

# National Population Housing Census 1981 - IPUMS Subset

**National Statistical Service of Greece, IPUMS**

report\_generated\_on: September 3, 2025

visit\_data\_catalog\_at: <http://catalog.ihsn.org/>

## Identification

---

### SURVEY ID NUMBER

GRC\_1981\_PHC\_v01\_M\_v7.5\_A\_IPUMS

### TITLE

National Population Housing Census 1981 - IPUMS Subset

### ABBREVIATION OR ACRONYM

PHC Greece 1981 (IPUMS Harmonized Subset)

### COUNTRY

Name	Country code
Greece	GRC

### STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

### SERIES INFORMATION

DOI:10.18128/D020.V7.5

### KIND OF DATA

Population and Housing Census [hh/popcen]

### UNIT OF ANALYSIS

Persons and households

### UNITS IDENTIFIED:

- Dwellings: no
- Vacant Units: no
- Households: yes
- Individuals: yes
- Group quarters: no

### UNIT DESCRIPTIONS:

- Dwellings: Separated space with independent access that serves as a human lodging
- Households: Individuals living in the same dwelling and sharing at least one meal.
- Group quarters: Group of persons who share a common roof and food because of work, health, religion, etc.

## Version

---

### VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

### VERSION DATE

2024-10-05

## Scope

---

### NOTES

Additional notes on a sample that is part of this study: Greece 1981

### TOPICS

Topic	Vocabulary
-------	------------

Demographic Variables -- PERSON	IPUMS
Geography: Global Variables -- HOUSEHOLD	IPUMS
Dwelling Characteristics Variables -- HOUSEHOLD	IPUMS
Nativity and Birthplace Variables -- PERSON	IPUMS
Work Variables -- PERSON	IPUMS
Technical Household Variables -- HOUSEHOLD	IPUMS
Education Variables -- PERSON	IPUMS
Constructed Family Interrelationship Variables -- PERSON	IPUMS
Utilities Variables -- HOUSEHOLD	IPUMS

Migration: Global Variables -- PERSON	IPUMS
Group Quarters Variables -- HOUSEHOLD	IPUMS
Constructed Household Variables -- HOUSEHOLD	IPUMS
Migration: F-N Variables -- PERSON	IPUMS
Household Economic Variables -- HOUSEHOLD	IPUMS
Technical Person Variables -- PERSON	IPUMS
Dwelling Characteristics Variables -- HOUSEHOLD	IPUMS
Utilities Variables -- HOUSEHOLD	IPUMS
Appliances, Mechanicals, Other Amenities Variables -- HOUSEHOLD	IPUMS
Household Economic Variables -- HOUSEHOLD	IPUMS
Geography: F-N Variables -- HOUSEHOLD	IPUMS
Technical Person Variables -- PERSON	IPUMS
Demographic Variables -- PERSON	IPUMS
Nativity and Birthplace Variables -- PERSON	IPUMS
Other Person Variables -- PERSON	IPUMS
Migration: Global Variables -- PERSON	IPUMS
Education Variables -- PERSON	IPUMS
Work: Occupation Variables -- PERSON	IPUMS
Work: Industry Variables -- PERSON	IPUMS
Work Variables -- PERSON	IPUMS

## Coverage

### GEOGRAPHIC UNIT

Municipalities with 20,000+ population

### UNIVERSE

The entire population of the country, including all households and dwellings.

## Producers and sponsors

## PRIMARY INVESTIGATORS

Name	Affiliation
National Statistical Service of Greece	
IPUMS	University of Minnesota

## Sampling

## SAMPLING PROCEDURE

MICRODATA SOURCE: National Statistical Service of Greece

SAMPLE SIZE (person records): 923108.

SAMPLE DESIGN: All the processed data (10% of the total) by NSSG

## WEIGHTING

Self-weighting (expansion factor=10)

## Data collection

## DATES OF DATA COLLECTION

Start	End
1981-04-05	1981-04-05

## TIME PERIODS

Start date	End date
1981-04-05	1981-04-05

## DATA COLLECTION MODE

Face-to-face [f2f]

## DATA COLLECTION NOTES

de facto, CENSUS DAY: April 5, 1981

## questionnaires

## QUESTIONNAIRES

P1 for private households

## Access policy

## CONTACTS

Name

## CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the

exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Allying that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

#### ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Allying that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

#### CITATION REQUIREMENTS

#### DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International,

variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

#### NEW SAMPLES.

- Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.
- Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)
- Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

#### Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

#### New samples for:

Bolivia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

#### SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

#### NEW VARIABLES.

- IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available [here](#).
- IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available [here](#).
- IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.
- IPUMS International now provides spatially harmonized previous-residence variables at the second administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.
- Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.
- Added more detailed 3-digit industry and occupation variables for China 2000.

#### EDITED SAMPLES.

- Revised full-count data for Great Britain 1881
- Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:
  - Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.
  - Revisions to unharmonized source variables: SE1890A\_HISCOSE, SE1890A\_HISCRELSE, SE1890A\_HISCSTATSE, SE1890A\_OCCMULTISE, SE1900A\_HISCOSE, SE1900A\_HISCRELSE, SE1900A\_HISCSTATSE, SE1900A\_OCCMULTISE.
- A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A\_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

#### EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A\_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A\_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1\_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1\_EG2006 and GEO2\_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1\_5\_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2\_BR1970 in Brazil 1970 were corrected.

Technical Household Variables -- HOUSEHOLD	IPUMS

## GQ: Group quarters (collective dwelling) status

Data file: GRC1981\_PHC-H-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 2    Range: -    Format: Numeric

### Questions and instructions

### CATEGORIES

Value	Category
00	Vacant
10	Households
20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

## description

### DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

### CONCEPT

var_concept.title	Vocabulary
Group Quarters Variables -- HOUSEHOLD	IPUMS

**HHWT: Household weight****Data file:** GRC1981\_PHC-H-H.dat**Overview**

Type: Continuous    Decimal: 2    Width: 8    Range: -    Format: Numeric

**description**

## DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

**Imputation and derivation**

## DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

**PERSONS: Number of person records in the household****Data file:** GRC1981\_PHC-H-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

**description**

## DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

## Imputation and derivation

### DERIVATION

PERSONS is a 4-digit numeric variable.

## RECTYPE: Record type

Data file: GRC1981\_PHC-H-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 1    Range: -    Format: character

### Questions and instructions

#### CATEGORIES

Value	Category
H	Household
P	Person

### description

#### DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

## description

### DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

**SERIAL: Household serial number****Data file:** GRC1981\_PHC-H-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 12    Range: -    Format: Numeric

**description**

## DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

**Imputation and derivation**

## DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

**STRATA: Strata identifier****Data file:** GRC1981\_PHC-H-H.dat**Overview**

## description

### DEFINITION

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

## AREAMOLLWGE01: Area of GEOLEV1 unit in square kilometers

Data file: GRC1981\_PHC-H-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 10    Range: -    Format: Numeric

## description

---

### DEFINITION

AREAMOLLWGE01 indicates the area in square kilometers of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## description

### DEFINITION

ENUTS1 identifies the Nomenclature of Territorial Units for Statistics (NUTS) within Europe in which the household was enumerated. NUTS1 is the first level territorial units within countries. NUTS is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU, and they are also incorporated into this variable.

ENUTS1 corresponds to the 2010 version of NUTS1 released by Eurostat. IPUMS has added ENUTS1\_2013 for the more recent samples. ENUTS1\_2013 is an amendment to the annexes to the ENUTS1 classification.

The last 2-digits of the ENUTS1 variable provide the NUTS1 code. The labels include the standard code for the NUTS1 system and the name of the NUTS1 region, separated by a slash.

Smaller sub-national units are available for most countries in ENUTS2 and ENUTS3. The full set of geography variables for the countries can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

ENUTS2 identifies the Nomenclature of Territorial Units for Statistics (NUTS) within Europe in which the household was enumerated. NUTS2 is the second level territorial units within countries. NUTS is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU, and they are also incorporated into this variable.

ENUTS2 corresponds to the 2010 version of NUTS2 released by Eurostat.

The code labels include the standard code for the NUTS2 system and the name of the NUTS2 region, separated by a slash.

The full set of geography variables for the countries can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

ENUTS3 identifies the Nomenclature of Territorial Units for Statistics (NUTS) within Europe in which the household was enumerated. NUTS3 is the third level territorial units within countries. NUTS is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU, and they are also incorporated into this variable.

ENUTS3 corresponds to the 2010 version of NUTS3 released by Eurostat.

The code labels include the standard code for the NUTS3 system and the name of the NUTS3 region, separated by a slash.

The full set of geography variables for the countries can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

### CONCEPT

var_concept.title	Vocabulary
Geography: Global Variables -- HOUSEHOLD	IPUMS

**GEOLEV1: 1st subnational geographic level, world [consistent boundaries over time]****Data file:** GRC1981\_PHC-H-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 6    Range: -    Format: Numeric

**description**

## DEFINITION

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Geography: Global Variables -- HOUSEHOLD	IPUMS

**Imputation and derivation**

## DERIVATION

GEOLEV1 is a 6-digit numeric variable.

GEOLEV1 codes and labels can be found [here](#).

Codes, labels, frequencies, and information about boundary changes for each country can be found in the country specific harmonized variable e.g. GEO1\_BR.

**GEOLEV2: 2nd subnational geographic level, world [consistent boundaries over time]****Data file:** GRC1981\_PHC-H-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 9    Range: -    Format: Numeric

**description**

## DEFINITION

GEOLEV2 indicates the second major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. Second administrative units in GEOLEV2 have been spatio-temporally harmonized to provide spatially consistent boundaries across samples in each country.

**concept**

## CONCEPT

<b>var_concept.title</b>	<b>Vocabulary</b>
Geography: Global Variables -- HOUSEHOLD	IPUMS

**Imputation and derivation**

## DERIVATION

GEOLEV2 is a 9-digit numeric variable.

GEOLEV2 codes and labels can be found here.

Codes, labels, frequencies, and information about boundary changes for each country can be found in the country specific harmonized variable e.g. GEO2\_BR.

**POPDENSGEO1: Population density of GEOLEV1 unit, in persons per square kilometer**

**Data file:** GRC1981\_PHC-H-H.dat

**Overview**

Type: Continuous    Decimal: 0    Width: 8    Range: -    Format: Numeric

**description**

## DEFINITION

POPDENSGEO1 indicates the population density in persons per square kilometer of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

**concept**

## CONCEPT

<b>var_concept.title</b>	<b>Vocabulary</b>
Geography: Global Variables -- HOUSEHOLD	IPUMS

**Imputation and derivation**

## DERIVATION

POPDENSGEO1 is an 8-digit string variable listing the population density in persons per square kilometer.

**POPDENSGEO2: Population density of GEOLEV2 unit, in persons per square kilometer****Data file:** GRC1981\_PHC-H-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 12    Range: -    Format: Numeric

**description**

## DEFINITION

POPDENSGEO2 indicates the population density in persons per square kilometer of the second major administrative unit in which the household was enumerated. The second major administrative unit of the household is identified by the GEOLEV2 variable.

The area of units in GEOLEV2 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## description

### DEFINITION

GEO1\_GR identifies the household's department within Greece in all sample years. Departments are the first level administrative units of the country. GEO1\_GR is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1\_GR can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Greece can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

GEO2\_GR identifies the household's municipality within Greece in all sample years. Municipalities are the second level administrative units of the country, after departments. GEO2\_GR is spatially harmonized accounting for political boundary changes across census years. A GIS map (in shapefile format), corresponding to GEO2\_GR can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Greece can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

GEO2\_GR1981 identifies the household's municipality within Greece in 1981. Municipalities are the second level administrative units of the country, after departments. A GIS map (in shapefile format), corresponding to GEO2\_GR1981 can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Greece can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level of any country refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

2	Not owned
9	Unknown

## description

### DEFINITION

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

## NFAMS: Number of families in household

Data file: GRC1981\_PHC-H-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	Vacant household
1	1 family
2	2 families
3	3 families
4	4 families
5	5 families
6	6 families
7	7 families
8	8 families
9	9 or more families

## description

### DEFINITION

NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

2	Other building intended for housing (hut, shed etc.)

3	Other building not intended for housing (shop etc.)
4	Regular dwelling within collective residence
9	No answer

## INTERVIEWER INSTRUCTIONS

I. Basic definitions useful for the Housing Census

51. **Edifice**: is an ensemble of buildings or off-hand structures built on the same independent plot, having access to the street, regardless of the number of the plot legal owners (e.g. a block of flats). Consequently, an edifice may include one, two or more buildings, e.g. a farm with the storehouse and stables on the same plot, a factory with many buildings built on the same plot etc.

52. **Building**: is every permanent and independent structure having walls and roof, composed of one or more rooms or other space (i.e. of area more than 4 m<sup>2</sup>).  
As a rule, buildings are having four (4) walls. But as a building is also considered a permanent structure that may be open in one or two sides as long as it is roofed (e.g. car workshop).

53. **Dwelling**: is, in general, a place distinct and independent from construction, built or converted in order to be used for housing, or if it were not intended for housing, it was used so during the census taking.

[p. 18]

Places intended for housing, but used during the census taking on the whole for other purposes and not housing, are not to be considered as dwellings.

Consequently, as a dwelling is considered:

a) An occupied or vacant dwelling, flat, room or series of rooms.  
b) An occupied hut, shed, rovers' wagon, boat, tent, hotel etc.  
c) A storehouse, mill, cave or any other roofed place used for housing during the census taking.  
The basic element of a dwelling is its "distinct and independent" characteristic. A space is considered "distinct" if it is surrounded by walls, fences etc. and is covered by a roof, so that the individual or group of persons may be isolated from other persons in order to sleep or prepare and have his meals or be protected from the elements.

A space is considered "independent" if it has a direct entrance from the street, or a common staircase, a passage or arcade, when the inhabitants may come and go without having to go through the space occupied by another household.

54. **Dwellings** are distinguished as **regular**, **non-regular** and **collective** ones.

55. **Regular dwelling**: is considered the permanent and independent structure, composed of one **regular room** at least and intended to be used as a residence of a household.

56. **Regular room**: is considered the space inside the building that is 2m high and of area 4m<sup>2</sup> at least and of shape allowing for a regular bed. In this respect, regular bedrooms, dining rooms, drawing-rooms, habitable basements and attics, servants' rooms, kitchens and other separate spaces used or intended for housing are considered as rooms.

[p. 19]

Corridors, verandas and halls are not considered as rooms. (\* Halls that commune (lighted and aired directly from the outside grounds) and satisfy the conditions of a regular room are considered in exemption as rooms).

Spaces intended for laundries, baths, storerooms and toilets are not considered as rooms even if are of area more than 4 sq.m.

57. **Non-regular dwellings**: the following cases of dwellings are to be included in the census only if they were found to be inhabited during the census taking.

a) Other spaces intended for housing: are considered the structures constructed with off-hand and cheap material, such as huts, sheds, booths, without any preconceived design, in order to be inhabited by a household  
b) Other spaces not intended for housing: are considered spaces like stables, barns, mills, garages, storehouses, offices, shops

and basements that are not regular dwellings, nor were constructed or converted as such, but were inhabited during the census taking by one or more households. In this category, the caves that were inhabited during the census taking are included. c) Mobile home: is a type of lodging whose transport is possible due to its construction (caravan or tent) or it is a mobile unit (ship, yacht, boat, barge or rover's wagon), intended for housing. Gypsy encampments are included in this category. 58. **Collective dwellings**: in this category the hotels (a), collective residences (b) and temporary quarters (c) are included.

68. **Question 1, Type of dwelling** [Omitted, question 1 is repeated] The definitions of each type of dwelling are given in paragraphs 53-58.

2	Flush toilet, outside the dwelling
3	Without flush toilet, inside the dwelling
4	Without flush toilet, outside the dwelling
5	No toilet available
8	No answer
9	NIU (not in universe)

## INTERVIEWER INSTRUCTIONS

82. Question 8, Toilet  
 [Omitted, question 8 is repeated]  
Toilet is a specially built space so that the sewage is directly disposed in a sink or sewage network.  
 Cases 1 and 2 refer to flush toilets and cases 3 and 4 to toilets without a hydraulic installation.  
 In order to be a flush toilet the water supply must be through pipes and the water sewage outside the dwelling.  
Case 1 is recorded if there is flush toilet inside the dwelling.  
Case 2 is recorded if the flush toilet is outside the dwelling.  
 The toilet is considered outside the dwelling if it is in any other space inside the building.  
Case 3 is recorded if the toilet without flush is inside the dwelling.  
Case 4 is recorded if the toilet without flush is outside the dwelling.  
[p. 33]

Case 5 is recorded if the household is using a toilet outside the building.

3	Outside the building
8	No answer
9	NIU (not in universe)

### INTERVIEWER INSTRUCTIONS

80. Question 6, Water supply  
 [Omitted, question 6 is repeated]  
 The question refers to the household's drinking water regardless of whether its quality.  
 There must be recorded only one answer even if the enumerated declare that they do not have drinking water.  
 Case 1 is recorded when there is a tap (hydraulic installation) connected to water supply network, inside the dwelling and not in any other space of the building.  
 Case 2 is recorded if the tap is outside the dwelling but inside the building, in a communal space of the building, in the courtyard or the building site.  
 Case 3 is recorded if the tap is on the street, the pavement, the square and in general outside the building.  
 In this case any other means of supplying water are included, i.e.:  
 a) Well or spring,  
 b) River, rivulet or lake (without network),  
 c) Cistern,  
 d) Cask

## description

---

### DEFINITION

This variable indicates the type of water supply for the dwelling.

**MOMLOC: Mother's location in household****Data file:** GRC1981\_PHC-P-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 3    Range: -    Format: Numeric

**description**

## DEFINITION

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of MOMLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships. To restrict MOMLOC to biological mothers, such as for own children fertility estimation, MOMLOC should be reset to zero when STEPMOM is greater than zero.

51	Non-Relatives, within empirical child cap
52	Non-Relatives, within constructed child cap

## description

### DEFINITION

PARRULE describes the criteria by which the IPUMS International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

## PERNUM: Person number

Data file: GRC1981\_PHC-P-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

## description

### DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

**Imputation and derivation**

## DERIVATION

PERNUM is a 4-digit numeric variable.

**PERWT: Person weight**

**Data file:** GRC1981\_PHC-P-H.dat

**Overview**

Type: Continuous    Decimal: 2    Width: 8    Range: -    Format: Numeric

**description**

## DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

**Imputation and derivation**

## DERIVATION

PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

**POLYMAL: Man with more than one wife linked**

**Data file:** GRC1981\_PHC-P-H.dat

## Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	No more than one wife linked via SPLOC
1	More than one wife linked via SPLOC

## description

### DEFINITION

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

## POPLOC: Father's location in household

Data file: GRC1981\_PHC-P-H.dat

## Overview

Type: Continuous    Decimal: 0    Width: 3    Range: -    Format: Numeric

## description

### DEFINITION

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of POPLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPOP is designed to identify some of these social relationships. To restrict POPLOC to biological mothers, such as for own children fertility estimation, POPLOC should be reset to zero when STEPPOP is greater than zero.

**concept**

## CONCEPT

<b>var_concept.title</b>	<b>Vocabulary</b>
Constructed Family Interrelationship Variables -- PERSON	IPUMS

**Imputation and derivation**

## DERIVATION

POPLOC is a 3-digit numeric variable.

Codes0 = No father of this person present in the household.  
1 or higher = The person number of this person's father

**SPLOC: Spouse's location in household**

**Data file:** GRC1981\_PHC-P-H.dat

**Overview**

Type: Continuous    Decimal: 0    Width: 3    Range: -    Format: Numeric

**description**

## DEFINITION

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly. For more details on the construction of SPLOC, see the Comparability section of SPRULE and this paper on IPUMSI family linking methodology.

Codes0 = No spouse of this person present in the household.

1 or higher = The person number of this person's spouse

## SPRULE: Rule for linking spouse

Data file: GRC1981\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 2    Range: -    Format: Numeric

### Questions and instructions

#### CATEGORIES

Value	Category
00	No spouse present
01	Rule 1: strong relationship pairing, couple adjacent
02	Rule 2: strong relationship pairing, couple not adjacent
03	Rule 3: weak relationship pairing, couple adjacent
04	Rule 4: weak relationship pairing, couple not adjacent
05	Rule 5: weak consensual union pairings
06	Rule 6: sample-specific rules (usually child-to-child)

### description

#### DEFINITION

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

## STEPMOM: Probable stepmother

Data file: GRC1981\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	Biological mother or no mother present
1	Mother has no children born or surviving
2	Child reports mother is deceased
3	Explicitly identified step relationship
4	Mother reports no children in the home
5	Age difference implausible
6	Child exceeds known fertility of mother

### description

#### DEFINITION

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children born or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

In cases where more than one criterion for a likely stepmother is met, STEPMOM will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

### STEPPOP: Probable stepfather

Data file: GRC1981\_PHC-P-H.dat

## Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	Biological father or no father present
1	Child reports father is deceased
2	Explicitly identified step relationship
3	Age difference implausible
4	Spouse of mother
5	Identified as adopted
6	Surname difference -- male child or never-married female

## description

### DEFINITION

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

In cases where more than one criterion for a likely stepfather is met, STEPPPOP will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

## description

### DEFINITION

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## description

### DEFINITION

YNGCH gives the age of the person's youngest own child living in the household with her or him. These include all children

linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

YNGCH is top-coded at age 50 or older.

2	Married
3	Widowed and not remarried
4	Divorced/separated and not remarried
5	Widowed or divorced
9	Unknown / missing

### description

#### DEFINITION

EMARST describes for the European samples the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. European census instructions generally limit marital status to legal unions, but there are exceptions.

EMARST has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses.

0	NIU (not in universe)
1	Single/never married
2	Married/in union
3	Separated/divorced/spouse absent

4	Widowed
9	Unknown/missing

## description

### DEFINITION

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

## description

### DEFINITION

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

### DEFINITION

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

## description

### DEFINITION

EEDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone) for the European samples. The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary. All education that was relevant to the completion of a level should be taken into account even if it was provided outside of schools and universities.

EEDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EEDATTAIN is an attempt to merge -- into a single, roughly comparable

variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EEDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country.

Hungary 1980 and 1990 also give single years of schooling completed, recorded in YRSCHOOL.

EEDATTAIN has been classified according to the recommendations of the Conference of European Statisticians for the 2010 Population and Housing Censuses. EEDATTAIN presents a less detailed version of EDATTAIN for the European Samples.

999	Unknown / missing

## description

### DEFINITION

EEMPSTAT indicates for the European samples whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EEMPSTAT can also convey further information.

EEMPSTAT has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses. "Employment Status" is referred to as "Activity Status" in the CES recommendations, but the former term is used to maintain consistency with IPUMS practices.

The economically active population constitutes the total labor force: employed and unemployed persons.

Data file: GRC1981\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

### Questions and instructions

### CATEGORIES

Value	Category
0	NIU (not in universe)
1	Employed
2	Unemployed
3	Inactive
9	Unknown/missing

## description

### DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

**LABFORCE: Labor force participation****Data file:** GRC1981\_PHC-P-H.dat**Overview**

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

**Questions and instructions**

## CATEGORIES

Value	Category
1	No, not in the labor force
2	Yes, in the labor force
8	Unknown
9	NIU (not in universe)

**description**

## DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

## description

### DEFINITION

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

## description

### DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

## description

### DEFINITION

ECLASSWK refers in European Samples to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker.

ECLASSWK is related to EEMPSTAT (employment status), which is used to define the universe for the variable in many samples.

ECLASSWK has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses. "Class of worker" is referred to as "Status in Employment" in the CES recommendations. The former term is used to maintain concordance with IPUMS practice.

## IND: Industry, unrecoded

Data file: GRC1981\_PHC-P-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 5    Range: -    Format: Numeric

## description

### DEFINITION

"Industry" refers to the activity or product of the establishment or sector in which the person worked. IND is classified according to the system used by the respective national census office at the time, and is not recoded by IPUMS-International.

## concept

### CONCEPT

var_concept.title	Vocabulary
Work Variables -- PERSON	IPUMS

## Imputation and derivation

### DERIVATION

IND is a 5-digit numeric variable.

Some samples use fewer than 5 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

## description

### DEFINITION

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

## description

### DEFINITION

ISCO68A provides the 3-digit occupation code for the respondent using the ISCO-1968 occupation classification.

## concept

### CONCEPT

var_concept.title	Vocabulary
Work Variables -- PERSON	IPUMS

## OCC: Occupation, unrecoded

Data file: GRC1981\_PHC-P-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

## description

### DEFINITION

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

## concept

### CONCEPT

var_concept.title	Vocabulary
Work Variables -- PERSON	IPUMS

## Imputation and derivation

### DERIVATION

OCC is a 4-digit numeric variable.

Some samples use fewer than 4 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

## description

### DEFINITION

GEOMIG1\_5 indicates the major administrative unit in which the person resided five years prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of residence five years ago, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1\_5 match the geographic codes in GEOLEV1 (current place of residence). For similar information for different time intervals since migration, see variables GEOMIG1\_P, GEOMIG1\_1, and GEOMIG1\_10. More on migration and geography can be found [here](#).

99	Without Nationality

**INTERVIEWER INSTRUCTIONS**

**Question 7**: "Citizenship". If they are citizen of another country write both answers.

162. Citizenship (nationality) is ascertained by official documents. If not, the respondent's answer is inserted. Married women usually have their spouses citizenship, and the under age lawful children that of their fathers, unlawful children that have not been recognized or adopted that of their mothers.

163. Persons "without nationality" are to be met in cases of immigrants or gypsies. Without nationality are certain other persons -even Greeks- that have been legally deprived of it.

164. Citizenship of two countries may have Greek immigrants -men and women- that returned to Greece, as well as immigrants from other countries that resided permanently in Greece and have both citizenships. These persons are to declare them both.

**description****DEFINITION**

This variable indicates the citizenship of the person.

<sva r v="GR81A414 GR81A415 GR81A416 GR81A417 GR81A418 GR81A419 GR81A420 GR81A421"><span class="em">Questions 10-15 should only be completed for persons born in 1970 or before</span><br /></sva r></p>

<p><sva r a="GR81A414" v="GR81A414 GR81A415 GR81A416 GR81A417 GR81A418 GR81A419 GR81A420 GR81A421">[Omitted, question 11 as in the form]<br /><br />178. The enumerated is to be considered (by the Enumerator) as working at the day of the census taking if he <span class="em">has a job</span> that provides his or/and the household's livelihood. That is, that the individual is working in order to:<br /><div class="i1"><span class="em">profit</span>, as in case of a businessman<br /><span class="em">pay</span>, i.e. salary, a day's wages, contract work etc.<br />or finally,<br /><span class="em">assist</span> in the family business or agricultural land <span class="em">without pay</span> (apart from his livelihood).</div><br /><br />179. The respondent's work during the census taking may be seasonal so that he may be not working that certain period as in the case of a farmer whose work covers a period of 8 months or a manager of a hotel that is closed during the winter months. <span class="pg">[p. 58]</span> These individuals are to be considered as working although due to the nature of their jobs were not working at the time of the census taking.<br /><br />180. As working are to be considered all individuals having a job as was defined in paragraph 178 but during the census taking were not working due to leave, sickness, accident, weather conditions, strike etc. or just started working (employed a few days before the census taking).<br /><br />181. The individual assisting in the family business without pay (salary or day's wages) is to be considered as <span class="em">working</span> if he is systematically working i.e. daily (except bank holidays) and at least of 1/3 of the business's usual operating time. If the member of the family is working on the agricultural land in order to be considered as working he will have to be working full time for a period of more than three months per year or more than 90 days of work a year.<br /><br />But the member of the family working in the family or agricultural land occasionally and for less time that the before mentioned is <span class="em">not to be considered</span> as working and on occasion that is active in the household (household activities).<br /><br />182. Individuals which even the day before the census taking stopped or lost their work e.g. someone who on Friday the 13th March 1981 got his pension or were dismissed from the shop he were working are <span class="em">not to be considered as working</span>.<br /><br />Finally, those serving in the Army either as conscripts

(draftees) or reserves are to be considered as conscripts and not working even if they were working before their conscription and are to go back when dismissed.  
 In contrast, all permanent personnel of the armed forces either officers or non-commissioned officers or soldiers are considered as working.  
 [p. 59]183. The enumerated is to be considered as job seeker (by the Enumerator) if during the census taking is not working and is seeking work, i.e. taking initiatives towards that end.  
 In this category are included:  
 a) Individuals that lost their work for any reason (such as an individual who was dismissed or left his work because the working conditions were unprofitable or unhealthy, or his business was closed etc.) and are seeking work.  
 b) Individuals seeking work for the first time e.g. having just finished school, or their studies or professional training and are seeking work for the first time.  
 184. In the cases of job seekers the enumerator apart from the fact that they are not working has to find out that they are not only intended to seek work but are making certain efforts to do so and specially for the individuals of case (b).  
 185. If the respondent is not working or seeking work (as defined before) on the day of the census taking then will be considered as:  
Household activities, as in the case of a housewife  
 or  
pupil or student if he is mainly studying  
 or  
conscript serving as conscript or reserve  
 or finally,  
 as belonging to any other case when is not working at all or seeking work and has to clarify in this case whether e.g. his main source of livelihood is capital income, or has stopped working due to age, health or any other reasons.

## INTERVIEWER INSTRUCTIONS

<sva v="GR81A414 GR81A415 GR81A416 GR81A417 GR81A418 GR81A419 GR81A420 GR81A421"><span class="em">Questions 10-15 should only be completed for persons born in 1970 or before</span><br /></sva></p>

<p><sva a="all" v="GR81A415 GR81A416 GR81A417">186. If the respondent is <span class="em">working</span> or <span class="em">seeking work</span> then he has to answer the following questions:<br /><br />[Omitted, a), b) and c) as in the form]<br /><br />187. The type of work he is or was doing the last time he worked must be very clear so as to be coded according to the occupational codes.<br /><br />If his answer is general or vague, e.g. "technician", "employee" or "merchant" or "public servant", more questions are needed so as to clarify e.g. "what kind of technician", "what kind of employee", "what kind of trade, whole sale or retail" etc.<br /><br />[Bottom of p. 60 and p. 61 omitted]<br /><br /><span class="pg">[p. 62]</span><br /><br />190. Question (b) "what is the type of establishment, enterprise, agricultural land, service etc. he works (or was the last time he worked)" refers to the type of economic activity (industry branch) of the establishment, enterprise etc. the enumerated is working or if he is seeking work to the establishment,

enterprise etc. he was working last. If seeking work for the first time as before "young" will be recorded. 191. The answer to this question must not be general or vague as e.g. "shop" or "factory" or "company" but must clarify the economic activity of the establishment or service he is working (or was working last). [Examples omitted] [p. 63 omitted] [p. 64] 194. Question (c) "occupational status" the enumerated must answer whether he is (or was) employer, self-employed, assistant in the family business or agricultural land, or employee or wage earner. These categories are clarified as following: i) Employer is considered the owner of the establishment (either by himself or with partners) and is employing salaried or wage earning staff. ii) Self-employed is the one that works in his own work without employing salaried or wage earning staff apart maybe a member of his family as unpaid assistant. iii) Assistant in the family business or agricultural land is the family member working in the family business or agricultural land without pay, except his livelihood, within the time limits defined in paragraph 181. iv) Employee or wage earner is the person who for his work is having a salary or a day's wage or by contract or percentage on the sales. 195. The employee or wage earner that works on contract but has the materials or is working with percentages on the profits is not to be considered as employee or wage earner. In these cases, he will be considered as employer (if he employs staff) or self-employed (if not employing staff).

986	Coachmen and related drivers
989	Land and sea transport workers not elsewhere classified
990	Laborers not elsewhere classified
996	Non-identifiable occupations
997	Seeking work for the first time
998	No answer or occupation insufficiently described
999	NIU (not in universe)

## INTERVIEWER INSTRUCTIONS

<sva v="GR81A414 GR81A415 GR81A416 GR81A417 GR81A418 GR81A419 GR81A420 GR81A421"><span class="em">Questions 10-15 should only be completed for persons born in 1970 or before</span><br /></sva></p>

<p><sva a="all" v="GR81A415 GR81A416 GR81A417">186. If the respondent is <span class="em">working</span> or <span class="em">seeking work</span> then he has to answer the following questions:<br /><br />[Omitted, a), b) and c) as in the form]<br /><br />187. The type of work he is or was doing the last time he worked must be very clear so as to be coded according to the occupational codes.<br /><br />If his answer is general or vague, e.g. "technician", "employee" or "merchant" or "public servant", more questions are needed so as to clarify e.g. "what kind of technician", "what kind of employee", "what kind of trade, whole sale or retail" etc.<br /><br />[Bottom of p. 60 and p. 61 omitted]<br /><br /><span class="pg">[p. 62]</span><br /><br />190. Question (b) "what is the type of establishment, enterprise, agricultural land, service etc. he works (or was the last time he worked)" refers to the type of economic activity (industry branch) of the establishment, enterprise etc. the enumerated is working or if he is seeking work to the establishment,

enterprise etc. he was working last. If seeking work for the first time as before "young" will be recorded. 191. The answer to this question must not be general or vague as e.g. "shop" or "factory" or "company" but must clarify the economic activity of the establishment or service he is working (or was working last). [Examples omitted] [p. 63 omitted] [p. 64] 194. Question (c) "occupational status" the enumerated must answer whether he is (or was) employer, self-employed, assistant in the family business or agricultural land, or employee or wage earner. These categories are clarified as following: i) Employer is considered the owner of the establishment (either by himself or with partners) and is employing salaried or wage earning staff. ii) Self-employed is the one that works in his own work without employing salaried or wage earning staff apart maybe a member of his family as unpaid assistant. iii) Assistant in the family business or agricultural land is the family member working in the family business or agricultural land without pay, except his livelihood, within the time limits defined in paragraph 181. iv) Employee or wage earner is the person who for his work is having a salary or a day's wage or by contract or percentage on the sales. 195. The employee or wage earner that works on contract but has the materials or is working with percentages on the profits is not to be considered as employee or wage earner. In these cases, he will be considered as employer (if he employs staff) or self-employed (if not employing staff).

## description

### DEFINITION

This variable indicates occupation of persons born in and before 1970.

### UNIVERSE

Greece 1981: Persons born in or before 1970 who were working or seeking a job [discrepancies: type I: trace; type II: none]

## concept

### CONCEPT

Work: Occupation Variables -- PERSON	IPUMS

## GR1981A\_WHYEMP: Reason for lesser employment

Data file: GRC1981\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

### Questions and instructions

#### LITERAL QUESTION

The following questions should be answered only by persons born in 1970 or earlier.

Occupation [Questions 11 to 14]

13. If working (answer 1 in question 11), for how many hours did he/she work during the previous week (8-14 March)? If he/she did not work at all, write the word ZERO. If ZERO or less than 15 hours, the reason was: 1 Seasonal work 2 Weather conditions 3 Leave or sickness 4 Other reason (indicate)

## CATEGORIES

Value	Category
1	Seasonal work
2	Weather conditions
3	Leave/sickness
4	Other
8	Unknown
9	NIU (not in universe)

## INTERVIEWER INSTRUCTIONS

<sva r v="GR81A414 GR81A415 GR81A416 GR81A417 GR81A418 GR81A419 GR81A420 GR81A421"><span class="em">Questions 10-15 should only be completed for persons born in 1970 or before</span><br /></sva r></p>

<p><sva r a="all" v="GR81A418 GR81A419">196. <span class="em">Question 13</span>, "how many hours did he work during the previous week (8-14 March)" must be answered <span class="em">only if</span> the answer to question 11 is <span class="em">working</span>. <br /><br />The actual sum of hours they worked must be recorded. It is considered that the enumerated has worked as many hours as he was present in his work, e.g. the establishment, enterprise, service or/and outside work, regardless of whether or not during this time he did not worked. So, the shopkeeper opening his shop is considered that worked as many hours as the shop were open regardless of whether or not they were any sales during that time.<br /></sva r>

**description**

## DEFINITION

This variable indicates reasons for not working or spending less than 15 hours per week.

## UNIVERSE

Greece 1981: Persons born in or before 1970 who were working less than 15 hours [discrepancies: type I: trace; type II: none]
