

# IX Recenseamento Geral do Brasil. Censo Demográfico de 1980. - IPUMS Subset

**Instituto Brasileiro de Geografia e Estatística, IPUMS**

report\_generated\_on: September 3, 2025

visit\_data\_catalog\_at: <http://catalog.ihsn.org/>

## Identification

---

### SURVEY ID NUMBER

BRA\_1980\_PHC\_v01\_M\_v7.5\_A\_IPUMS

### TITLE

IX Recenseamento Geral do Brasil. Censo Demográfico de 1980. - IPUMS Subset

### ABBREVIATION OR ACRONYM

PHC Brazil 1980 (IPUMS Harmonized Subset)

### COUNTRY

Name	Country code
Brazil	BRA

### STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

### SERIES INFORMATION

DOI:10.18128/D020.V7.5

### KIND OF DATA

Population and Housing Census [hh/popcen]

### UNIT OF ANALYSIS

Persons, households, and dwellings

### UNITS IDENTIFIED:

- Dwellings: yes
- Vacant Units: Yes
- Households: yes
- Individuals: yes
- Group quarters: yes

### UNIT DESCRIPTIONS:

- Dwellings: no
- Households: Structurally independent living quarters, consisting of one or more rooms with a private entrance, serving up to three families.
- Group quarters: Group living together under relations of administrative subordination; group of six or more persons not related by kinship; or a dwelling with more than 3 families.

## Version

---

### VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

### VERSION DATE

2024-10-05

## Scope

---

### NOTES

Additional notes on a sample that is part of this study: Brazil 1980

### TOPICS

<b>Topic</b>	<b>Vocabulary</b>
Demographic Variables -- PERSON	IPUMS
Geography: Global Variables -- HOUSEHOLD	IPUMS
Appliances, Mechanicals, Other Amenities Variables -- HOUSEHOLD	IPUMS

Work: Industry Variables -- PERSON	IPUMS

## Coverage

### GEOGRAPHIC UNIT

Municipality

### UNIVERSE

People who were present in the country on the data of reference (Census day), including residents who were temporarily absent from the country on the referred date for a period of no more than 12 months. Also included: Brazilians (and their families) on diplomatic and military missions abroad; crew and passengers of Brazilian ships that were not in domestic ports; indigenous population living in villages, indigenous posts (postos indigenas), and religious missions, or in other areas. Not included: indigenous population living in tribes without contact with the outside, those preserving their primitive ways of life); foreigners on foreign ships in transit in domestic ports or domestic airports. Indigenous persons, with exceptions.

## Producers and sponsors

### PRIMARY INVESTIGATORS

Name	Affiliation
Instituto Brasileiro de Geografia e Estatística	
IPUMS	University of Minnesota

## Sampling

### SAMPLING PROCEDURE

MICRODATA SOURCE: Instituto Brasileiro de Geografia e Estatística

SAMPLE SIZE (person records): 29378753.

SAMPLE DESIGN: Long form sample. Systematic sample selected with the same probability inside each census tract. A sample was taken of individual dwellings and of families or individuals in "grupos conviventes" inside collective dwellings with the same sample fraction for tract of that municipality. Each collective dwelling had a separate list form - CD 1.03 - (Lista de Domicílio Coletivo) to select the families or individuals for the sample. A 25% sample was taken of individual dwellings and of families or individuals in "grupo conviventes".  
Indigenous persons, with exceptions.

### WEIGHTING

Post-stratification employed by age groups, by sex, by rural/urban, and by other characteristics asked of the universe (short form). This generated a matrixes of 48 lines by 15 columns, one for the universe and one for the sample. In an iterative way, a weighting matrix was generated which was the matrix whose weights are associated with each stratus. Matrix marginals were used to calculated the ratio estimators (rather than those for each cell). Each person received an integer weight such that the final mean of the sample attained the true fraction of the universe, as in 1970.

## Data collection

### DATES OF DATA COLLECTION

Start	End
1980-09-01	1980-12-01

## TIME PERIODS

Start date	End date
1980-09-01	1980-09-01

## DATA COLLECTION MODE

Face-to-face [f2f]

## DATA COLLECTION NOTES

de jure, CENSUS DAY: September 1, 1980

## questionnaires

## QUESTIONNAIRES

Long and short enumeration forms. The short form contains general information about the characteristics of the dwelling and each of persons in the dwelling. The long form contains general and more specific information about the characteristics of the dwelling, families, and each of the people in the dwellings and was applied to a 25% sample of the population.

## Access policy

## CONTACTS

Name
Instituto Brasileiro de Geografia e Estatística

## CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

## ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

#### CITATION REQUIREMENTS

DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

New samples for:

Bolivia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available [here](#).

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available [here](#).

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

#### EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A\_HISCOSE, SE1890A\_HISCRELSE, SE1890A\_HISCSTATSE, SE1890A\_OCCMULTISE, SE1900A\_HISCOSE, SE1900A\_HISCRELSE, SE1900A\_HISCSTATSE, SE1900A\_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A\_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

#### EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BPLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A\_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A\_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1\_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1\_EG2006 and GEO2\_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1\_5\_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2\_BR1970 in Brazil 1970 were corrected.

## GQ: Group quarters (collective dwelling) status

Data file: BRA1980\_PHC-H-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 2    Range: -    Format: Numeric

### Questions and instructions

### CATEGORIES

Value	Category
00	Vacant
10	Households
20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

## description

### DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

Group Quarters Variables -- HOUSEHOLD	IPUMS

**HHWT: Household weight****Data file: BRA1980\_PHC-H-H.dat****Overview**

Type: Continuous    Decimal: 2    Width: 8    Range: -    Format: Numeric

**description**

## DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

**concept**

## CONCEPT

<b>var_concept.title</b>	<b>Vocabulary</b>
Technical Household Variables -- HOUSEHOLD	IPUMS

**Imputation and derivation**

## DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

**PERSONS: Number of person records in the household****Data file: BRA1980\_PHC-H-H.dat****Overview**

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

**description**

## DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

## Imputation and derivation

### DERIVATION

PERSONS is a 4-digit numeric variable.

## RECTYPE: Record type

Data file: BRA1980\_PHC-H-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 1    Range: -    Format: character

### Questions and instructions

#### CATEGORIES

Value	Category
H	Household
P	Person

### description

#### DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

## description

### DEFINITION

**SAMPLE** identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in **COUNTRY**

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

**description**

## DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

**Imputation and derivation**

## DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

**STRATA: Strata identifier****Data file:** BRA1980\_PHC-H-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 12    Range: -    Format: Numeric

## description

### DEFINITION

This variable is the strata identifier for the sample. The STRATA variable provides information about the sample design that can be used to improve estimation.

## description

### DEFINITION

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

## AREAMOLLWGE01: Area of GEOLEV1 unit in square kilometers

Data file: BRA1980\_PHC-H-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 10    Range: -    Format: Numeric

## description

---

### DEFINITION

AREAMOLLWGE01 indicates the area in square kilometers of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

## AREAMOLLWGE02: Area of GEOLEV2 unit in square kilometers

Data file: BRA1980\_PHC-H-H.dat

## Overview

Type: Continuous    Decimal: 0    Width: 10    Range: -    Format: Numeric

## description

### DEFINITION

AREAMOLLWGEO2 indicates the area in square kilometers of the second major administrative unit in which the household was enumerated. The second major administrative unit of the household is identified by the GEOLEV2 variable.

The area of units in GEOLEV2 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## description

### DEFINITION

GEO1\_BR identifies the household's state within Brazil in the 1970 through 2010 samples. States are the first level administrative units of the country. GEO1\_BR is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1\_BR can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## **GEOLEV1: 1st subnational geographic level, world [consistent boundaries over time]**

Data file: BRA1980\_PHC-H-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 6    Range: -    Format: Numeric

## description

---

### DEFINITION

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

## concept

---

### CONCEPT

## description

### DEFINITION

GEO2\_BR identifies the household's municipality within Brazil from 1980 to 2010. Municipalities are the second level administrative units of the country, after states. GEO2\_BR is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO2\_BR can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

GEO2\_BR1980 identifies the household's municipality within Brazil in 1980. Municipalities are the second level administrative units of the country, after states. A GIS map (in shapefile format), corresponding to GEO2\_BR1980 can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level of any country refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

MESOBRA indicates the "Mesorregião Geográfica" (mesoregion) in Brazil where the household was enumerated for the 1980 - 2010 samples. MESOBRA is harmonized by name and does not account for boundary changes over time.

The full set of geography variables for Brazil can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

### description

#### DEFINITION

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

## INTERVIEWER INSTRUCTIONS

Question 2 - Type  
Mark:  
House - for a private household located in a building with direct access to a thoroughfare, regardless of the material used in its construction, its condition, or the number of floors. Buildings with two or three floors which contain only one household will be considered houses;  
Apartment - for a private household with common areas for more than one household (entrance hall, stairways, corridors, entrance gate and other areas) in buildings of one or more floors, with various units, including rooms in a tenement (cabeça-de-porco), inner-city slum dwellings, etc. Dwellings located in buildings of two or three floors which have at least one household per floor will also be considered apartments. Buildings in which one of the floors is occupied by a non-residential unit are included in these cases.

**description**

## DEFINITION

This variable identifies whether the dwelling type is a house or apartment.

6	Other
8	Unknown
9	NIU (not in universe)

### INTERVIEWER INSTRUCTIONS

Question 3 - Walls  
 Mark one of the boxes, according to the material predominantly used in the construction:  
 Masonry - for bricks, adobe, stone, concrete slabs or precast concrete (covered or not with plaster), unfinished concrete and lined lathe and plaster. Walls of metal and glass structures and those lined with marble, stone, etc. are included in this case.  
 Wood - when any type of finished wood is used, even if not in good condition, except for processed wood from boxes or crates, plywood boards, etc.  
 Unfinished lath and plaster - when the walls are made of mud or lime and sand with wooden pillars and stakes, indoor partitions, stucco, wattle and dubb, etc.;  
 Scrap material - when material from crates or boxes, plywood boards or empty containers, etc. is used. Wall material already used as such in the past is not considered scrap material.  
 Straw - when the walls are made of sape grass, leaves, or shells of vegetables, plants, etc.; or  
 Other - when material that does not fit into any of the above categories has been used.

3	3 families
4	4 families
5	5 families
6	6 families
7	7 families
8	8 families
9	9 or more families

## description

### DEFINITION

NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC,

MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

6	6 fathers
7	7 fathers
8	8 fathers
9	9 or more fathers in household

## description

### DEFINITION

NFATHERS is a constructed variable indicating the number of fathers -- of persons of any age -- within a household.

NFATHERS is constructed using the IPUMS-International pointer variable POPLOC (father's location in the household).

**MOMLOC: Mother's location in household****Data file:** BRA1980\_PHC-P-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 3    Range: -    Format: Numeric

**description**

## DEFINITION

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of MOMLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships. To restrict MOMLOC to biological mothers, such as for own children fertility estimation, MOMLOC should be reset to zero when STEPMOM is greater than zero.

51	Non-Relatives, within empirical child cap
52	Non-Relatives, within constructed child cap

## description

### DEFINITION

PARRULE describes the criteria by which the IPUMS International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

### CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

### PERNUM: Person number

Data file: BRA1980\_PHC-P-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

## description

### DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

**Imputation and derivation**

## DERIVATION

PERNUM is a 4-digit numeric variable.

**PERWT: Person weight**

**Data file:** BRA1980\_PHC-P-H.dat

**Overview**

Type: Continuous    Decimal: 2    Width: 8    Range: -    Format: Numeric

**description**

## DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

**Imputation and derivation**

## DERIVATION

PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

**POLYMAL: Man with more than one wife linked**

**Data file:** BRA1980\_PHC-P-H.dat

## Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	No more than one wife linked via SPLOC
1	More than one wife linked via SPLOC

## description

### DEFINITION

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

Data file: BRA1980\_PHC-P-H.dat

## Overview

Type: Continuous    Decimal: 0    Width: 3    Range: -    Format: Numeric

## description

### DEFINITION

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of POPLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPPOP is designed to identify some of these social relationships. To restrict POPLOC to biological mothers, such as for own children fertility estimation, POPLOC should be reset to zero when STEPPPOP is greater than zero.

**SPLOC: Spouse's location in household**

**Data file:** BRA1980\_PHC-P-H.dat

**Overview**

Type: Continuous    Decimal: 0    Width: 3    Range: -    Format: Numeric

**description**

## DEFINITION

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly. For more details on the construction of SPLOC, see the Comparability section of SPRULE and this paper on IPUMSI family linking methodology.

## SPRULE: Rule for linking spouse

Data file: BRA1980\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 2    Range: -    Format: Numeric

### Questions and instructions

#### CATEGORIES

Value	Category
00	No spouse present
01	Rule 1: strong relationship pairing, couple adjacent
02	Rule 2: strong relationship pairing, couple not adjacent
03	Rule 3: weak relationship pairing, couple adjacent
04	Rule 4: weak relationship pairing, couple not adjacent
05	Rule 5: weak consensual union pairings
06	Rule 6: sample-specific rules (usually child-to-child)

### description

#### DEFINITION

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

### concept

#### CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

## STEPMOM: Probable stepmother

Data file: BRA1980\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	Biological mother or no mother present
1	Mother has no children born or surviving
2	Child reports mother is deceased
3	Explicitly identified step relationship
4	Mother reports no children in the home
5	Age difference implausible
6	Child exceeds known fertility of mother

### description

#### DEFINITION

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children born or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

In cases where more than one criterion for a likely stepmother is met, STEPMOM will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

1	Child reports father is deceased
2	Explicitly identified step relationship
3	Age difference implausible
4	Spouse of mother
5	Identified as adopted
6	Surname difference -- male child or never-married female

## description

### DEFINITION

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

In cases where more than one criterion for a likely stepfather is met, STEPPPOP will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

## description

### DEFINITION

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## concept

Constructed Family Interrelationship Variables -- PERSON	IPUMS

## FAMUNIT: Family unit membership

Data file: BRA1980\_PHC-P-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

### description

#### DEFINITION

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## concept

### CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

### Imputation and derivation

#### DERIVATION

FAMUNIT is a 4-digit numeric variable.

CodesIf there is only one group of related individuals within the household, all of them will be coded "1;" if there is a second, separate such group listed on the form, all of them will be coded "2," and so on.

## NCHILD: Number of own children in household

Data file: BRA1980\_PHC-P-H.dat

## POLY2ND: Woman is second or higher order wife

Data file: BRA1980\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	Person is not the 2nd or higher order wife linked via SPLOC
1	Person is the 2nd or higher order wife linked via SPLOC

## description

### DEFINITION

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable

SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

## description

### DEFINITION

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

## description

### DEFINITION

SUBFNUM gives the number of the subfamily to which the person belongs within the household (1 = first subfamily, 2 = second subfamily, etc.). SUBFNUM records the identification of subfamilies in the original dataset, which generally correspond to conjugal units and their offspring.

## description

### DEFINITION

SUBFREL describes the relationship of the individual to the head of the subfamily (in most cases, conjugal unit). It is distinct from RELATE, which identifies a person's relationship to the head of the household. There can be multiple subfamilies within households. The particular subfamily to which a person belongs is recorded in SUBFNUM.

Persons living alone without other family are identified as "heads" of family.

**description**

## DEFINITION

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

## description

### DEFINITION

EDUCBR usually indicates the person's educational attainment in Brazil in terms of the amount of schooling completed -- both the level (for example, primary, secondary, or higher education) and typically the number of years or grades completed at that level. For some classifications, the variable indicates the level or grade that the person is currently attending; all such classifications are explicitly indicated in the code labels for EDUCBR.

## EMPSTAT: Activity status (employment status) [general version]

Data file: BRA1980\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

### Questions and instructions

### CATEGORIES

Value	Category
0	NIU (not in universe)
1	Employed
2	Unemployed
3	Inactive
9	Unknown/missing

## description

### DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

998	Response suppressed
999	Unknown

## description

### DEFINITION

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

## LABFORCE: Labor force participation

Data file: BRA1980\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

### Questions and instructions

### CATEGORIES

Value	Category
1	No, not in the labor force
2	Yes, in the labor force
8	Unknown
9	NIU (not in universe)

## description

### DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

Work Variables -- PERSON

IPUMS

**OCC: Occupation, unrecoded****Data file:** BRA1980\_PHC-P-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

**description**

## DEFINITION

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

**concept**

## CONCEPT

<b>var_concept.title</b>	<b>Vocabulary</b>
Work Variables -- PERSON	IPUMS

**Imputation and derivation**

## DERIVATION

OCC is a 4-digit numeric variable.

Some samples use fewer than 4 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

## description

### DEFINITION

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

## description

### DEFINITION

YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

## CATEGORIES

Value	Category
0	NIU (not in universe)
1	Self-employed
2	Wage/salary worker
3	Unpaid worker
4	Other
9	Unknown/missing

**description**

## DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

## description

### DEFINITION

GEOMIG1\_P indicates the major administrative unit in which the person previously resided prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of previous residence, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1\_1 match the geographic codes in GEOLEV1 (current place of residence).

For similar information for different time intervals since migration, see variables GEOMIG1\_1, GEOMIG1\_5, and GEOMIG1\_10. More on migration and geography can be found here.

### description

#### DEFINITION

"Industry" refers to the activity or product of the establishment or sector in which the person worked. IND is classified according to the system used by the respective national census office at the time, and is not recoded by IPUMS-International.

### concept

#### CONCEPT

var_concept.title	Vocabulary
Work Variables -- PERSON	IPUMS

### Imputation and derivation

#### DERIVATION

IND is a 5-digit numeric variable.

Some samples use fewer than 5 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

## description

### DEFINITION

MIG2\_P\_BR indicates the person's municipality of previous residence within Brazil. Migration municipality codes from MIG2\_P\_BR are compatible with codes from GEO2\_BR.

Click on the Source Variables tab for information on place of residence for each sample year. Source variables may contain more geographic unit detail but are not suitable for cross-temporal comparison.

## BR1980A\_PREVMUNI: Municipality of previous residence

Data file: BRA1980\_PHC-P-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 6    Range: -    Format: Numeric

### Questions and instructions

#### LITERAL QUESTION

18. If in Question 17, responded Less than 10 years, indicate the name of the municipality and the abbreviation of the state or the foreign country where lived previously (If responded 10 years or was born in municipality, mark seven zeros 0000000 in the code field) [Municipality] Abbreviation Code

#### INTERVIEWER INSTRUCTIONS

Question 18 - If the answer to Question 17 was less than 10 years, indicate the name of the municipality and the acronym of the state or foreign country where the person lived before. For persons who were born and always lived in the municipality and for immigrants who have lived ten years or more in the municipality, record seven zeros in the Code field. For persons who immigrated less than 10 years ago record the name of the municipality and the acronym of the state where he or she lived previously. When the former residence was a foreign country, record only the name of the country. Below are the acronyms of the states: RO - Rondônia AC - Acre AM - Amazonas RR - Roraima PA - Pará AP - Amapá MA - Maranhão PI - Piauí CE - Ceará RN - Rio Grande do Norte PB - Paraíba PE - Pernambuco AL - Alagoas FN - Fernando de Noronha SE - Sergipe BA - Bahia MG - Minas Gerais ES - Espírito Santo RJ - Rio de Janeiro SP - São Paulo PR - Paraná SC - Santa Catarina RS - Rio Grande do Sul MS - Mato Grosso do Sul MT - Mato Grosso (North) GO - Goiás DF - Federal District (Brasília)

## INTERVIEWER INSTRUCTIONS

<sva r v="BR80A419 BR80A420 BR80A421 BR80A422 BR80A423 BR80A424"><span class="em">The following questions will be filled out only for persons age 5 or over, that is, those born before September 1, 1975.</span><br />[Applies to questions 19 - 24]<br /></sva r></p>

<p><sva r v="BR80A420 BR80A421 BR80A422"><span class="h3">Questions 20, 21 and 22 - For persons who attend school</span><br /><br />Consider as attending the school not only those who take regular courses, but also those

attending Pre-school, Adult literacy course, General Education (attending class on the radio or television), College entrance exam course, Master's degree or Doctor's degree. Also consider as attending school persons who, are duly registered but, on the date of reference, are temporarily unable to attend for reasons of illness, etc. Do not consider as attending school persons who, on the date of the Census, are attending only short courses for professional specialization or cultural extension, such as sewing, dancing, typing, etc.

Question 20 - Grade currently attended  
For persons who attend courses in grades/years, mark the grade/year they attend. If the course attended is not organized by year, but according to a credit system, academic periods, semesters, phases, modules, etc., these credits, periods, etc. should be converted into the traditional grades or years. Therefore, the 5th period of credits at a university is usually equivalent to the 3rd year; each phase or division of schooling generally corresponds to a grade or year in regular courses. For persons who attend non-graded courses or who do not attend school. Box 0 - None - will be marked.

## INTERVIEWER INSTRUCTIONS

<sva r v="BR80A425 BR80A426 BR80A427 BR80A428 BR80A429 BR80A431 BR80A432 BR80A433 BR80A434 BR80A435 BR80A437 BR80A438 BR80A439 BR80A440 BR80A442 BR80A443 BR80A444 BR80A445 BR80A446 BR80A447 BR80A448 BR80A449 BR80A450"><span class="em">The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.</span><br /><br />[Applies to questions 25-49]<br /></sva r></p>

<p><sva r a="all" v="BR80A432"><span class="h3">Question 32 - Objective or field of business of the establishment, organization, institution, etc., where the occupation declared in Question 30 is exercised</span><br /><br />This question is aimed at determining the objective or field of business of the organization, company or firm to which the enumerated person is subordinated, or the nature of the activity exercised by self-employed persons.<br />In most cases, the class of activity is not directly related to the occupation. Therefore, a driver may exercise his or her occupation in Highway freight transportation (driver for a transportation company), or at a Textile company (driver for a cloth factory); a doorman may exercise his occupation in Hotel services (hotel doorman) or in the Entertainment industry (doorman at a movie theater); a medical doctor may exercise her occupation for the Federal Health Department (doctor at INAMPS) or at a Private medical service, (doctor at a private hospital or a private office), or at a Steel company (doctor at the Volta Redonda Steel Plant), etc.<br />In farming establishments (crops or animals), record the main crop or animal at the establishment.<br />Generic answers should be avoided which do not make it possible to correctly characterize the activity of the establishment or business of the workers being enumerated, such as Agriculture, Commerce, Industry, Public service, etc.<br />For orientation, a list of the most common activities is presented below, where countless occupations are exercised. It should be made clear that the entry does not have to be one of the expressions on the list; it should characterize the activity of the organization where the occupation is exercised.<br /><br />[List of occupation sectors was not translated into English]<br /></sva r>

<p><sva r a="all" v="BR80A431"><span class="h3">Question 30 - What occupation, profession, position, function, etc. the person regularly exercised during the last 12 months</span><br /><br />This entry will be for the usual occupation that the enumerated person exercised between 9/1/1979 and 8/31/1980.<br />Usual occupation is considered that exercised during most of the referred period.<br />When a person has changed occupations and intends this change to be permanent, the occupation he or she exercised last will be recorded, regardless of the time spent on each during this period. Included in this case are persons who changed occupations or functions due to promotion or change in career, such as:<br /><br /><div class="i1">1st case - a farm worker who immigrated to the city and went to work as a Hod Carrier in the construction of a building;<br />2nd case - a billing Clerk in an industrial company who was promoted to Accounting Technician;<br />3rd case - an office helper at a bank who was promoted to the position of Cashier.</div><br /><br />When the person has changed occupations, but the change is transitory due to circumstantial or seasonal factors, the usual occupation will be entered and not the transitory occupation, such as:<br /><br /><div class="i1">1st case - for a farm worker who, during the time between planting and harvesting, worked in a village as a stone mason, woodcutter, etc., record, as the case may be, Hoe worker, Cotton picker, etc.;<br />2nd case - for a farm worker who sometimes works with a machine at a sugar plant, etc., the occupation of farm worker will be recorded;<br />3rd case - for a driver who, unable to work in his or her profession, is exercising some other occupation until he is again able to work as a driver, the occupation of Driver will be recorded;<br />4th case - for a specialized worker who, when unable to find a placement in his or her profession, is exercising another occupation, Welder, Cabinet maker, Weaver, etc. will be recorded, as the case may be.</div><br />When the person simultaneously exercises different occupations, the main occupation should be recorded.<br />Main occupation is considered that which occupies the greatest number of the person's hours per week or, if this number is the same, that which provides the highest income, such as:<br /></sva r></p>

<p><sva r v="BR80A431">For persons on vacation or on leave, even if they were exercising another occupation, the usual occupation will be recorded and not that exercised temporarily during vacation or leave.<br />Occupation should not be confused with professional specialization. For example, for a commercial director with a degree in economics, or a high school teacher with a degree in medicine, the entries will be, respectively: Commercial director and High school teacher.<br />Vague or generic answers which do not correctly characterize the person's occupation should not be recorded.<br />Some examples are given below:<br /><br />Incorrect entry: Agent<br />Correct entry: Railroad station agent, travel agent, advertising agent, etc.<br /><br />Incorrect entry: Assistant<br />Correct entry: Office assistant, kitchen assistant, stock assistant, etc.<br /><br />Incorrect entry: Bank worker<br />Correct entry: Bank cashier, file clerk, accountant, etc.<br /><br />Incorrect entry: Commercial worker<br />Correct entry: Shop attendant, invoice clerk, merchandise placer, etc.<br /><br />Incorrect entry: Government employee<br />Correct entry: Attendant, administrative official, stock clerk, etc.<br /><br />Incorrect entry: Mechanic<br />Correct entry: Automobile mechanic, mechanic for calculators, aircraft mechanic, etc.<br /><br />Incorrect entry: Factory worker<br />Correct entry: Carpenter, welder, hod carrier, etc.<br /><br />Incorrect entry: Teacher<br />Correct entry: Primary teacher [Grades 1-8], high school teacher [grades 9-11], university teacher or professor, gym teacher, etc.<br /><br />Incorrect entry: Farm worker<br />Correct entry: Hoe worker, cotton picker, sugar cane cutter, etc.<br /><br />For employees and for persons who are self-employed or without remuneration, the occupation, profession, position, function, etc., which they exercised, will be recorded.<br />If the person is engaged in farming, either individually or only with the help of a resident of the household who is not paid for the work, record respectively Field hand or Animal raiser.<br />If the person has a commercial establishment, individually or only with the help of a non-remunerated person, record Commercial businessman.<br />Liberal professionals (Doctors, Dentists, Lawyers, Engineers, etc.), who employ up to 2 attendants or nurses in their offices should record their profession.<br /><br /><span class="pg">[p.54]</span><br /><br />For Employers (partners or tenants) who are owners of establishments, firms or companies where they work (condition of being owner and employer), the entry should indicate this condition, such

as Ranch owner, Chicken-farm owner, Owner of industry, Store owner, Barbershop owner, Clinic owner, Transportation company owner, etc  
 Below are some examples to better clarify these situations:  
 Situation: Barber, barbershop employee  
 Correct entry: Barber  
 Situation: Barber, barbershop owner, working only with the help of a non-remunerated son or daughter  
 Correct entry: Barber  
 Situation: Barber, working with his father without receiving remuneration  
 Correct entry: Barber  
 Situation: Barber, owner of a barbershop, working with the help of employees  
 Correct entry: Barbershop owner

## description

### DEFINITION

This variable identifies the person's occupation, profession, task or function that was exercised for the longest time. If changed occupations definitively, current occupation is noted.

[varias pension funds], and, divided by 12 the 14th minimum salary received from PIS or PASEP

#### INTERVIEWER INSTRUCTIONS

The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970. [Applies to questions 25-49]

Question 46 - Average gross monthly income received from Retirement (FUNRURAL, Military Retirement, Teachers' Retirement, etc.), from a pension paid by a Federal Social Security Institute, the Social Welfare Fund or a Pension Fund, or from a Continuance Bonus and, divided by 12, the 14th wage received from the PIS or PASEP Tax Funds

The entry will be the sum total of the income for the month of August deriving from:

a) work exercised previously (retirement, including FUNRURAL and other forms of retirement, etc.);

Note: For persons who retired during the last 12 months (9/1/1979 to 8/31/1980) the income from retirement will not be recorded, since they already declared the income from the occupation exercised upon retirement.

b) a pension left by a person of whom the respondent was a beneficiary, paid by a Social Security Institute, Welfare Fund or Social Security Institute. Do not include alimony (spontaneous or legally demanded);

c) longevity bonus (Pé-na-cova); and

d) the amount of 1/12 (divided by 12) of the 14th wage received from the PIS/PASEP Tax Fund, as well as other types of aid received from an Institute or Fund, such as childbirth allowance, disability benefits, etc.

Do not include income deriving from contributions paid in the past to private funds or wage supplementing funds (CAPEMI, MONGERAL, GEBOEX, Montepio da Família Militar, SIAS, etc.).

## INTERVIEWER INSTRUCTIONS

<sva r v="BR80A425 BR80A426 BR80A427 BR80A428 BR80A429 BR80A431 BR80A432 BR80A433 BR80A434 BR80A435 BR80A437 BR80A438 BR80A439 BR80A440 BR80A442 BR80A443 BR80A444 BR80A445 BR80A446 BR80A447 BR80A448 BR80A449 BR80A450"><span class="em">The following questions will only be filled out for persons age 10 or over, that is, those born before September 1, 1970.</span><br /><br />[Applies to questions 25-49]<br /></sva r></p>

<p><sva r a="all" v="BR80A429"><span class="h3">Question 29 - If the person answered yes in Question 28, mark Box 0 (zero) and go on to Question 30. If he or she answered no, indicate the appropriate situation or occupation, following the numbered order, and then go on to Question 46</span><br /><br />When the answer to Question 28 is yes, the Box - Worked - will be marked and the following questions will be answered.<br />When the answer to Question 28 is no, one of Boxes 1 to 9 will be marked, as the case may be; Question 46 will then be asked, and Questions 30 to 45 will be left blank.<br />If the person can be classified into more than one of the situations presented, the first in the order presented will be marked. For these, consider:<br /><div class="i1"><span class="em">Looking for work - Already worked</span> - a person who had worked before 9/1/1979, is willing to work, and has taken some measure in the last 2 months to find work, specifically: made contact with employers, employment agencies, labor unions or the like; asked relatives, friends or colleagues; looked for a job in want ads, etc.; this category includes those who have found work and are waiting to be called or who have signed up for a selection process;<br /><span class="em">Looking for work - Never worked</span> - a person who never worked but is willing to work and who, in recent months, took at least one of the measures described in the preceding item;<br /><span class="em">Retired or pensioner</span> - a person who receives income resulting from retirement from work which he or she exercised at an earlier date (retired, etc.) or who receives a pension from a government pension or social assistance fund left upon the death of a person upon whom he or she was dependent. A person who, retired during the reference period (9/1/1979 to 8/31/1980), should not be considered as retired. In this case yes will be marked in Question 28, - the declared [occupation], and the occupation exercised upon retirement, in Question 30.<br /><span class="em">Lives on earnings</span> - a person who lives only on earnings arising from use of capital or property of which he or she has <span class="lang">usus fructus</span>, such as rent from real estate, movable items, etc., interest from stocks and bonds, dividends, etc.;<br /><span class="em">Prisoner</span> - serving sentence, even if he or she exercises an occupation in the prison;<br /><span class="em">Student</span> - a person who did not work nor looked for work, does not live on earnings, nor was a prisoner, and was attending some course among those listed in Questions 21 or 22;<br /><span class="em">Sick or invalid</span> - a person who cannot work due to illness or permanent disability, but is not on leave from work, retired, living on earnings, in prison or a student;<br /><span class="em">Domestic chores</span> - a person who only works caring for the house where he or she lives; or<br /><span class="em">No occupation</span> - a person who does not want to work or who, although desiring to work, stopped looking because he or she failed to find any job and does not fit into any of the above categories.</div><br /></sva r>

**description**

## DEFINITION

This variable identifies the number of salaries (monthly wages) received for the employees and employed sharecroppers (partner employed). This question is to ascertain whether the person receives more than 12 times the minimum annual wage, for persons who declared they were Employees or Employed sharecropper.
