dedicated to household tasks.

11. Is a student:
These are the persons who are exclusively dedicated to attending public school, private school, or university during the reference week, as long as they have not

carried out any work.

12. Is permanently disabled:
These are the persons who are totally incapacitated for work due to suffering from some physical or mental impediment.

13. Other:
In this group you will register all of the persons who cannot be placed in any of the previous categories. </div>

Remember that you should only mark one answer.

If the person responded any of the answers "08" to "13", you should continue with question 14. You must continue to mark one of the options, even if it will be "07": "No activity".

Question 18: Hours worked
With this question we want to know how many total hours the person worked in the week before the census. If the enumerated person worked at more than one job, you should add up the hours worked in each job and note the total hours worked.
If the informant does not know the hours that the person works per week, you should ask how many days the person worked the week before, do the corresponding multiplication and note the answer.
If the enumerated person had work, but did not work during the reference week, you will note the normal number of hours that the person works per week.
If during the week before the census the person worked extra hours, you should add them up to obtain the total number of hours worked.

<sva r v="NI95A426 NI95A427 NI95A428 NI95A429 NI95A430 NI95A431 NI95A432 NI95A433 NI95A434">Questions only for persons who are age 10 or older
The goals of these questions are to know the current marital status of the persons and the principal economic characteristics of the population that participated in the production of goods and services, as well as those who are dedicated to non-economic activities, such as: household chores, studying, etc.

If the person is younger than 10, continue with the next person.
</sva r></p>

<p><sva r a="all" v="NI95A432 NI95A433">Question 17: Branch of activity
We understand branch of economic activity as the activity of the establishment in which an employed person worked during the reference week or during the person's work before becoming unemployed.

This means that you will ask about what was done at the factory, industry, workshop, farm, or establishment where the person did some type of work.

Describe, in the corresponding space, the activity of the establishment in which the enumerated person carried out the principal occupation declared in question 15.

In different situations we may find some artisans, roaming salespersons, those who have a vending position in the street, and persons who carry out some economic activity in their homes; the majority of them work as self-employed, as is the case of those who sell at stoplights. These persons do not have an establishment where they carry out their work, and therefore generally their branch of activity in which they work is going to be the same as the description of their principal occupation.

Do not forget that you should note that to which activity the business, store, company, office or place where the person worked is dedicated to doing. If the person did not work in any of these places, you should note what the person manufactured, repaired, cleaned, sold, transported, cultivated, or did.

When you describe the branch of activity, do not use general terms such as: Factory, ranch, workshop, store, etc.

You should clearly explain as shown in these examples:
<ul class="b1">

Factory: Shirt factory, footwear factory, factory of food products, clothing factory, factory of plastic products

Workshop: Sewing workshop, automobile repair shop, lathe workshop, shoe workshop, carpentry workshop

Farm: Coffee farm, corn farm, tobacco farm, cattle ranch, bean farm

The information about the branch of economic activity of the establishment where the person works is important for knowing the productive structure of the country.

Whenever it is answerable, you should not leave this space blank.

<svr v="NI95A426 NI95A427 NI95A428 NI95A429 NI95A430 NI95A431 NI95A432 NI95A433 NI95A434">Questions only for persons who are age 10 or older
The goals of these questions are to know the current marital status of the persons and the principal economic characteristics of the population that participated in the production of goods and services, as well as those who are dedicated to non-economic activities, such as: household chores, studying, etc.

If the person is younger than 10, continue with the next person.
</svr></p>

<p><svr a="all" v="NI95A428">Question 14: Last week the person worked in
With this question we try to collect information from those persons who during the reference week carried out some activity inside or outside of the dwelling that provided income in money or goods.

Within these activities we find: laundering, ironing, sewing for someone else, making bread, tortillas, candy or other foods to sell, making artisanal goods to sell, field

work, and other activities.

If the person responded to any of the alternatives 1 to 6, you will continue with question 15 and write for the principal occupation the class of task that the person carried out as paid work, whether in money or goods, even if their principal work was that of housewife or student. Then, you should continue with questions 16, 17, and 18.

If the person answered alternative 7 (no activity) and is a woman who is fourteen years or more, you will continue with question 19 without marking anything for questions 15 to 18. If the person is a man, you will continue to the next person, but remembering that if this is the last informant for the dwelling, you should continue with Section VI about agricultural information.
</svar>

If the person is younger than 10, continue with the next person.
</sva r></p>

<p><sva r a="all" v="NI95A426">Question 12: Marital status
For marital status, the census includes the situation of each person in relation to the laws or customs related to marriage or cohabitating that exist in the country.

Mark with an "X" the marital status that the informant declares.
<div class="i1">For those younger than 12: If the person, male or female, is younger than 12, do not ask the question about marital status and mark with an "X" the box that corresponds to category 1 ("Younger than 12").

2. Cohabiting/partnered:
This is every person who lives in a married state without having a contract of marriage. This union is also called free union or de facto union.

3. Married:
This is a person who has a contract of civil or religious marriage and lives with his/her spouse.

4. Separated:
This is a person who having separated from his/her spouse or companion has not remarried nor lives in cohabitation.

5. Divorced:
This is a person whose marriage has been legally dissolved and has not remarried nor lives in cohabitation.

6. Widow/widower
This is a person who was married or cohabitating and whose spouse or companion died and he/she has not remarried nor lives in cohabitation.

7. Single
This is a person who has never married or cohabitated.</div>

Note: If a person was already married or cohabitating, for the purpose of the census, this person cannot be considered single; be careful with this question because many persons who have separated or widowed or divorced have the custom of considering themselves single.

INTERVIEWER INSTRUCTIONS

<sva r v="NI95A426 NI95A427 NI95A428 NI95A429 NI95A430 NI95A431 NI95A432 NI95A433 NI95A434">Questions only for persons who are age 10 or older
The goals of these questions are to know the current marital status of the persons and the principal economic characteristics of the population that participated in the production of goods and services, as well as those who are dedicated to non-economic activities, such as: household chores, studying, etc.

If the person is younger than 10, continue with the next person.
</sva r></p>

<p><sva r a="all" v="NI95A429 NI95A430">Question 15: Main occupation
With this question we want to know what the person did, has done, or does in his/her principal work, which means the tasks the person carries out. What occupation did the person have, what was the person's position, or what type of work did the person do in the week before the day of the census or in his/her last day of work?

If the person has more than one occupation, you will note the one to which the person dedicates the greatest number of hours, or if he/she dedicated the same number of hours, the one that provided the greatest income. If it is the case of the same number of hours and equal income, then the principal occupation will be the one that the enumerated person considers to be the most important.

Recommendations:
1) The occupation should be noted clearly and with all of the details.

2) Do

not write in general terms, such as: salesman, employee, office worker, worker, assistant, driver, etc., instead it is necessary that you clearly explain as shown in the following cases:

Salesman: door-to-door salesman, salesman who roams from area to area, newspaper salesman, salesman in a clothing shop, wholesale salesman, retail salesman

Worker: construction laborer, carpenter, framer, baker, lathe worker, plumber

Agricultural worker: milker, pruner, coffee harvester, cutter of sugar cane, coffee, cotton, etc., corral worker

Employee/office worker: typist, commercial secretary, executive secretary, bilingual secretary, commercial accountant, public accountant, bookkeeper

Mechanic: automobile mechanic, motorcycle mechanic, dental mechanic, aviation mechanic, refrigeration and air conditioning mechanic

Teacher: elementary school teacher, high school teacher, university professor, physical education teacher, teacher of dance, singing, swimming, beauty, etc.

3) Do not note write the profession of the enumerated person, especially if the person does not currently practice it. Consider the following examples:

a) If a public accountant worked as an elementary teacher, you should note "Elementary teacher" as occupation, and not "Public accountant".

b) If a civil engineer worked as the manager of INAA, you should note "Manager of INAA" and not "Civil engineer".

c) If an architect worked as a bank teller, you should note "Bank teller" and not "Architect".

d) If an automobile mechanic worked as a driver, you should note "Driver" (of a light vehicle, bus, or cargo truck) and not "Automobile mechanic".

This series of questions will only be asked of women age 14 or older. For the case of all of the females younger than 14 and all males of any age, you will annul the questions from 19 to 25 by making a diagonal line through each of the boxes.
</sva r></p>

<p><sva r a="all" v="NI95A439 NI95A440 NI95A441">Question 21: Of these children, how many are still living?
Here we count all of those children, male and female, who are alive on the date of the census, where or not they lived with the mother.

Notes:
a) The number of deceased can never be greater than the number of live-born children noted in question number 20.

b) In question number 20, the informant could have omitted or forgotten the children who were born alive and died and when question number 21 is asked, it reminds them of these children, therefore you will correct the information previously noted in question number 20 and write the correct information.

<p><sva r a="all" v="NI95A442 NI95A443 NI95A444">Question 22: What is the date of birth of the woman's last live-born child?
You should note, in numerical format, the day, month, and year in which the last child was born alive whether or not the child is alive or has died.

For example, if the child was born on the 28 of October, 1958, you will note it like this: 28/10/58

In regard to the year, you will only note the last two digits.

Note: In this question, the informant can confuse the youngest son or daughter that is currently alive. You should clearly make the distinction that this is the date of the last child that was born alive even if this child is deceased.
